QUESTION 1

Drag Drop question

A. Datum Corporation

You need to specify the procedure for implementing cryptographic functionality in the **HRData** database.

What should you do?

To answer, move the appropriate actions from the list of actions to the answer area, and arrange them in the correct order.

| List of Actions | Answer Area |
|--|-------------|
| Grant the ALTER ANY SYMMETRIC KEY permission to the HRApp user. | |
| Create a certificate that is owned by the HRApp user. | |
| Create a master key. | |
| Create two stored procedures that use the certificate to open the symmetric key. Have one of them encrypt the data with the symmetric key, and have the other decrypt the data with the symmetric key. | |
| Create a symmetric key that is owned by the HRApp user and encrypted with the certificate. | |
| Create a stored procedure that encrypts the data with the certificate, and create another stored procedure that decrypts the data with the certificate. | |

Correct Answer:

A. Datum Corporation

You need to specify the procedure for implementing cryptographic functionality in the **HRData** database.

What should you do?

To answer, move the appropriate actions from the list of actions to the answer area, and arrange them in the correct order.

List of Actions

- Grant the ALTER ANY SYMMETRIC KEY permission to the HRApp user.
-
-
-
-
-
-
-
-
-
- Create a stored procedure that encrypts the data with the certificate, and create another stored procedure that decrypts the data with the certificate.

Answer Area

- Create a symmetric key that is owned by the HRApp user and encrypted with the certificate.
- Create two stored procedures that use the certificate to open the symmetric key. Have one of them encrypt the data with the symmetric key, and have the other decrypt the data with the symmetric key.
- Create a certificate that is owned by the HRApp user.
- Create a master key.

QUESTION 2

You are the administrator of a SQL Server 2005 computer named SQL1. The SQL Server transaction log files are stored on an 80-GB mirrored volume. New databases have been added to SQL1, and the 80-GB volume is 85 percent full. You do not currently have the ability to upgrade the volume or to add more disk space. You need to receive an alert if the unused disk space on the 80-GB volume falls below 5 GB.

What should you do?

- A. In the Performance Logs and Alerts console, create an alert on the Logical Disk % Free Space counter.
- B. In SQL Server Agent, create an alert for the SQL Server: Databases Percent Log Used object.
- C. In the Wmic.exe utility, execute the Microsoft Windows Management Instrumentation (WMI) query `SELECT FreeSpace FROM Win32_LogicalDisk`.
- D. In SQL Server Management Studio, run the `DBCC SQLPERF(LOGSPACE)` command.

Correct Answer: A

**QUESTION 3**

You are the database administrator for your company. The company uses a SQL Server 2005 database to track online sales. Employees who run the In-Stock report experience slow performance. This performance problem is caused by the contention between the In-Stock report and high volume of data entry to the tables that are accessed in this report. The company wants the In-Stock report returned immediately even though other employees might be changing the data within their data-entry transactions. Any changes made in other transactions while the report is running must be visible to the employees who are running the In-Stock report. You need to design a solution to achieve this goal.

What should you do?

- A. Change the transaction isolation level for the report transaction to Read Uncommitted.
- B. Change the transaction isolation level for the report transaction to serializable.
- C. Change the transaction isolation level for the report transaction to snapshot.
- D. Configure the database to enable the Read Committed snapshot option.

Correct Answer: A

QUESTION 4

You are a database administrator for your company. You have a Data Transformation Services (DTS) package stored in SQL Server 2000 that you want to migrate into SQL Server 2005. The DTS package uses complex Microsoft Visual Basic Scripting Edition (VBScript) to dynamically configure precedence constraints. You run the SQL Server 2005 Package Migration Wizard, which fails to convert the package from SQL Server 2000 to SQL Server 2005. You need to ensure that the DTS package runs in SQL Server 2005. You must get the package running as quickly as possible.

What should you do?

- A. Manually recreate the SQL Server 2000 Data Transformation Services (DTS) package as a SQL Server Integration Services (SSIS) package.
- B. Configure the SQL Server 2000 Data Transformation Services (DTS) task to not use precedence constraints. Then, run the SQL Server 2005 Package Migration Wizard again.
- C. Ensure that the SQL Server 2000 Data Transformation Services (DTS) package is wrapped in an Execute DTS 2000 Package task.
- D. Run the SQL Server 2005 Package Migration Wizard. If the upgrade is not successful, run a Transfer SQL Server Objects task.

Correct Answer: C

QUESTION 5

You are a database administrator for Company.com. Your SQL Server 2005 database contains a table named Customer with a column named Postal Code in it. New Postal Code values are added regularly. You need to ensure

that values contained in the Postal Code column are verified. You need to retrieve, from the Postal Service in each country in which you have customers, the domain of values for the Postal Code column. Rapid response time for data access is of primary concern.

What should you do?

- A. Implement a database trigger that looks up the postal code data from a Server maintained by the Postal Service.
- B. Import the Postal Service data on a nightly basis into a Postal Code table. Then, configure a foreign key on the Customer table to the Postal Code table.
- C. Configure a CHECK constraint on the Postal Code field of the Customer table to allow only valid values.
- D. Implement a CLR trigger that looks up the postal code data by using a Web service offered by the Postal Service.
- E. Configure a new Postal Code data type and ensure that it conforms to the Postal Service specifications for the format for each country.

Correct Answer: B
