**QUESTION 1**

You are the Office 365 administrator for your company.

The company recently subscribed to Office 365 ProPlus.

When performing a test deployment, you receive the following error message:

"Windows cannot find \\C:\Program Files\Microsoft Office 15 \clientX64 \integratedOffice. exe\'. Make sure you typed the name correctly, and then try again."

You need to successfully complete the test deployment.

Which two actions can you perform to achieve this goal? Each correct answer presents a complete solution.

- A. Manually remove the registry subkeys associated with Office 2013, and then restart the Office 365 ProPlus installation.
- B. Completely uninstall existing versions of Office 2013 and then restart the Office 365 ProPlus installation.
- C. Download the Office 365 ProPlus package to a file share, and then deploy Office 365 ProPlus by using Group Policy.
- D. Automate the installation of Office 365 ProPlus applications by using Microsoft System Center Configuration Manager

Correct Answer: AB

The answer is A and B because the issue deals with a conflict between Office 365 ProPlus and an existing Office installation. Both A and B could by themselves be a solution. Deploying the installation through Group Policy or SCCM wouldn't make a difference and you would still get the same error.

QUESTION 2

A company deploys an Office 365 tenant. You install the Active Directory Federation Services (AD FS) server role on a server that runs Windows Server 2012. You install and configure the Federation Service Proxy role service. Users sign in

by using the Security Assertion Markup Language (SAML) protocol.

You need to customize the sign-in pages for Office 365.

Which pages should you customize? To answer, drag the appropriate page to the correct customization.

Each page may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

Answer Area	
Customization	ASP.NET Page
Change the list of trusted claims providers that are displayed	
Authenticate users	
Change the overall appearance of all pages	

Correct Answer:

Answer Area	
Customization	ASP.NET Page
Change the list of trusted claims providers that are displayed	HomeRealmDiscovery.aspx
Authenticate users	IdpInitiatedSignOn.aspx
Change the overall appearance of all pages	MasterPage.master

QUESTION 3

A company has an Office 365 tenant. You use the domain contoso.com for both email and session initiation protocol (SIP) addresses. You plan to deploy Skype for Business Online and enable federation for all Skype users.

You need to create a DNS record to support Skype for Business Online federation.

How should you configure the record? To answer, select the appropriate option from each list in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

New Resource Record

Service Location (SRV)

Domain:

Service:

Add the SIP SRV record for Skype for Business Online federation.

1. On the DNS Manager page for your domain, go to **Action** > **Other New Records**.

To find this page for your domain, see [Find your DNS records in Windows-based DNS](#).

2. In the **Resource Record Type** window, choose **Service Location (SRV)**, and then click **Create Record**.

3. In the **New Resource Record** dialog box, make sure that the fields are set to precisely the following values:

- **Service:** `_sipfederationtls`
 - **Protocol:** `_tcp`
 - **Priority:** `100`
 - **Weight:** `1`
 - **Port:** `5061`
 - **Target (Hostname):** `sipfed.online.lync.com`
-

QUESTION 4

You create an Office 365 tenant. You assign administrative roles to other users. You hire a new user named User2.

User2 must NOT be able to change passwords for other users.

You need to assign an administrative role to User2.

Which role should you assign?

- A. Service administrator
- B. Global administrator
- C. Delegate administrator
- D. Password administrator

Correct Answer: A

Being the Service Administrator will allow User2 to manage service requests and monitor service health, while not allowing User2 to ability to change passwords for other users.

QUESTION 5

You manage the Office 365 tenant for Contoso, Ltd.

You need to implement the following requirements for a user named john@contoso.com:

Must use app passwords for mobile Office applications.

Existing apps must continue to work until apps are configured to use app passwords.

Must not experience an interruption in service when using apps that are not browser-based.

How should you complete the Microsoft Azure PowerShell commands? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
