QUESTION 1

You are the system administrator for a small sales company in Chicago.

You must migrate all users to Office 365. You add a domain to the Office 365 tenant.

You need to verify the new domain.

Which type of DNS record should you create?

- A. MX
- B. PTR
- C. CNAME
- D. SRV

Correct Answer: A

QUESTION 2

A company has an Office 365 tenant. You implement two-factor authentication for all users. You hire an employee named User1 to track service usage and status.

User1 must be able to monitor the status of the services over a period of time by using a report. User1 does not have administrator access.

You need to provide a report for User1.

Which report solution should you choose?

- A. downloadable spreadsheet
- B. REST reporting web service
- C. reporting Windows PowerShell cmdlets
- D. Office 365 admin center

Correct Answer: B

The Office 365 Reporting web service enables developers to integrate information on email and spam, antivirus activity, compliance status, and Skype for Business Online activities into their custom service reporting applications and web portals. All the reports available in the admin portal, within the downloadable Microsoft Excel spreadsheets, and those accessed through Windows PowerShell cmdlets, are accessible using the Reporting web service.

QUESTION 3

You are the system administrator for a manufacturing company named Contoso, Ltd. The company has offices in Chicago, Seattle, and Dallas.

Contoso's sales department is located in Chicago. The U department is located in Seattle. The sales and IT departments use Microsoft Exchange Online, SharePoint Online, and OneDrive for Business. All employees in the sales department

are in a group named Sales-Users. Employee user accounts are added and removed manually to this group as needed.

Your Active Directory Domain Services (AD DS) domain is named conto50.com. The domain is synchronized with Contoso's Office 365 tenant using Microsoft Azure Active Directory (Azure AD) Connect.

Contoso purchases a toy manufacturer named Tailspin Toys. All employees are located in Dallas.

Tailspin Toys has an on-premises Exchange Server 2016 for all email in the tailspintoys.com domain. There are plans to migrate the users to Exchange Online.

Business Requirements

Email Security: You need to ensure email security meets the following requirements

Sales users can easily identify email messages as internal only.

Sensitive emails can not be forwarded externally.

Sensitive emails can not be sent to external recipients

Licenses: You need to be able to identify which Tailspin Toys users are licensed.

Support Contracts: Your company does not currently have any Microsoft support contracts.

Skype for Business pilot: You have recently purchased Skype for Business Online licenses and you plan to pilot the service with IT users. You also want to start utilizing dynamic groups for licensing. You have a dynamic group called FS-Users

that contains all users in the FT department.

Technical Requirements:

Single Sign-On (SSO): You have the following requirements for SSO:

Ensure that users receive a phone call or text message as a second form of authentication when accessing Office 365 or on-premises resources.

The domain for federation must be fs.contoso.com.

The solution must support extranet users.

The solution must use Windows Integrated Authentication. ?The solution must support device registration.

The solution must be highly available.

The solution must be secured as much as possible.

Servers: You deploy Active Directory Federation Services (AD FS) and Web Application Proxy (WAP) services using Windows Server 2016. You deploy System Center Configuration Manager (SCCM) and System Center

Operations Manager (SCOM) in the contoso.com domain.

Monitoring: You need to be able to monitor and identify issues in the Office 365 environment.

Pilot: You plan to use a group of 25 Tailspin Toys users to test the functionality of Exchange Online. If the pilot is successful, you must migrate all other users to Exchange Online.

Tailspin Toys users must meet the following requirements:

Must not exist in an on-premises Active Directory.

The usernames must be unique.

Display names can be unique.

The tenants for tailspintoys.com and contoso.com must be separate.

Passwords must expire after 365 days.

Must receive a notification 14 days before passwords expire.

Issues: User1 is one of the pilot users for Tailspin toys. User1 reports that Outlook prompts them to enter credentials. You confirm that the employee is using the correct password. You run the Microsoft Support and Recovery Assistant for

Office 365. The tool does not identify any issues.

You need to resolve the issue for User1. What should you do?

- A. Open a service request in the Office 365 admin center.
- B. Create a new ticket with Microsoft Premier Support.
- C. Reset the account password for the user.
- D. Run the Office 365 Client Performance Analyzer.

Correct Answer: D

QUESTION 4

A company plans to synchronize users in an existing Active Directory organizational unit with Office 365.

You must configure the Azure Active Directory Connect with password sync. You need to ensure that the service account has the minimum level of permissions required.

Which two permission levels should you assign to the account for each task? To answer, select the appropriate permission level from each list in the answer area.

Hot Area:

Task	Permission Level
Password Write-Back	<div>Full Control</div> <div>Reset Password</div>
	<div>Create Child</div> <div>Create Password</div>
Password synchronization	<div>Replicating Directory Changes</div> <div>Manage Replication Topology</div>
	<div>Replicating Directory Changes All</div> <div>Replication Directory Changes in Filtered Set</div>

Correct Answer:

Task	Permission Level
Password Write-Back	<div>Full Control</div> <div>Reset Password</div>
	<div>Create Child</div> <div>Create Password</div>
Password synchronization	<div>Replicating Directory Changes</div> <div>Manage Replication Topology</div>
	<div>Replicating Directory Changes All</div> <div>Replication Directory Changes in Filtered Set</div>

QUESTION 5

Your company has a hybrid deployment of Office 365.

You need to identify which certificate is used for token signing between the on-premises environment and Office 365.

Which tool should you use?

- A. the Exchange Management Console
- B. the AD FS 2.0 Management console
- C. the Active Directory Domains and Trusts snap-in
- D. the Office 365 portal
- E. the Certificates snap-in

Correct Answer: B
