**QUESTION 1****DRAG DROP**

A company plans to upgrade all devices from Windows 7 to Windows 10. All Windows 10 devices belong to an organizational unit (OU) named Desktops. All devices for users in the sales department are enrolled in Azure Active Directory

(AD). All users belong to an OU named Employees.

Users in the finance department must not be able to modify the power policy settings.

You need to apply the power policy.

What should you do? To answer, drag the appropriate option to the correct item. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

Options	Answer Area								
	<table><thead><tr><th>Item</th><th>Option</th></tr></thead><tbody><tr><td>Policy type</td><td><input type="text"/></td></tr><tr><td>Directory</td><td><input type="text"/></td></tr><tr><td>Target OU</td><td><input type="text"/></td></tr></tbody></table>	Item	Option	Policy type	<input type="text"/>	Directory	<input type="text"/>	Target OU	<input type="text"/>
Item	Option								
Policy type	<input type="text"/>								
Directory	<input type="text"/>								
Target OU	<input type="text"/>								
Active Directory									
Azure AD									
Computer-based group policy									
Desktops OU									
Employees OU									
User-based group policy									

Correct Answer:

Options	Answer Area
	Item
	Policy type
Azure AD	Directory
	Target OU
Employees OU	
User-based group policy	

Option
Computer-based group policy
Active Directory
Desktops OU

## QUESTION 2

You have a Windows 10 Enterprise computer named Computer1. Computer1 has File History enabled.

You create a folder named Folder1 in the root of the C: drive.

You need to ensure that Folder1 is protected by File History. What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

- A. From File Explorer, include Folder1 in an existing library.
- B. Modify the Advanced settings from the FileHistory Control Panel item.
- C. From the Settings app, modify the Backup options.
- D. From File Explorer, modify the system attribute of Folder1.

Correct Answer: AC

By default, File History backs up all libraries. We can therefore ensure that Folder1 is protected by File History by adding the folder to a library. The second method of ensuring that Folder1 is protected by File History is to add the folder location to File History. You do this by modifying the Backup options, not the File History Control Panel item as you might expect. In the Settings app, select Update and Security then Backup. Under the Back up using File History heading, select the Add a drive option.

## QUESTION 3

A Sales department user overwrites a version of a Word document on their device.

You need to configure access for the contractors.

Which two actions should you perform? Each correct answer presents part of the solution.

- A. Store the BitLocker recovery keys in the contoso.com domain.
- B. Create a Microsoft account for each contractor.
- C. Store the BitLocker recovery keys in OneDrive.
- D. Join the contractors\\' devices to the contoso.com Active Directory Domain Services (AD DS) domain.
- E. Create Active Directory Domain Services (AD DS) domain user accounts for each contractor.

Correct Answer: BC

---

#### QUESTION 4

##### DRAG DROP

Your organization is deploying new Windows 10 devices. You create a new organizational unit that contains all Windows 10 devices.

You are preparing a new security policy for Windows 10 devices. Your organization requires audits on the use of removable storage devices on personal devices.

You need to enable audits of removable storage.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

### Answer Area

#### Actions

Enable and configure the Audit Removable Storage policy within Advanced Audit Policies Configuration.

Enable and configure the Audit File System within Advanced Audit Policies Configuration.

Create a new Group Policy Object for Windows 10 users and include User Configurations.

Link the Windows 10 device Group Policy Object to the Windows 10 Device organizational unit.

Create a new Group Policy Object for Windows 10 devices and include Computer Configurations.

#### Sequence

Correct Answer:

**Answer Area**

Actions	Sequence
	Create a new Group Policy Object for Windows 10 devices and include Computer Configurations.
Enable and configure the Audit File System within Advanced Audit Policies Configuration.	Enable and configure the Audit Removable Storage policy within Advanced Audit Policies Configuration.
Create a new Group Policy Object for Windows 10 users and include User Configurations.	Link the Windows 10 device Group Policy Object to the Windows 10 Device organizational unit.

Navigation icons: Right arrow, Left arrow, Up arrow, Down arrow.

**QUESTION 5**

A company deploys Outlook to all users that have iOS and Android devices. The company uses Microsoft Intune to manage mobile devices. You enforce a conditional access policy that requires users to enroll devices in Intune before they

can access Exchange ActiveSync data.

Some Android and iOS users access Exchange ActiveSync data by using unmanaged email applications.

You need to ensure that users Exchange ActiveSync data only from Outlook.

What should you do?

- A. Create an Exchange access rule. Select Outlook family and Outlook for Android and iOS as the model.
- B. In Intune, create a new compliance policy that forces email accounts to be managed by Intune.
- C. Create a security group for all users that are not using Outlook as the email applications. Configure Exchange Online conditional access policy to exempt members of the group.

D. Configure a custom Open Mobile Alliance Uniform Resource Identifier setting and deploy the setting to all users.

Correct Answer: A
