**QUESTION 1**

You implement the load balancing solution.

You need to configure the health probes to meet the availability requirements.

Which URL should you configure for the probe?

- A. <https://mail.litware.com/owa/probe.htm>
- B. <https://mail.litware.com/owa/healthcheck.htm>
- C. <http://litware.com/owa/healthcheck.htm>
- D. <http://litware/owa/probe.htm>

Correct Answer: B

QUESTION 2

You have three Hyper-V hosts that each have 20 processor cores and 64 GB of RAM. Nine virtual machines are deployed to the hosts as shown in the following table.

| Virtual machine name | Hyper-V host name | Number of processor cores | Amount of memory (GB) |
|----------------------|-------------------|---------------------------|-----------------------|
| DC1 | Host1 | 4 | 8 |
| FileServer1 | Host1 | 4 | 8 |
| WAP1 | Host1 | 4 | 4 |
| DC2 | Host2 | 4 | 8 |
| SQL1 | Host2 | 12 | 32 |
| ADFS1 | Host2 | 4 | 8 |
| Skype1 | Host3 | 12 | 16 |
| SharePoint1 | Host3 | 12 | 16 |
| SCOM1 | Host3 | 8 | 12 |

Host1 is located in New York, Host2 is located in Los Angeles, and Host3 is located in Denver. None of the virtual machines use dynamic memory.

You plan to deploy a two-node Exchange Server 2016 database availability group (DAG) by using the virtual machines. Each node will have 12 processor cores and 24 GB of memory.

You are evaluating whether you can use the existing servers for the deployment or whether you must purchase additional servers.

You need to recommend where to place the Exchange servers. The solution must minimize costs.

What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. One Exchange server on Host1 and one Exchange server on a new Hyper-V host.
- B. One Exchange server on Host1 and one Exchange server on Host3.
- C. Both Exchange servers on Host1.
- D. One Exchange server on Host1 and one Exchange server on Host2.
- E. One Exchange server on Host2 and one Exchange server on Host3.

Correct Answer: A

First, look at the CPU requirements for Exchange 2016.

"Exchange supports a virtual processor-to-logical processor ratio no greater than 2:1, although we recommend a ratio of 1:1. For example, a dual processor system using quad core processors contains a total of 8 logical processors in the host system. On a system with this configuration, don't allocate more than a total of 16 virtual processors to all guest virtual machines combined." Furthermore, the host operating system also needs 2 processors. source: [https://technet.microsoft.com/en-us/library/jj619301\(v=exchg.160\).aspx](https://technet.microsoft.com/en-us/library/jj619301(v=exchg.160).aspx)

Host 1 uses 12 out of 20 cores Host 2 uses 20 out of 20 cores Host 3 uses 32 out of 20 cores

You need 12 cores, so Host 3 lacks the resources. This leaves hosts 1 and 2.

Now, let's look to the memory requirements:

"...using dynamic memory or memory overcommit features for Exchange isn't supported." source: [https://technet.microsoft.com/en-us/library/jj619301\(v=exchg.160\).aspx](https://technet.microsoft.com/en-us/library/jj619301(v=exchg.160).aspx)

Host 1 uses 20 out of 64 GB Host 2 uses 48 out of 64 GB Host 3 uses 44 out of 64 GB

You need 24 GB for each VM.

Only host 1 has the resources for it.

It is not recommended to put both VM's on one host. So, the answer should be: A.

QUESTION 3

Your company has a data center. The data center contains a server that has Exchange Server 2016 and the Mailbox server role installed. Outlook Anywhere clients connect to the Mailbox server by using the name outlook.contoso.com.

The company plans to open a second data center and to provision a database availability group (DAG) that spans both data centers.

You need to ensure that Outlook Anywhere clients can connect if one of the data centers becomes unavailable.

What should you add to DNS?

- A. one A record
- B. two TXT records
- C. two SRV records
- D. one MX record

Correct Answer: A

References: [https://technet.microsoft.com/en-gb/library/dd638104\(v=exchg.150\).aspx?f=255&MSPPErr=-2147217396](https://technet.microsoft.com/en-gb/library/dd638104(v=exchg.150).aspx?f=255&MSPPErr=-2147217396)

QUESTION 4

HOTSPOT You have an exchange server 2016 organization. The organization contains two servers named EX01 and EX02. Both servers are members of a database availability group (DAG) named DAG01. DAG01 contains two mailbox databases named DB01 and DB02. DB01 and DB02 are replicated to all of the members of DAG01.

| Name | Status | CopyQueue Length | ReplayQueue Length | LastInspectedLogTime | State |
|-----------|--------------------|------------------|--------------------|-----------------------|---------|
| DB01\EX02 | FailedAndSuspended | 906 | 0 | 11/16/2015 9:29:39 AM | Unknown |

You run the Get-MailboxDatabaseCopyStatus cmdlet and you receive the following output. Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the output.

Hot Area:

If you run the [answer choice] cmdlet, only uncopied transaction logs will be copied from EX01 to EX02.

If you run the [answer choice] cmdlet, DB02 will be deleted from EX02 and reseeded from EX01.

Available cmdlets:

- Add-MailboxDatabaseCopy
- Remove-MailboxDatabaseCopy
- Resume-MailboxDatabaseCopy
- Set-MailboxDatabaseCopy
- Update-MailboxDatabaseCopy

Correct Answer:

If you run the [answer choice] cmdlet, only uncopied transaction logs will be copied from EX01 to EX02.

If you run the [answer choice] cmdlet, DB02 will be deleted from EX02 and reseeded from EX01.

The image contains two screenshots of a PowerShell cmdlet list. The top screenshot shows the following cmdlets: Add-MailboxDatabaseCopy, Remove-MailboxDatabaseCopy, Resume-MailboxDatabaseCopy (highlighted), Set-MailboxDatabaseCopy, and Update-MailboxDatabaseCopy. The bottom screenshot shows the same list, but with Update-MailboxDatabaseCopy highlighted.

QUESTION 5

You plan to create a new mailbox for the auditing department.

You need to recommend which task must be performed immediately after the mailbox is created. The solution must meet the compliance requirements.

What should you recommend?

- A. Enable an archive for the new mailbox.
- B. Place the new mailbox on Litigation Hold.
- C. Run the Set-Mailbox cmdlet.
- D. Run the Start-ManagedFolderAssistant cmdlet.

Correct Answer: B
