QUESTION 1

Server name	FQDN	Component	IP address
Server1	Sip.contoso.com	Access Edge service	131.107.1.1
Server1	Wc.contoso.com	Web Conferencing Edge service	131.107.1.2
Server1	Av.contoso.com	A/V Edge service	131.107.1.3

You plan to deploy a Skype for Business Server 2015 Edge Server infrastructure. The Edge Server deployment will be configured as shown in the following table.

You need to configure the DNS records for Server1 to support the following features:

- Automatic client sign-in
- Discovery of federated partners

Which DNS records should you configure?

To answer, configure the correct service, protocol, and host for each SRV record in the answer area.

Hot Area:

Answer Area

Service	Domain	Protocol	Port	Host
<input type="text" value="sip"/> <input type="text" value="sipfederationtls"/> <input type="text" value="sipfederationtcp"/>	Contoso.com	<input type="text" value="tcp"/> <input type="text" value="tls"/>	5061	<input type="text" value="Av.contoso.com"/> <input type="text" value="Sip.contoso.com"/> <input type="text" value="Wc.contoso.com"/>
<input type="text" value="sip"/> <input type="text" value="sipfederationtls"/> <input type="text" value="sipfederationtcp"/>	Contoso.com	<input type="text" value="tcp"/> <input type="text" value="tls"/>	443	<input type="text" value="Av.contoso.com"/> <input type="text" value="Sip.contoso.com"/> <input type="text" value="Wc.contoso.com"/>

Correct Answer:

Answer Area

Service	Domain	Protocol	Port	Host
<input type="text" value="sip"/> <input type="text" value="sipfederationtls"/> <input type="text" value="sipfederationtcp"/>	Contoso.com	<input type="text" value="tcp"/> <input type="text" value="tls"/>	5061	<input type="text" value="Av.contoso.com"/> <input type="text" value="Sip.contoso.com"/> <input type="text" value="Wc.contoso.com"/>
<input type="text" value="sip"/> <input type="text" value="sipfederationtls"/> <input type="text" value="sipfederationtcp"/>	Contoso.com	<input type="text" value="tcp"/> <input type="text" value="tls"/>	443	<input type="text" value="Av.contoso.com"/> <input type="text" value="Sip.contoso.com"/> <input type="text" value="Wc.contoso.com"/>

Note:

* the Edge generally only listens on port 5061 if you have Federation enabled

* Port, protocol and firewall requirements for federation with Microsoft Lync Server 2013, Lync Server 2010 and Office Communications Server are similar to those for the deployed Edge Server. Clients initiate communication with the Access Edge service over TLS/SIP/TCP 443. Federated partners however, will initiate communications to the Access Edge service over MTLS/SIP/TCP 5061.

QUESTION 2

Your network contains an Active Directory Domain Services domain named contoso.com.

The domain contains a Skype for Business Server 2015 infrastructure that has the Persistent Chat feature configured.

Persistent Chat is hosted by a Front End pool named pcpool.

- Allow only the user named user1@contoso.com to post messages to Announcements.
- Users from a group named group1 must be able to view the messages in Announcements.

You need to configure a chat room named Announcements to meet the following requirements:

How should you configure the relevant Skype for Business Management Shell command? To answer, configure the appropriate parameters for the command in the answer area.

Hot Area:

Set-CsPersistentChatRoom -Identity pcpool.contoso.com\Announcements

▼
-Managers
-Presenters

@{Add="sip:user1@contoso.com"}

▼
-Type Auditorium
-Type Normal
-Privacy Closed
-Privacy Open

-Members @{Add="CN=group1,DC=contoso,DC=com"}

Correct Answer:

Set-CsPersistentChatRoom -Identity pcpool.contoso.com\Announcements

▼
-Managers
-Presenters

@{Add="sip:user1@contoso.com"}

▼
-Type Auditorium
-Type Normal
-Privacy Closed
-Privacy Open

-Members @{Add="CN=group1,DC=contoso,DC=com"}

QUESTION 3

You have a Skype for Business Server 2015 environment that contains four servers. The servers are configured as shown in the following table.

Server name	Role
Server1.contoso.com	Standard Edition Front End
Server2.contoso.com	Standard Edition Front End
Server3.contoso.com	Edge Server
Sql1.contoso.com	Database Reporting services

You run the Get-CsManagementStoreReplicationStatus Skype for Business Management Shell cmdlet and discover the following replication issue:

```
UpToDate : True
ReplicaFqdn : Server1
LastStatusReport : 9/12/2015 12:09:03 PM
LastUpdateCreation : 9/12/2015 12:09:03 PM
ProductVersion :
```

```
UpToDate : True
ReplicaFqdn : Server2
LastStatusReport : 9/12/2015 12:09:09 PM
LastUpdateCreation : 9/12/2015 12:09:03 PM
ProductVersion :
```

```
UpToDate : False
ReplicaFqdn : Server3
LastStatusReport :
LastUpdateCreation : 9/9/2015 12:09:03 PM
ProductVersion :
```

From Telnet, you verify that you can connect to Server3 over TCP ports 443, 5061, and 5062. You republish the topology successfully and restart Server3.

You need to identify what is causing the replication issue.

What should you investigate?

- A. a certificate issue
- B. a routing issue
- C. a firewall issue
- D. a failed service

Correct Answer: A

QUESTION 4

You support a customer whose network environment includes Skype for Business Server 2015 deployed in a datacenter that has two pools, named PoolA and PoolB . Both PoolA and PoolB have Skype for Business Server 2015 installed.

You use the Skype for Business Management Shell for all administrative actions.

You run the Invoke-CsPoolFailover PowerShell cmdlet and you receive the following message:

```
Invoke-CsPoolFailOver: This Front-end pool"poolA.contoso.com" is specified in topology as the next hop for the Edge server. Failing over this pool may cause External access/Federation/Split-domain/XMPP features to stop working. Please
```

use Topology Builder to change the Edge internal next hop setting to point to a different Front-end pool, before you proceed.

You need to fail over PoolA only.

Which Skype for Business Management Shell cmdlet or cmdlets should you run?

- A. Get-CsDatabaseMirrorState and Itwoke-CSManagementServerFailover
- B. Set-CsEdgeServer
- C. Set-CsAccessEdgeConfiguration
- D. Set- CsAVEdgcConfiguration

Correct Answer: B

QUESTION 5

You need to configure federation for the Sydney office.

What should you do? To answer, select the appropriate action from each list in the answer area.

Hot Area:

Answer Area

Create the following DNS SRV record:

▼
_sipfederationtls._tcp.adatum.com
_sipfederationtls._tcp.wideworldimporters.com
_sip._tls.adatum.com
_sip._tls.wideworldimporters.com

Configure the topology - step one:

▼
Define the Edge pool.
Define the federation route.

Configure the topology - step two:

▼
Define the Edge pool.
Define the federation route.

Correct Answer:

Answer Area

Create the following DNS SRV record:

	▼
_sipfederationtls._tcp.adatum.com	
_sipfederationtls._tcp.wideworldimporters.com	
_sip._tls.adatum.com	
_sip._tls.wideworldimporters.com	

Configure the topology - step one:

	▼
Define the Edge pool.	
Define the federation route.	

Configure the topology - step two:

	▼
Define the Edge pool.	
Define the federation route.
