**QUESTION 1**

You are an Office 365 migration consultant. Your company has been hired to migrate the legacy email solution of another company to Office 365.

You are creating a migration plan for the two scenarios shown in the following table.

Scenario	Desktop operating system	Current Office version
1	Windows 7 with Service Pack 1	Office 2010
2	Windows 7	Office 365 ProPlus

You need to evaluate whether the client computer software supports Office 365.

Which software requires action? To answer, drag the appropriate status to each target in the scenario table. Each status may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content

Select and Place:

Meets requirements

Operating system update required

Office update required

Answer Area

Scenario	Operating system status	Office status
1		
2		

Correct Answer:

Meets requirements

Operating system update required

Office update required

Answer Area

Scenario	Operating system status	Office status
1	Meets requirements	Office update required
2	Operating system update required	Meets requirements

Office 365 is designed to work with any version of Microsoft Office in mainstream support, which excludes Office 2010. You have to upgrade Office 2010 prior to the migration. The only requirement with regards to the operating system is that

the operating system you use must be supported by its manufacturer. All versions of Windows 7 are still supported by Microsoft.

**QUESTION 2**

You are the Office 365 administrator for your company. All users have been assigned E3 licenses and use Office Web Apps to create and edit documents.

A user attempts to access documents stored on a USB flash drive. When the user double-clicks a file that is stored on the USB flash drive, an error message states that Windows can't open the file and needs to know what program to use to

open it.

You need to ensure that the user can start Office applications and edit Office documents by double-clicking files.

What should you do on the user's computer?

- A. Use Office on Demand.
- B. Install Office 365 ProPlus from the Office 365 portal.
- C. Copy the files from the USB flash drive to the local hard drive.
- D. Install and configure Microsoft Word Viewer.

Correct Answer: B

You can deploy Office 365 ProPlus in your organization by allowing users to install Office 365 ProPlus directly from the Office 365 portal, or by downloading the Office 365 ProPlus software to the local network and then deploying it to your users.

---

**QUESTION 3**

You are the Office 365 administrator for your company.

The company uses Microsoft Lync Online and wants to customize Lync meeting invitations.

You need to identify the URLs that may NOT be changed on the Lync meeting invitations from the Lync admin center.

Which two URLs may NOT be changed? Each correct answer presents part of the solution.

- A. Help URL
- B. Company URL
- C. Meeting URL
- D. Legal URL
- E. Logo URL

Correct Answer: BC

You can customize meeting invitations sent by the Online Meeting Add-in for Lync 2013 by including the following optional items in the body of the meeting invitation:

Note:

To Customize the Meeting Invitation by using Lync Server Control Panel

#### QUESTION 4

You are the Office 365 administrator for your company. The company's environment includes only Office 2013 and Windows 8.

Users are not allowed to install applications on client computers.

You need to enable Office Telemetry logging.

What should you do?

- A. In Group Policy, enable logging in the User Configuration\Administrative Templates\Microsoft Office 2013\Telemetry Dashboard node.
- B. Create a .reg file that sets the registry values under the HKEY\_CURRENT\_USER\Software\Policies\Microsoft\Office\15.0\OSM key to enable the Telemetry Agent to collect and upload data. Run the .reg file with standard privileges.
- C. In Group Policy, enable logging in the User Configuration\Administrative Templates\Microsoft Office 2013\Telemetry logging node.
- D. Create a .reg file that sets the registry values under the HKEY\_LOCAL\_MACHINE\Software\Microsoft\Office\15.0 key to enable Telemetry Agent to collect and upload data. Run the .reg file with standard privileges.

Correct Answer: A

The Telemetry Agent must be enabled using Group Policy or the registry. For production environments that contain hundreds or thousands of client computers, you can use Group Policy administrative templates.

You can use Group Policy to enable and configure Telemetry Agents. Download the Group Policy administrative template files from the Microsoft Download Center. The policy settings are available in the path User Configuration\Administrative Templates\Microsoft Office 2013\Telemetry Dashboard.
