**QUESTION 1**

You administer two SQL Server 2008 instances named Instance1 and Instance2. A database named Customers resides on Instance1. You move the Customers database from Instance1 to Instance2. A SQL Server login named User1 that has the password "111999" is used by a user to access the database on Instance1. You create the same SQL Server login on Instance2. The user attempts to access the Customers database on Instance2 by using the SQL Server login User1. However, the user receives an error message which indicates that the access to the Customers database is denied. You need to ensure that User1 can access the Customers database. Which Transact-SQL statements should you execute on Instance2?

- A. USE Customers; ALTER USER User1 WITH LOGIN = User1;
- B. USE Customers;
- C. USE Customers; ALTER LOGIN User1 WITH PASSWORD = '\\111999\\' UNLOCK;
- D. USE Customers; ALTER LOGIN User1 WITH DEFAULT_DATABASE = Customers;

Correct Answer: A

QUESTION 2

You maintain a SQL Server 2008 instance that contains a database named Finance. The Finance database currently contains 100 GB of data. On an average, 1 GB of data is modified or inserted daily. The recovery model of the Finance database is set to Simple. Business requirements specify that data loss of more than two hours worth of transactions during business hours is unacceptable. You need to select a backup strategy that uses the least amount of disk space by adhering to the business requirements. What should you do?

- A. Perform a full database backup once daily.
- B. Perform a full database backup once daily. Perform a differential backup every two hours during business hours.
- C. Perform a full database backup once daily. Perform a transaction log backup every two hours during business hours.
- D. Perform a full database backup once every week. Perform a differential backup once daily. Perform a transaction log backup every two hours during business hours.

Correct Answer: B

QUESTION 3

You administer a SQL Server 2008 instance. The security policy permits members of a Windows group named CONTOSO\Sales to establish new connections to the SQL Server instance only during business hours between 07:00 hours and

19:00 hours. Other users may connect to the SQL Server instance any time.

You write the following Transact-SQL statements.

```
CREATE TABLE Security.RestrictedLogonHours (
```

```
Id int NOT NULL IDENTITY(1,1),
```

```
GroupName sysname NOT NULL,
```

```
RestrictedTimeStart time NOT NULL,
```

```
RestrictedTimeStop time NOT NULL,
```

```
CONSTRAINT RestrictedLogonHours_pk
```

```
PRIMARY KEY CLUSTERED(Id)
```

```
);
```

```
INSERT INTO Security.RestrictedLogonHours (
```

```
GroupName,
```

```
RestrictedTimeStart,
```

```
RestrictedTimeStop
```

```
)
```

```
VALUES (
```

```
\\CONTOSO\Sales\\,
```

```
CAST(\\'07:00\\' AS time),
```

```
CAST(\\'19:00\\' AS time)
```

```
);
```

You need to implement the company security policy that is stored in the RestrictedLogonHours table. What should you do?

- A. Create a logon trigger that denies the connection to the CONTOSO\Sales group during non- business hours.
- B. Create a SQL Server Agent job that causes the SQL Server Windows service to pause during non- business hours.
- C. Create a SQL Server Agent job that periodically looks for and kills connections made by the CONTOSO\Sales group during non-business hours.
- D. Create a policy that uses a condition based on the Server Audit facet. Use the policy to deny the connection to the CONTOSO\Sales group during non-business hours.

Correct Answer: A

QUESTION 4

You administer a SQL Server 2008 instance. You have a stored procedure that implements a database maintenance process. You need to create a SQL Server Agent job that runs the stored procedure. You also need to ensure that the job is removed after successful completion. What should you do?

- A. Create a job that is scheduled to run once.
- B. Create a job that uses the Automatically delete job option.
- C. Create a job that is assigned to the Database Maintenance category.
- D. Create an Alert that will be raised when the job completes. This Alert will run another job to delete the maintenance job.

Correct Answer: B

QUESTION 5

You manage a SQL Server 2008 instance. You upgrade a SQL Server 7.0 database to the SQL Server instance. You need to ensure the early detection of suspect pages in the database. What should you do?

- A. Turn on the TRUSTWORTHY database option for the database.
- B. Set the database compatibility level option to 10 for the database.
- C. Set the PAGE_VERIFY database option to CHECKSUM for the database.
- D. Set the PAGE_VERIFY database option to TORN_PAGE_DETECTION for the model database.

Correct Answer: C
