**QUESTION 1**

Your network contains an Active Directory domain named adatum.com. The domain contains a server named Server1 that runs Windows Server 2012.

You need to prevent all of the applications that run on Server1 from running code from non-executable memory regions.

What should you do?

- A. From the local Group Policy, create an application control policy.
- B. From BCDEdit, modify the Data Execution Prevention (DEP) settings.
- C. From Windows PowerShell, run the Set-ExecutionPolicy cmdlet.
- D. From the local Group Policy, create a software restriction policy.

Correct Answer: B

---

**QUESTION 2**

Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that has the Remote Desktop Licensing role service installed.

Server1 fails.

You discover that all of the backups for Server1 are unavailable. You deploy a new server named Server2. You install the Remote Desktop Licensing role service on Server2.

You need to rebuild the Remote Desktop Licensing (RD Licensing) database on Server2.

Which tool should you use?

- A. Server Manager
- B. The Add-RDLicense cmdlet
- C. The RD Licensing Diagnoser
- D. Remote Desktop Licensing Manager

Correct Answer: D

To rebuild the RD Licensing database automatically

1. On the source server, open Remote Desktop Licensing Manager. To open Remote Desktop Licensing Manager, click Start, point to Administrative Tools, point to Remote Desktop Services, and then click Remote Desktop License

**QUESTION 3**

Your network contains an Active Directory domain named contoso.com. The domain has Remote Desktop Services (RDS) deployed. A technician publishes 10 line-of-business applications and 10 productivity applications as RemoteApp programs.

You need to ensure that the RemoteApp programs are organized in two separate categories on the Remote Desktop Web Access (RD Web Access) site.

- A. The Web.config file of the RD Web Access site
- B. The Directory Browsing settings of the RD Web Access site
- C. The list of RemoteApp program folders in the properties of the RemoteApp programs
- D. The User Assignment settings of the RemoteApp programs

Correct Answer: C

---

**QUESTION 4**

Your network contains an Active Directory domain named contoso.com. You need to recommend an application distribution strategy to meet the following requirements:

Enable client computers to use different versions of the same application. Minimize the amount of hardware resources used on the client computers.

- A. Install the applications on Remote Desktop Services (RDS) servers, and then publish the applications as RemoteApp programs.
- B. Create a Windows Installer package for each application, and then deploy the packages by using a Group Policy object (GPO).
- C. Create a Windows Installer package for each application, and then deploy the packages by using Microsoft System Center 2012 Configuration Manager.
- D. Sequence the applications by using the Microsoft Application Virtualization (App-V) Sequencer, and then deploy the applications by using App-V streaming.

Correct Answer: A

---

**QUESTION 5**

You deploy a Remote Desktop Services (RDS) collection.

You plan to provide users with access to Microsoft Application Virtualization (App-V) applications by using Remote Desktop connections.

You publish several applications to an App-V publishing server.

You need to recommend a solution to minimize the amount of storage space required on the RDS servers for the App-V applications. The solution must minimize the amount of time it takes for users to open the App-V applications.

What four actions should you perform? To answer, move the four appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Install the App-V for Remote Desktop Services Client on all of the Remote Desktop Session Host (RD Session Host) servers and modify the registry settings of the servers.	
Log on to a staging computer and stream all of the required applications.	
Configure the Remote Desktop Session Host (RD Session Host) servers to use the publishing server and to use publishing dates.	
Copy the cache file to a central location.	
Restart the staging computer in safe mode.	

Correct Answer:

Actions	Answer Area
	Install the App-V for Remote Desktop Services Client on all of the Remote Desktop Session Host (RD Session Host) servers and modify the registry settings of the servers.
	Log on to a staging computer and stream all of the required applications.
Configure the Remote Desktop Session Host (RD Session Host) servers to use the publishing server and to use publishing dates.	Restart the staging computer in safe mode.
	Copy the cache file to a central location.
