QUESTION 2

You use a Windows 8.1 tablet. The tablet receives Windows Update updates automatically from the Internet.

The tablet has Wi-Fi and is connected to a 3G mobile broadband Wi-Fi hot spot.

You need to minimize data usage while connected to this hot spot.

What should you do?

A. Turn on Airplane Mode.

B. Disable File and Print Sharing for mobile broadband connections.

C. Configure the interface metric of IP settings for Wi-Fi connection as1.

D. Edit the Inbound Rule of Windows Firewall, and then disable Internet Control Message Protocol (ICMP) traffic.

E. Configure the broadband connection as a metered network.

Correct Answer: E

You can limit the bandwidth used by the broadband connection by configuring it as a metered network. A metered network is a network where data downloaded is `metered\\'(measured) and you are charged for the amount of data downloaded.

Setting a connection as metered prevents Windows from automatically using bandwidth in a number of ways including the following:

Disables automatic downloading of Windows updates: Windows won\\'t automatically download updates from Windows Update on metered Internet connections. You\\'ll get a "Download" button you can click whenever you want to install

updates. Disables automatic downloading of app updates: The Windows Store won\\'t automatically download updates for your installed "Store apps" on metered connections, either. Desktop apps like Chrome, Firefox, and others will continue

updating themselves normally. Tiles may not update: Microsoft says that the live tiles on your Start menu or Start screen "may" stop updating on a metered connection:
