**QUESTION 1**

You maintain a SQL Server 2008 instance.

You have an existing database maintenance plan that performs the following tasks:

You need to modify the SQL Server instance such that an e-mail message is sent to the operators when the maintenance plan fails to execute successfully.

What should you do?

- A. Enable a fail-safe operator for the SQL Server Agent.
- B. Modify the database maintenance plan to e-mail a report to the appropriate operators.
- C. Modify the database maintenance plan to include a Notify Operator task that e-mails the appropriate operators.
- D. Modify the SQL Server Agent job that executes the database maintenance plan to notify the appropriate operators.

Correct Answer: D

QUESTION 2

You are mastering the company database, You should check the log of the a SQL Server 2005 Enterprise Edition everyday, You get the information on the torn page errors of the database. In order to fine the solution of the torn page, Which is the correct answer?

- A. You should utilize the latest database backup to restore only the torn page. Then restore any transaction logs which have been made since the full backup.
- B. You should reserve the newest database backup and then reserve any transaction logs which have been made since the past backup.
- C. You should operate DBCC CHECKDB.
- D. You should reserve the database from the newest database snapshot.

Correct Answer: A

QUESTION 3

You are the administrator of a Microsoft Windows Server 2003 computer. Your company purchases a new enterprise sales application that runs SQL Server 2008. The application uses stored procedures that include the EXECUTE AS clause and that use Microsoft Windows accounts. The company's written security policy states that all enterprise applications must run under the context of a service account that requires the minimum amount of privileges.

You need to configure the SQL Server service to run under the appropriate context for the installation of the new enterprise sales application. Under which context should the SQL Server service run?

- A. Under the context of the local system account

- B. Under the context of the local service account
- C. Under the context of the domain user account
- D. Under the context of the local Administrator account

Correct Answer: C

QUESTION 4

You maintain a SQL Server 2008 instance that contains a database named Finance. The Finance database currently contains 100 GB of data. On an average, 1 GB of data is modified or inserted daily.

The recovery model of the Finance database is set to Simple. Business requirements specify that data loss of more than two hours worth of transactions during business hours is unacceptable.

You need to select a backup strategy that uses the least amount of disk space by adhering to the business requirements.

What should you do?

- A. Perform a full database backup once daily.
- B. Perform a full database backup once daily. Perform a differential backup every two hours during business hours.
- C. Perform a full database backup once daily. Perform a transaction log backup every two hours during business hours.
- D. Perform a full database backup once every week. Perform a differential backup once daily. Perform a transaction log backup every two hours during business hours.

Correct Answer: B

QUESTION 5

You administer two SQL Server 2008 instances named Instance 1 and Instance 2. A database named AdventureWorks resides on Instance1. You move the AdventureWorks database from Instance1 to Instance2.

A SQL Server login named Mary with the password "Re#99\$45" is used by a user to access the database on Instance1. You create the same SQL Server login on Instance2. The user attempts to access the AdventureWorks database on

Instance2 by using the SQL Server login Mary. However, the user receives an error message which indicates that the access to the AdventureWorks database is denied.

You need to ensure that the user can access the AdventureWorks database.

Which Transact-SQL statements should you execute on Instance1?

- A. USE AdventureWorks; ALTER USER Mary WITH LOGIN = Mary;
- B. USE AdventureWorks: ALTER LOGIN Mary ENABLE;
- C. USE Adventure Works; ALTER LOGIN Mary WITH PASSWORD = '\\Re#99\$45\\' UNLOCK;

D. USE AdventureWorks; ALTER LOGIN Mary WITH DEFAULT_DATABASE = AdventureWorks;

Correct Answer: A
