QUESTION 1

Your organization sells products online. You store all product information in a secure Microsoft SQL Server database. Members of the online marketing team only access the database by using an online website administration application. The

organization's sales and product development teams do not have direct access to database. Single sign-on is enabled in the environment.

You identify the following requirements for the sales and product development teams:

You need to provide access to the product database while leveraging out-of-the box SharePoint functionality.

Which actions should you perform in sequence? To answer, select the appropriate options in the answer area.

Hot Area:

Answer Area

Step	Action
1	▼
	Create a Secure Store target application that implements individual ticket mapping.
	Create a Secure Store target application that implements group mapping.
2	▼
	Create an external content type.
	Create a content type that is based on a Report Builder report.
3	▼
	Configure alternate access mappings.
	Configure Report Server.
	Create an external list.

Correct Answer:

Answer Area

Step	Action
1	▼
	Create a Secure Store target application that implements individual ticket mapping.
	Create a Secure Store target application that implements group mapping.
2	▼
	Create an external content type.
	Create a content type that is based on a Report Builder report.
3	▼
	Configure alternate access mappings.
	Configure Report Server.
	Create an external list.

QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are the SharePoint administrator for a company.

You must provide an on-premises SharePoint solution that helps monitor and analyze your business in order to make informed business decisions that align with the objectives and strategies for the company. The solution must include the

following features:

Dashboards

Scorecards

Key Performance Indicators (KPI)

You configure Delve.

Does the solution meet the goal?

A. Yes

You implement durable links.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 4

In this section, you will see one or more sets of questions with the same scenario and problem.

Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem.

Once you answer a question in this section you will NOT be able to return to it.

As a result, these questions will not appear in the review screen.

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You have an existing SharePoint 2016 on-premises environment.

You are configuring a SharePoint hybrid solution.

You must store all personal sites in Office 365.

You create App Management service, Managed Metadata service, and User Profile service applications.

You grant users the Create Personal Site and Follow People and Edit Profile permissions.

Then, you create an audience for the users that will be redirected to Office 365.

In the SharePoint Central Administration, you configure hybrid OneDrive for Business settings.

Does this solution meet the goal?

A. Yes

B. No

Correct Answer: A

QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage a SharePoint 2016 farm for a company.

You must monitor your environment for performance issues.

You need to enable Developer Dashboard.

You open the SharePoint 2016 Management Shell and run the following commands:

```
$content = ([Microsoft.SharePoint.Administration.SPWebService]::Content-
Service)
$appsetting = $content.DeveloperDashboardSettings
$appsetting.DisplayLevel = [Microsoft.SharePoint.Administration.SPDevel-
operDashboardLevel]::Off
>$appsetting.Update()
```

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B
