**QUESTION 1**

A company has a Skype for Business 2015 infrastructure with 65,000 users. There are two Front End pools, named Pool1 and Pool2 respectively. Pool pairing is enabled.

The Central Management Store is hosted on Pool1.

Pool1 suffers a catastrophic failure. You must permanently move users from Pool1 to Pool2.

You need to fail over Pool1.

Which Skype for Business Management Shell cmdlet or cmdlets should you run?

A. Get-CsDatabaseMirrorState and Invoke-CSManagementServerFailover

B. Set-CsConfigurationStoreLocation

C. Invoke-CsPoolFailover

D. Install-CsDatabase and Move-CsManagementServer

Correct Answer: A

**QUESTION 2**

You need to correct the issue and reduce further administrative overhead. What should you do?

A. Modify the SRV record_sipfederationtls._tcp.adatum.com to point to the new Fabrikam Access Edge FQDN on port TCP/5061.

B. Modify the federation configuration to enable Open Federation.

C. Allow outbound connection on port TCP/5061 from Edge Server to any IP address on the Internet.

D. Modify the SRV record_sipfederationtls._tcp.wideworldimporters.com to point to the new Fabrikam Access Edge FQDN on port TCP/5061.

E. Modify the SRV record_sipfederationtls._tcp.adatum.com to point to the new Fabrikam Access Edge FQDN on port TCP/443.

F. Modify the SRV record_sipfederationtls._tcp.wideworldimporters.com to point to the new Fabrikam Access Edge FQDN on port TCP/443.

Correct Answer: B

Explanation:

This answer would only work if Fabrikam corrected their _sipfederationtls._tcp.fabrikam.com SRV record when they changed their Access Edge fully qualified domain name (FQDN). However, it is the only possible answer. It also meets the

requirement of reducing further administrative overhead.

**QUESTION 3**

You have a Skype for Business 2015 infrastructure that contains two servers. The servers are configured as shown in the following table.

| Server name | Pool name | Role |
|---|---|---|
| ServerFE1 | ServerFE1.contoso.com | Standard Front End Server |
| ServerFE2 | ServerFE2.contoso.com | Standard Front End Server |

Pool pairing is configured between ServerFEI and ServerFE02. Currently, the Central Management store is hosted on ServerFEI A hardware failure occurs on ServerFEI You manually perform a failover of all the user services and the Central Management store to ServerFE2. You resolve the hardware issue on ServerFEI You need to restore all of the user services and the Central Management store to ServerFEI Which three Skype for Business Server 2015 commands should you run? Each correct answer presents part of the solution.

A. Install-CSDatabase -CentralManagementDatabase -SqlServerFqdn ServerFEI .contoso.com -SQLInstanceName RTC-Clean D

B. Invoke-CsPoolFailback -PoolFQDN ServerFE2.contoso.com

C. Invoke-CsPoolFailback -PoolFQDN ServerFEI .contoso.com

D. Invoke-CsManagementServerFailover-BackupSqlServerFQDN ServerFEI contoso.com -BackupSqllnstanceName RTC - Force

E. Move-CsManagementServer

Correct Answer: ACE

**QUESTION 4**

You support a customer who is upgrading from Lync2010 Group Chat to Skype for Business 2015 Persistent Chat. Users are Session Initiation Protocol (SIP) enabled members of a single Active Directory Domain Services (AD DS) domain.

Group Chat clients connect by using a well-known user named ocschat@litwareinc.com. The Lookup service registers with the Lync server to receive incoming requests.

Your customer\'s Persistent Chat pool fully qualified domain name (FQDN) is named pchatpool.litwareinc.com.

When users sign out of Skype for Business and then sign in again by using the Lync 2010 Group Chat client, they are able to access their data without needing to change any configuration.

You need to configure Skype for Business 2015 Persistent Chat to support legacy Group Chat clients.

Which Skype for Business Management Shell commands should you run?

A. New-CsPersistentChatEndpoint -SipAddress sip:ocschat@litwareinc.com - PersistentChatPoolFqdn pchatpool.litware.com

B. $cred1 = Get-Credential 1itwareinc\pilar"$cred2 = Get-Credential 1itwareinc\ocschatTest-CsPersistentChatMessage -TargetFqdn pchatpool. litwareinc.com - SenderSipAddress "sip:pilar@litwareinc.com" -SenderCredential Scredl -ReceiverSipAddress "sip:ocschat@litwareinc.com" -ReceiverCredential $cred2

C. Set-CsPersistentChatRoom -Identity IT-Presenters @{Add="sip:ocschat@litwareinc.com"}

D. New-CsTrustedApplicationEndpoint -Application pchat -TrustedApplicationPoolFqdn pchatpooLlitware.com -SipAddress sip: ocschat@litwareinc.com

Correct Answer: A

**QUESTION 5**

You are migrating from Lync Server 2013 to Skype for Business Server 2015. During the migration, users may be registered on either Lync or Skype for Business.

Clients that do not use WebSearch must be able to search for new address book entries.

You need to create the required incremental normalization rules.

In the table below, identify the actions that you must perform for each server version.

NOTE: Make only one selection in each column. Each correct answer is worth one point.

Hot Area:

## Answer Area

| Option | Lync Server 2013 | Skype for Business Server 2015 |
| --- | --- | --- |
| Manually edit the Company_Phone_Number_Normali-zation_Rules.txt file. Then, run the **Import-CsCompany-PhoneNormalizationRules** Skype for Business Management Shell cmdlet for each change. | ○ | ○ |
| Run the **Import-CsCompanyPhoneNormalizationRules** Skype for Business Management Shell cmdlet for every change. | ○ | ○ |
| Run the **New-CsAddressBookNormalizationConfiguration** Skype for Business Management Shell cmdlet for every change. | ○ | ○ |
| Manually edit Company_Phone_Number_Normaliza-tion_Rules.txt file. | ○ | ○ |
| Run the **Set-CsAddressBookNormalizationConfiguration** Skype for Business Management Shell cmdlet for every change. | ○ | ○ |

Correct Answer:

## Answer Area

| Option | Lync Server 2013 | Skype for Business Server 2015 |
|---|---|---|
| Manually edit the Company_Phone_Number_Normali-zation_Rules.txt file. Then, run the **Import-CsCompany-PhoneNormalizationRules** Skype for Business Management Shell cndlet for each change. | ● | ○ |
| Run the **Import-CsCompanyPhoneNormalizationRules** Skype for Business Management Shell cmdlet for every change. | ○ | ○ |
| Run the **New-CsAddressBookNormalizationConfiguration** Skype for Business Management Shell cmdlet for every change. | ○ | ● |
| Manually edit Company_Phone_Number_Normaliza-tion_Rules.txt file. | ● | ○ |
| Run the **Set-CsAddressBookNormalizationConfiguration** Skype for Business Management Shell cmdlet for every change. | ○ | ● |
