**QUESTION 1**

A company uses SharePoint2016 in a hybrid environment. You replace an administrator that has left the company.

A vendor notifies you that the SSL certificate that you purchased from the vendor is expired. The hybrid environment is not able to authenticate domain users that attempt to access it. When accessing the online environment by using a cloud

user account, you observe that Search is not returning results from the entire farm.

You need to locate the expired certificates and renew them.

What should you do? To answer, select the appropriate certificate type of location from each list in the answer area.

Note: Each correct selection is worth one point.

Hot Area:

Issue	Certificate type	Location
Domain users are unable to access online resources.	<input checked="" type="checkbox"/> STS certificate <input type="checkbox"/> wildcard SSL certificate <input type="checkbox"/> secure channel certificate	<input type="checkbox"/> Office 365 tenant <input type="checkbox"/> reverse proxy server <input type="checkbox"/> federation server <input type="checkbox"/> domain controller
SharePoint Online search queries are not returning expected results.	<input type="checkbox"/> STS certificate <input type="checkbox"/> wildcard SSL certificate <input type="checkbox"/> domain certificate	<input type="checkbox"/> Office 365 tenant <input type="checkbox"/> reverse proxy server <input type="checkbox"/> federation server <input type="checkbox"/> domain controller

Correct Answer:

Issue	Certificate type	Location
Domain users are unable to access online resources.	<input checked="" type="checkbox"/> STS certificate <input type="checkbox"/> wildcard SSL certificate <input type="checkbox"/> secure channel certificate	<input checked="" type="checkbox"/> Office 365 tenant <input type="checkbox"/> reverse proxy server <input type="checkbox"/> federation server <input type="checkbox"/> domain controller
SharePoint Online search queries are not returning expected results.	<input type="checkbox"/> STS certificate <input checked="" type="checkbox"/> wildcard SSL certificate <input type="checkbox"/> domain certificate	<input type="checkbox"/> Office 365 tenant <input checked="" type="checkbox"/> reverse proxy server <input type="checkbox"/> federation server <input type="checkbox"/> domain controller

## QUESTION 2

You manage a SharePoint 2016 farm.

You create a unique site collection for each department. For each site collection, you grant specific users the Full control permission level to their site collection. These users are responsible for creating lists and libraries in the site collections.

You need to prevent all users from creating subsites within their site collections.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

### Actions

- Clear the permission to create subsites.
- Disable Self-Service Site Creation.
- Select the web application that hosts the site collections for each department.
- Modify user permissions for the site collection.
- Select Self-Service Site Creation settings page that hosts the site collections for each department.
- Verify that your user account is a member of the Farm Administrators SharePoint group.

### Answer area

Correct Answer:

**Actions**

- 
- Disable Self-Service Site Creation.
- 
- Modify user permissions for the site collection.
- Select Self-Service Site Creation settings page that hosts the site collections for each department.
- 

**Answer area**

- Verify that your user account is a member of the Farm Administrators SharePoint group.
- Select the web application that hosts the site collections for each department.

Clear the permission to create subsites. ⬆️
