**QUESTION 1**

You manage a server infrastructure for a software development company. There are 30 physical servers distributed across 4 subnets, and one Microsoft Hyper-V cluster that can run up to 100 virtual machines (VMs). You configure the servers to receive the IP address from a DHCP server named SERVER1 that runs Microsoft Windows Server 2012 R2. You assign a 30-day duration to all DHCP leases.

Developers create VMs in the environment to test new software. They may create VMs several times each week.

Developers report that some new VMs cannot acquire IP address. You observe that the DHCP scope is full and delete non-existent devices manually. All physical servers must keep their current DHCP lease configuration.

You need to ensure that the DHCP lease duration for VMs is 8 hours.

What should you configure?

- A. 4 server-level Allow filters
- B. 1 server-level DHCP policy
- C. 1 scope-level DHCP policy
- D. 4 scope-level exclusion ranges

Correct Answer: B

QUESTION 2

You have an IP Address Management (IPAM) server that runs Windows Server 2012 SP1. You need to integrate the IPAM server with System Center Virtual Machine Manager (SCVMM). Solution: You create a dedicated user account named IPAM_svc, and add it to the Local Administrators local group on the SCVMM server.

- A. Yes
- B. No

Correct Answer: B

QUESTION 3

You need to recommend a solution for GPO1.

What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. In west.northwindtraders.com, create a copy of GPO1 and link the new GPO to Site2. Apply a WMI filter to the new GPO.

B. In west.northwindtraders.com, create a copy of GPO1 and link the new GPO to west.northwindtraders.com. Configure security filtering on the new GPO.

C. Link GPO1 to west.northwindtraders.com and configure security filtering on GPO1.

D. Link GPO1 to Site2 and apply a WMI filter to GPO1.

Correct Answer: D

*

Scenario:

The northwindtraders.com domain contains a Group Policy object (GPO) named GPO1. GP01 is applied to all of the users in the Montreal office.

Apply GPO1 to all of the San Diego users.

GPO1 must not be applied to computers that run Windows 8.1.

*

WM Filter for Operating Systems. Example:

Windows 8.1 64 bit

```
SELECT version FROM Win32_OperatingSystem WHERE Version LIKE "6.3%" and ProductType = "1" AND OSArchitecture = "64-bit"
```

QUESTION 4

You have a System Center 2012 R2 Virtual Machine Manager (VMM) infrastructure that manages five Hyper-V hosts. The Hyper-V hosts are not clustered.

You have a virtual machine template that deploys a base image of Windows Server 2012 R2. No role services or features are enabled in the base image.

You need to deploy a virtual machine named VM1 that is based on the virtual machine template.

VM1 will be deployed as part of a service. VM1 must have the Web Server (IIS) server role installed. The solution must not require modifications to the virtual machine template or the base image.

What are two possible profile types that achieve the goal? Each correct answer presents a complete solution.

A. Capability

B. Application

C. Guest OS

D. Hardware

E. Physical Computer

Correct Answer: AC

A: In Capability, you must select a capability profile that is supported by the private cloud.

C: guest OS profile

* define Windows Operating System specialization values for the virtual machine.

*On the Configure Operating System page, configure the guest operating system settings. If you have an existing guest operating system profile that you want to use, in the Guest OS profile list, click the guest operating system profile that you

want to use. After you configure the guest operating system settings, click Next.

QUESTION 5

You need to plan for renaming the Madrid.LeyburnInv.com to Barcelona.LeyburnInv.com.

Which tool should you use to automatically correct any severed Group Policy links and invalid UNC paths in GPOs in the renamed domain?

A. Rendom.exe

B. Gpupdate.exe

C. Gpfixup.exe

D. Dcgpofix.exe

Correct Answer: C
