**QUESTION 1**

You are mastering the company database, You should check the log of the a SQL Server 2005 Enterprise Edition everyday, You get the information on the torn page errors of the database. In order to fine the solution of the torn page, Which is the correct answer?

- A. You should utilize the latest database backup to restore only the torn page. Then restore any transaction logs which have been made since the full backup.
- B. You should reserve the newest database backup and then reserve any transaction logs which have been made since the past backup.
- C. You should operate DBCC CHECKDB.
- D. You should reserve the database from the newest database snapshot.

Correct Answer: A

QUESTION 2

You administer a SQL Server 2008 instance. You use an internal application based on SQL Server 2008. The application uses Analysis Services and Reporting Services. Company security policy requires that the surface area for all the deployed components of SQL Server 2008 be configured.

You need to implement the security policy and devise a method to evaluate the security policy against other database servers. What should you do?

- A. Edit the RSReportServer.config configuration file. Distribute the file to all database servers that need to be configured
- B. Use the SQL Server Best Practices Analyzer (BPA) to analyze your database servers. Implement the recommendations of the BPA.
- C. Create policies based on the appropriate facets. Apply the policies against a server group that includes the database servers that need to be configured.
- D. Create a Transact-SQL script based on the sp_configure stored procedure. Use a configuration server to rim the script against a server group that includes the database servers that need to be configured

Correct Answer: C

QUESTION 3

You administer a Microsoft SQL Server database.

You plan to deploy a new database application. You want to use SQL Server common language runtime (CLR) integration.

You need to ensure that CLR assemblies can be used.

What should you do?

- A. Run the following statement: EXEC sp_configure '\\show advanced options\\', 1 RECONFIGURE GO EXEC sp_configure '\\clr enabled\\', 1 RECONFIGURE GO
- B. Open Microsoft SQL Server Management Studio and connect to the server. Right-click the server and select Properties. Browse to the Advanced tab. Configure the CLRIntegration property to True.
- C. Open Microsoft SQL Server Management Studio and connect to the server. Right-click the server and select Facets. Choose the Server Configuration facet. Configure the AweEnabled property to True.
- D. open Microsoft SQL Server Management Studio and connect to the server. Right-click the server and select Properties. Browse to the Advanced tab. Configure the Filestream Access Level option to Full access enabled.

Correct Answer: D

QUESTION 4

You administer a SQL Server 2008 instance that contains a database named Adventure Works.

You are log shipping the Adventureworks database to a remote SQL Server 2008 instance.

During the weekend, the primary SQL Server instance required a restart. After the weekend, you discover that log shipping has stopped working.

You need to troubleshoot log shipping of the Adventureworks database.

What should you do?

- A. Verify whether the SQL Server Agent is started on the primary server.
- B. Verify whether the AdventureWorks database uses the Simple recovery model.
- C. Verify whether the SQL Server Volume Shadow Copy Service (VSS) Writer is started on the primary server.
- D. Execute a DBCC CHECKDB statement on the AdventureWorks database by using the EXTENDED_LOGICAL_CHECKS option.

Correct Answer: A

QUESTION 5

You administer a SQL Server 2008 instance.

A user named Julie reports repeated failed connections because of incorrect password usage for the login name srpc8521. Julie has been able to successfully login using this account in the past. Julie then recalls the correct password.

However, her connection is still denied.

You need to enable the SQL Server login.

Which Transact-SQL statement should you use?

- A. ALTER LOGIN srpc8521 ENABLE;
- B. ALTER LOGIN srpc8521 UNLOCK;
- C. ALTER LOGIN srpc8521 WITH CHECK_EXPIRATION = OFF;
- D. ALTER LOGIN srpc8521 WITH NO CREDENTIAL;

Correct Answer: D
