QUESTION 1

DRAG DROP

You have a desktop computer and a tablet that both run Windows 10 Enterprise.

The desktop computer is located at your workplace and is a member of an Active Directory domain. The network contains an Application Virtualization (App-V) infrastructure. Several App-V applications are deployed to all desktop computers.

The tablet is located at your home and is a member of a workgroup. Both locations have Internet connectivity.

You need to be able to access all applications that run on the desktop computer from you tablet.

Which actions should you perform on each computer? To answer, drag the appropriate action to the correct computer. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

Actions

Enabe Remote Desktop.

Enabe Remote Assistance.

Install Client Hyper-V.

Install the Application Virtualization (App-V) Client.

Deploy Application Virtualization (App-V) packages.

Run the Remote Desktop Client.

Answer Area

desktop computer — Action

tablet — Action

Correct Answer:

Actions

Enable Remote Assistance.

Install Client Hyper-V.

Install the Application Virtualization (App-V) Client.

Deploy Application Virtualization (App-V) packages.

Answer Area

desktop computer — Enable Remote Desktop.

tablet — Run the Remote Desktop Client.

You can connect to your work computer by using Remote Desktop. You first need to enable Remote Desktop on the work computer. You then run the Remote Desktop Client on the home computer to connect to the work computer.

With Remote Desktop Connection, you can connect to a computer running Windows from another computer running Windows that\\'s connected to the same network or to the Internet. For example, you can use all of your work computer\\'s programs, files, and network resources from your home computer, and it\\'s just like you\\'re sitting in front of your computer at work.

To connect to a remote computer, that computer must be turned on, it must have a network connection, Remote Desktop must be enabled, you must have network access to the remote computer (this could be through the Internet), and you must have permission to connect. For permission to connect, you must be on the list of users. Before you start a connection, it\\'s a good idea to look up the name of the computer you\\'re connecting to and to make sure Remote Desktop connections are allowed through its firewall.

QUESTION 2

HOTSPOT

A bank deploys Active Directory Rights Management Services (AD RMS). The bank plans to migrate to Azure Rights Management Services (Azure RMS) as an alternative to the on- premises based AD RMS.
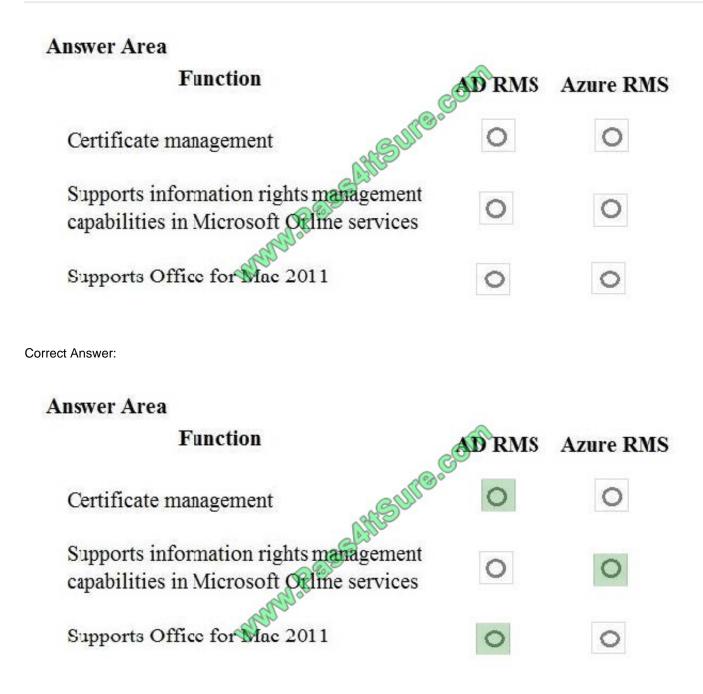

The bank must follow regulatory policies that restrict access to certain financial documents.

In the table below, identify which function each platform supports.

NOTE: Make only selection in each column. Each correct selection is worth one point.

Hot Area:

Answer Area

Function	AD RMS	Azure RMS
Certificate management	◯	◯
Supports information rights management capabilities in Microsoft Online services	◯	◯
Supports Office for Mac 2011	◯	◯

Correct Answer:

Answer Area

Function	AD RMS	Azure RMS
Certificate management	◉	◯
Supports information rights management capabilities in Microsoft Online services	◯	◉
Supports Office for Mac 2011	◉	◯

QUESTION 4

A Sales department user overwrites a version of a Word document on their device.

You need to configure synchronization.

Which actions should you perform?

A. Install Azure AD Connect

B. On Server2, install the Azure Active Directory Synchronization tool with password sync.

C. On Server1, install Active Directory Federation Services (AD FS). On Server2, install an Active Directory Federation Services (AD FS) Proxy Server.

D. On Server1, install the Azure Active Directory Synchronization tool with password sync.

E. On Server1, install an Active Directory Federation Services (AD FS) Proxy server. On Server2, install Active Directory Federation Services (AD FS).

Correct Answer: AE

From case study: You need to implement synchronization between the on-premises AD DS domain and the Office 365 environment. The solution must use the latest supported Microsoft technologies.

Incorrect ANswers

B, D: Azure Active Directory Synchronization tool is the old tool. It has been replaced with Azure AD Connect.

C: AD FS proxy goes on the server with Internet access.

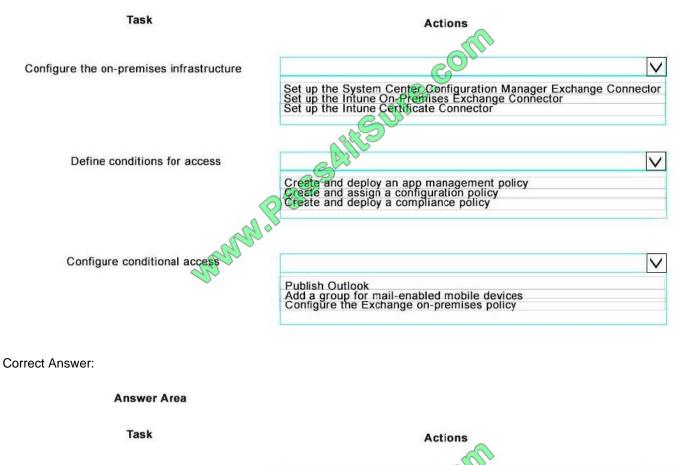

QUESTION 5

HOTSPOT

Overview

You need to configure email access for the Engineering department users.

What should you do? To answer, select the appropriate action from each list in the answer area.

Hot Area:

Answer Area

Task	Actions
Configure the on-premises infrastructure	⌄
	Set up the System Center Configuration Manager Exchange Connector Set up the Intune On-Premises Exchange Connector Set up the Intune Certificate Connector
Define conditions for access	⌄
	Create and deploy an app management policy Create and assign a configuration policy Create and deploy a compliance policy
Configure conditional access	⌄
	Publish Outlook Add a group for mail-enabled mobile devices Configure the Exchange on-premises policy

Correct Answer:

Answer Area

Task	Actions
Configure the on-premises infrastructure	⌄
	Set up the System Center Configuration Manager Exchange Connector Set up the Intune On-Premises Exchange Connector Set up the Intune Certificate Connector
Define conditions for access	⌄
