### QUESTION 1

Your company has a main office and 10 branch offices. Each branch office connects to the main office by using a low-bandwidth WAN link.

All servers run Windows Server 2012. All client computers run Windows 8.

You plan to deploy 20 new line-of-business applications to all of the client computers.

You purchase 5,000 client licenses for the line-of-business applications.

You need to recommend an application distribution solution. The solution must be able to meet the following requirements:

Download application installation files from a server in the local site. Generate reports that contain information about the installed applications. Generate administrative alerts when the number of installed applications exceeds the number of purchased licenses.

What should you include in the recommendation? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Applications published as RemoteApp programs
- B. Assigned applications by using Group Policy objects (GPOs)
- C. Applications deployed by using Microsoft System Center 2012 Configuration Manager
- D. Published applications by using Microsoft Application Virtualization (App-V) publishing servers

Correct Answer: C

### QUESTION 2

Your network contains an Active Directory domain named contoso.com. The domain contains a Remote Desktop Services (RDS) deployment. The deployment contains three servers. The servers are configured as shown in the following table.

Server name	Roleservice
Server1	Remote Desktop Connection Broker
Server2	Remote Desktop Session Host
Server3	Remote Desktop Web Access

You publish multiple RemoteApp programs in a collection named Collection1. You need to ensure that users can view the RemoteApp programs published to them from the Start screen.

What should you do?

- A. From a Group Policy object (GPO), set the default connection URL of RemoteApp and Desktop Connections to `https:// server2.contoso.com/rdweb/collection1`.
- B. In the contoso.com zone, create a text (TXT) record that contains `https://server3.contoso.com/rdweb/ feed` in the Text field.
- C. From a Group Policy object (GPO), set the default connection URL of RemoteApp and Desktop Connections to `https:// Server1.contoso.com/rdweb/feed`.
- D. In the contoso.com zone, create a text (TXT) record that contains `https://collection1.contoso.com/ rdweb/feed` in the Text field.

Correct Answer: A

Note:

\*

In Windows Server 2012, you can either publish the RemoteApps on the Remote Desktop Session Host server (RDSH) (here on Server2) or you can publish the fu

\*

Example:

To enable the default connection URL using Group Policy

1.

Log on to the domain controller as the CORP\Administrator user account.

2.

On the domain controller, open Group Policy Management. Click Start, type Group Policy Management, and then click Group Policy Management..

3.

Expand Forest: corp.contoso.com, and expand Domains, and then expand corp.contoso.com.

4.

Right-click Default Domain Policy, and then click Edit.

5.

Navigate to User Configuration -> Policies ->Administrative Templates -> Windows Components -> Remote Desktop Services -> RemoteApp and Desktop Connections.

6.

Double-click Specify Default Connection URL, and then click Enabled.

7.

In the Default Connection URL box, type `https://RDWA1.corp.contoso.com/RDWeb`.

8.

Click OK.

### QUESTION 3

Your network contains an Active Directory domain named contoso.com.

You deploy Remote Desktop Services (RDS) and publish multiple RemoteApp programs. You need to ensure that users can subscribe to the RemoteApp and Desktop Connections feed by using their email address.

Which resource record type should you add to the DNS zone? To answer, select the appropriate resource record type in the answer area.

Hot Area:

Correct Answer:

<http://technet.microsoft.com/en-us/library/hh831442.aspx>

To configure DNS feed lookup for RemoteApp and Desktop Connection Log on to the domain controller as the CORP\Administrator user account. On the domain controller, open DNS Manager. Click Start, type DNS, and then click DNS.

Right-click the forward lookup zone where you want to create the TXT record, and then click Other New Records.

Click Text (TXT), and then click Create Record.

In the Record name (use parent domain if left blank) box, type `_msradc`. In the Text box, type `https://RDWA1.corp.contoso.com/RDWeb/Feed`.

Click OK.

#### QUESTION 4

You need to configure the virtual desktops for the Miami office users. The solution must meet the technical requirements. What should you create?

- A. An unmanaged personal virtual desktop collection
- B. An unmanaged pooled virtual desktop collection
- C. A managed pooled virtual desktop collection

D. A managed personal virtual desktop collection

Correct Answer: C

### QUESTION 5

Your network contains an Active Directory domain. The domain contains servers that run Windows Server 2012 and client computers that run Windows 8.

You have three applications named App1, App2, and App3. App1 and App2 can run on Windows 8. App3 can run only on Windows XP.

You need to recommend application deployment solutions that meet the following requirements:

App1 must be installed on all of the client computers in the domain automatically when the client computers restart.

App2 must be installed only when a user executes a .xyz file. App3 must be available on all of the client computers.

Which application deployment solution should you recommend for each application? To answer, drag the appropriate solution to the correct application in the answer area. Each solution may be used once, more than once, or not at all.

Additionally, you may need to drag the split bar between panes or scroll to view content.

Select and Place:

Solutions	Answer Area
Assign the application by using a Group Policy.	App1 Solution
Publish the application by using a Group Policy.	App2 Solution
Publish the application as a RemoteApp program.	App3 Solution
Deploy the application on a virtual machine on each client computer.	

Correct Answer:

Solutions	Answer Area
	App1 Assign the application by using a Group Policy.
	App2 Publish the application by using a Group Policy.
Publish the application as a RemoteApp program.	App3 Deploy the application on a virtual machine on each client computer.
