QUESTION 1

You have virtual machine named VM1.

VM1 uses a fixed size virtual hard disk (VHD) named disk1.vhd. Disk1.vhd is 200 GB.

You shut down VM1.

You need to reduce the size of disk1.vhd.

Which action should you select from the Edit Virtual Hard Disk Wizard?

- A. Merge
- B. Compact
- C. Shrink
- D. Convert

Correct Answer: D

The Edit Virtual Hard Disk Wizard allows you to Compact, Convert, or Expand the VHD. Compacting reduces the size of a dynamically expanding VHD but not a fixed-size VHD.

Converting changes the disk format to the newer VHDX.

This process recreates the virtual disk, and allows you to specify the size of the VHDX.

QUESTION 2

Your network contains an Active Directory domain named contoso.com. The domain contains three servers named Server1, Server2, and Server3.

You create a server group named ServerGroup1.

You discover the error message shown in the following exhibit. (Click the Exhibit button.)

You need to ensure that Server2 can be managed remotely by using Server Manager.

What should you do?

- A. On Server2, modify the Windows Management Instrumentation (WMI) firewall rule.
- B. From Active Directory Users and Computers, add a computer account named Server2, and then restart Server2.
- C. On DC1, run the New-ADComputer cmdlet.
- D. On Server2, run the netdom.exe command.

Correct Answer: A

QUESTION 3

Your role of Network Administrator at ABC.com includes the management of the Active Directory Domain Services (AD DS) domain named ABC.com. The network includes servers that run Windows Server 2008 R2 Service Pack 1 (SP1) and Windows Server 2012. The Organizational Unit (OU) structure includes top-level OUs for each office location. Each toplevel OU contains OUs for each company department. Each departmental OU contains the user accounts of the users working in that department in the relevant location. Many Group Policy Objects (GPOs) are applied at the site level, domain level and OU level. A group named ABC-Managers contains the user accounts of company managers from each department.

You configure a Group Policy Object (GPO) named ManagersGPO and link it to the domain. You need to apply the

ManagersGPO to the ABC-Managers group.

How can you ensure that the ManagersGPO applies only to the ABC-Managers group?

- A. By running the Gpupdate command.
- B. By running the Set-GPLink cmdlet.
- C. By running GPedit.msc.
- D. By running the Set-GPPermission cmdlet.
- E. By running the Set-GPInheritance cmdlet.

Correct Answer: D

QUESTION 4

Your role of Network Administrator at ABC.com includes the management of the Active Directory Domain Services (AD DS) domain named ABC.com. The network includes servers that run Windows Server 2008 R2 Service Pack 1 (SP1) and Windows Server 2012. You plan to create a Windows Server 2012 Read Only Domain Controller in the ABC.com domain. You open Active Directory Users and Computers and select the Pre-create a read-only domain controller account option. You go through the Welcome to the Active Directory Domain Services Installation Wizard and specify the settings to create an account named ABC-RODC1. You use the Export Settings option to export the settings to a file named ABC-RODC1.txt. You plan to use this text file to automate the installation of the Read Only Domain Controller.

You install a Window Server 2012 Server.

How can you automate the promotion of the server using the settings in the ABC-RODC1.txt file?

- A. By running the Install-ADDSDomainController PowerShell cmdlet.
- B. By running the Install-WindowsFeature PowerShell cmdlet.
- C. By running the DCPromo command.
- D. By using the Add Roles Wizard in Server Manager.

Correct Answer: C

[https://technet.microsoft.com/en-us/library/dd378860\(v=ws.10\).aspx](https://technet.microsoft.com/en-us/library/dd378860(v=ws.10).aspx)

QUESTION 5

You have three Windows Server Update Services (WSUS) Servers named Server01 Server02 and Server03. Server01 synchronizes form Microsoft Update. You need to ensure that only Server02 and Server03 can Synchronize updates from Server01.

What should you do?

- A. Modify %ProgramFiles%\Update Services\WebServices\Serversyncgwservice\SimpleAuth.asmx.
- B. From the Update Services console, modify the Update Source and Proxy Server options.

C. From the Update Services console, modify the Automatic Approvals Options.

D. Modify %ProgramFiles%\Update Services\WebServices\Serversyncgwebservice\Web.config.

Correct Answer: D

"The question is asking how to harden WSUS, i.e. limit the servers that can get updates from Server01 to only Server02 and Server03. This is done by modifying the web.config. "
