QUESTION 1

Your network contains an Active Directory domain named contoso.com. The domain contains client computers that run Windows 7 Enterprise and Windows 8 Enterprise.

Your company identifies the desktop security requirements shown in the following table.

User group name	Software restriction
Group1	Group members must be prevented from running Windows Installer files that originate from Restricted sites.
Group2	Group members must be prevented from running Windows Installer files that originate from Trusted sites.
Group3	Group members must be prevented from running executables located in C:\Temp.
Group4	Group members must be prevented from running executables located in C:\Software.
Group5	Group members must be prevented from running executables located in C:\Temp.
Group6	Group members must be prevented from running executables located in C:\Software.

You need to recommend the number of Group Policy objects (GPOs) that must be created to meet the desktop security requirements.

The solution must use the least amount of GPOs.

How many group policy objects should you recommend? More than one answer choice may achieve the goal. Select the BEST answer.

- A. 1
- B. 2
- C. 3
- D. 6

Correct Answer: C

QUESTION 2

You virtualize App5 and App6.

You need to ensure that App5 and App6 meet the application requirements.

What should you do?

- A. From the Application Virtualization Management Console, add a connection group.
- B. From the Application Virtualization Management Console, upgrade the packages.
- C. From the Microsoft Application Virtualization Sequencer, modify the Properties settings of App5 and App6.
- D. From the Microsoft Application Virtualization Sequencer, modify the Deployment settings of App5 and App6.

Correct Answer: A

<http://blogs.technet.com/b/appv/archive/2012/11/06/deploying-connection-groups-app-v-5-0.aspx>

QUESTION 3

You have a Microsoft Application Virtualization (App-V) publishing server named Server1. Some users connect to the network by using a cellular connection.

You need to prevent the users from downloading App-V packages the first time they run the application that is associated to the package.

What should you do? More than one answer choice may achieve the goal. Select the BEST answer.

- A. From a Group Policy object (GPO), configure the App-V Streaming settings.
- B. From a Group Policy object (GPO), configure the App-V Publishing settings.
- C. From each client computer, run the Set-AppvClientConfiguration cmdlet.
- D. From each client computer, run the Set-AppvClientPackage cmdlet.

Correct Answer: A

QUESTION 4

Your network contains an Active Directory domain named contoso.com. You need to recommend an application distribution strategy to meet the following requirements:

Enable client computers to use different versions of the same application. Minimize the amount of hardware resources used on the client computers.

- A. Install the applications on Remote Desktop Services (RDS) servers, and then publish the applications as RemoteApp programs.
- B. Create a Windows Installer package for each application, and then deploy the packages by using a Group Policy object (GPO).
- C. Create a Windows Installer package for each application, and then deploy the packages by using Microsoft System

Center 2012 Configuration Manager.

D. Sequence the applications by using the Microsoft Application Virtualization (App-V) Sequencer, and then deploy the applications by using App-V streaming.

Correct Answer: A

QUESTION 5

You have a virtual infrastructure. The infrastructure contains servers that run Windows Server 2012 and have Microsoft Application Virtualization (App-V) 5.0 installed.

You sequence an application named App1, and then assign App1 by using a Group Policy object (GPO) named GPO1.

The manufacturer of App1 releases an update named Updateappl.msi.

You need to deploy the updated version of App1 to all of the App-V 5.0 clients. The solution must ensure that all of the App-V 5.0 clients only run the updated version of Appl.

What should you do?

- A. Create a new GPO, and then assign Updateapp1.msi.
- B. From the App-V Sequencer, sequence Updateappl.msi, and then create a new GPO.
- C. From the App-V Sequencer, update App1.appv, and then modify the GPO.
- D. Create a new GPO, and then publish Updateappl.msi.

Correct Answer: B
