**QUESTION 1**

You need to recommend a solution to update App4 on the client computers that already have the application deployed. The solution must meet the application requirements. What should you include in the recommendation?

- A. Add a package to the software installation settings of a Group Policy object (GPO).
- B. Use Import Updates from the Update Services console.
- C. Run wsusutil.exe and specify the import parameter.
- D. Run a script that uses the WSUS Application Programming Interface (API) for local publishing.

Correct Answer: D

QUESTION 2

Your company has a main office and two branch offices. The branch offices connect to the main office by using a slow WAN link.

You plan to deploy applications to all of the offices by using Microsoft Application Visualization (App-V) 5.0 streaming.

You need to recommend the server placement for the planned infrastructure.

What should you recommend? More than one answer choice may achieve the goal. Select the BEST answer.

- A. In the main office, deploy a management server, a database server, and a publishing server. In the branch offices, deploy a publishing server.
- B. In the main office, deploy a database server and a publishing server. In the branch offices, deploy a management server, a database server, and a publishing server.
- C. In the main office, deploy a management server, a database server, and a publishing server. In the branch offices, deploy a database server.
- D. In each office, deploy a management server, a database server, and a publishing server.

Correct Answer: A

QUESTION 3

Your network contains a main datacenter and a disaster recovery datacenter. The main datacenter contains a Virtual Desktop Infrastructure (VDI). The Hyper-V hosts run on a failover cluster.

The virtual desktop infrastructure contains 50 personal virtual desktops that have custom settings.

In the disaster recovery datacenter, you implement a Hyper-V failover cluster.

You plan to implement a business continuity solution for the 50 personal virtual desktops.

The virtual desktops must meet the following requirements:

Replicate to the Hyper-V cluster in the disaster recovery datacenter. Connect to the local network resources in the disaster recovery datacenter if a failover occurs.

Use application-consistent replicas.

You need to identify what must be implemented to meet the requirements of the planned deployment.

What should you identify? To answer, drag the appropriate task to the correct requirement in the answer area. Each task may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content.

Select and Place:

Tasks	Answer Area
Add a virtual SAN adapter.	Replicate to the Hyper-V cluster in the disaster recovery datacenter. Task
Implement Recovery History.	Connect to the local network resources in the disaster recovery datacenter if a failover occurs. Task
Modify the Failover TCP/IP Settings.	Use application-consistent replicas. Task
Implement the Hyper-V Replica Broker role.	

Correct Answer:

Tasks	Answer Area
Add a virtual SAN adapter.	Replicate to the Hyper-V cluster in the disaster recovery datacenter. Implement the Hyper-V Replica Broker role.
	Connect to the local network resources in the disaster recovery datacenter if a failover occurs. Modify the Failover TCP/IP Settings.
	Use application-consistent replicas. Implement Recovery History.

QUESTION 4

You need to configure security for the HR users to meet the application requirements A. Security Options

B. Restricted Groups

C. Public Key Policies

D. Application Control Policies

Correct Answer: D

QUESTION 5

Your network contains an Active Directory domain named contoso.com. All client computers run Windows 8 Enterprise. You plan to deploy Hyper-V to the client computers.

You need to identify which hardware features the client computers must support to enable the Client Hyper-V feature.

What should you identify? (Each correct answer presents part of the solution. Choose all that apply.)

A. Hardware-assisted virtualization

B. Hardware-enforced Data Execution Prevention (DEP)

C. Multipath I/O (MPIO)

D. Non-uniform memory access (NUMA)

E. Second Level Address Translation (SLAT)

Correct Answer: ABE
