**QUESTION 1**

Your network contains an Active Directory domain named contoso.com. Client computers run either Windows 7 or Windows 8.

You plan to replace the client computers that run Windows 7.

You need to migrate the application settings and the configurations from the client computers that run Windows 7 to the client computers that run Windows 8.

What should you do?

- A. On the client computers that run Windows 7, run loadstate.exe. On the client computers that run Windows 8, run scanstate.exe.
- B. On the client computers that run Windows 7, run scanstate.exe. On the client computers that run Windows 8, run loadstate.exe.
- C. On a server that runs Windows Server 2012, install the Windows Server Migration Tools. Run the Export-SmigServerSetting cmdlet and the Import-SmigServerSetting cmdlet.
- D. On a server that runs Windows Server 2012, install the Windows Server Migration Tools. Run the Send-SmigServerData cmdlet and the Receive-SmigServerData cmdlet.

Correct Answer: B

QUESTION 2

Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1. A network technician installs the Remote Desktop Session Host role service on Server1. The technician cannot manage Remote Desktop Services (RDS) by using Server Manager. You need to ensure that you can manage RDS by using Server Manager on Server1.

What should you do first?

- A. Install the Remote Desktop Connection Broker role service.
- B. Run an RDS scenario-based installation.
- C. Add Server1 to the RDS Management Servers group.
- D. Install the Remote Desktop Services Tools feature-

Correct Answer: B

QUESTION 3

You need to implement an RDS infrastructure to meet the technical requirements. What should you do first?

- A. Install Microsoft SQL Server 2008 R2.
- B. Install the Failover Clustering feature.
- C. Install the Windows Internal Database feature.
- D. Install the Network Load Balancing (NLB) feature.

Correct Answer: D

QUESTION 4

Your network contains an Active Directory domain named contoso.com. The domain contains a Microsoft Application Virtualization (App-V) 5.0 infrastructure. You package two complex applications named App1 and App2. You create a connection group that contains App1 and App2.

You discover that App2 overwrites some of the registry settings used by App1.

You need to recommend a solution for the deployment of App1 and App2 to meet the following requirements:

Prevent App2 from overwriting the registry settings of App1.

Ensure that App1 and App2 can share information.

What should you recommend? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Change the order of packages in the package library.
- B. Modify the PackageId of App1.
- C. Change the order of packages in the connection group.
- D. Create a single package that contains App1 and App2.
- E. Modify the VersionId of App1.

Correct Answer: C

<http://blogs.technet.com/b/appv/archive/2012/11/06/deploying-connection-groups-app-v-5-0.aspx> Note: The order of packages in the connection group is important. This determines the order in which the package contents are merged. So, in the following case, if there was a conflict (example: same registry value), the content of the "App1" package would be used.

QUESTION 5

Your network contains multiple servers that run Windows Server 2012. The network contains a Windows Server Update Services (WSUS) infrastructure.

On a server named Server1, you create and deploy images by using Microsoft Deployment Toolkit (MDT) 2012.

You need to recommend a solution to ensure that the available updates are applied during the deployment of the image.

What should you do?

- A. From the WSUS Administration console, configure the personalization settings, and then create a computer group.
- B. From Server1, edit the task sequence, and then modify the Customsettings.ini file.
- C. From the WSUS Administration console, configure the personalization settings, and then configure the classifications.
- D. From Server1, edit the task sequence, and then modify the Bootstrap.ini file.

Correct Answer: B
