QUESTION 1

An organization has an Office 365 tenant and uses an Enterprise E3 subscription. You enable licenses for 1,000 users.

You must implement a file sync service for users that meets the following requirements:

Users must be able to sync offline versions of all files to local computers.

The organization must be able to manage permissions for all files.

You need to recommend a solution.

Which solution should you recommend?

A. Microsoft Storage Spaces

B. SharePoint document libraries

C. Windows offline files

D. Distributed File System Replication

E. Office Delve

F. OneDrive

Correct Answer: B

You can work offline and sync within a SharePoint document library. The document library permissions can be managed by the organization.

QUESTION 2

You administer 100 client devices that run Windows 10. Users do not have local administrator permissions to the devices. You need to deploy Office 365 ProPlus to all client devices while minimizing Internet bandwidth consumption and costs. What should you use?

A. An MSI installer and an Active Directory Group Policy

B. An MSI installer and Microsoft Operations Management Suite (OMS)

C. An MSI installer and System Center Configuration Manager (SCCM)

D. A Click-to-Run installer from a network share

Correct Answer: C

QUESTION 3

You are the Office 365 administrator for a company. All client devices run Office 365 ProPlus and Visio Pro for Office 365.

You must implement an update process for the Office 365 products. The process must meet the following requirements:

Provide the most up-to-date version of the Office applications.

Allow IT administrators to test updates before the updates are made available to end users.

You need to implement update channels for each of the products lines and user groups.

Which update channels should you use? To answer, select the appropriate options in the dialog box in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Video Pro for Office 365	▼
	Semi-Annual Channel
	Semi-Annual Channel (Targeted)
	Monthly Channel

Office 365 ProPlus	▼
	Semi-Annual Channel
	Semi-Annual Channel (Targeted)
	Monthly Channel

IT Administrator Office 365 ProPlus	▼
	Semi-Annual Channel
	Semi-Annual Channel (Targeted)
	Monthly Channel

Correct Answer:

Video Pro for Office 365	▼
	Semi-Annual Channel
	Semi-Annual Channel (Targeted)
	Monthly Channel

Office 365 ProPlus	▼
	Semi-Annual Channel
	Semi-Annual Channel (Targeted)
	Monthly Channel

IT Administrator Office 365 ProPlus	▼
	Semi-Annual Channel
	Semi-Annual Channel (Targeted)
	Monthly Channel

The Monthly Channel provides the users with the newest features of Office as soon as they\'re available. The Semi-Annual Channel (Targeted) provides pilot users and application compatibility testers the opportunity to test the next Semi-Annual Channel.

QUESTION 4

You administer Office 365 for a company. You implement Microsoft Exchange Online Protection.

You identify the following requirements for the antimalware policy:

Block attachments with certain file extensions.

Allow a message to be delivered while an unknown attachment is scanned.

Prevent users from clicking an unsafe URL that is contained in a message.

You need to configure Exchange Online Protection.

Which settings or policies should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Block attachments

▼
Safe list aggregation
Safe attachments policy
Transport rule
Safe links policy

Allow message delivery while attachment is scanned

▼
Safe list aggregation
Safe attachments policy
Transport rule
Safe links policy

Prevent clicking of unsafe URL

▼
Safe list aggregation
Safe attachments policy
Transport rule
Safe links policy

Correct Answer:

Block attachments	▼
Safe list aggregation
Safe attachments policy
Transport rule
Safe links policy

Allow message delivery while attachment is scanned	▼
Safe list aggregation
Safe attachments policy
Transport rule
Safe links policy

Prevent clicking of unsafe URL	▼
Safe list aggregation
Safe attachments policy
Transport rule
Safe links policy

Box 1: Safe attachments policy

The ATP Safe Attachments feature checks to see if email attachments are malicious, and then takes action to protect your organization.

Box 2: Safe attachments policy

When you set up ATP Safe Attachments policies in Office 365, you can choose from several options, such as Block, Replace, and Dynamic Delivery.

The dynamic delivery option eliminates email delays by sending the body of an email message through with a placeholder for each email attachment. The placeholder remains until the attachment is scanned by ATP Safe Attachments in

Office 365. Email recipients can read and respond to their email messages right away, knowing that their attachments are being analyzed.

Box 3: Safe Link policy

ATP Safe Links in email

At a high level, here\'s how ATP Safe Links protection works for URLs in email (hosted in Office 365, not on-premises):

People receive email messages that contain URLs.

All email goes through Exchange Online Protection, where IP and envelope filters, signature-based malware protection,

anti-spam and anti-malware filters are applied.

Email arrives in people\\'s inboxes.

A user signs in to Office 365, and goes to their email inbox.

The user opens an email message, and then clicks on a URL in the email message.

The ATP Safe Links feature immediately checks the URL before opening the website. The URL is identified as blocked, malicious, or safe

QUESTION 5

You are the Office 365 administrator for a company.

You need to set the default storage limit for all Microsoft OneDrive for Business users to 2 terabytes (TB).

What should you do?

A. On the Microsoft SharePoint admin center Settings page, configure settings for the OneDrive for Business experience web interface.

B. Run the Windows PowerShell command Set-SPOSite –StorageQuota 2000.

C. Run the Windows PowerShell command Set-SPOTenant –OneDriveStorageQuota 2 TB.

D. Run the Windows PowerShell command Set-SPOTenant –OneDriveStorageQuota 2097152.

Correct Answer: D

The Set-SPOTenant –OneDriveStorageQuota cmdlet is used to set new default quota which will be applied automatically to all new users. Incorrect Answers:

A: Microsoft SharePoint admin center Settings page does not include quota settings.

B: The Set-SPOSite –StorageQuota cmdlet sets the quota limit for existing users. It does not set the default quota limit.

C: The Set-SPOTenant –OneDriveStorageQuota cmdlet is used to set new default quota in megabytes (MB), not terabytes (TB).
