**QUESTION 1**

You are a database administrator for your company. You administer a SQL Server 2005 database named Contracts. The Contracts database becomes corrupted. You perform a restore by using the following Transact-SQL script. RESTORE DATABASE Contracts FROM contracts_bu_device WITH CONTINUE_AFTER_ERROR, CHECKSUM, RECOVERY. After the restore, the SQL Server logs show errors in some of the page restores. You need to repair the database pages that are corrupt. You need to achieve this goal by using the method that facilitates the fastest possible repair.

Which Transact-SQL statement should you use?

- A. DBCC CHECKDB (Contracts, REPAIR_ALLOW_DATA_LOSS) WITH NO_INFOMSGS
- B. ALTER DATABASE Contracts SET TORN_PAGE_DETECTION ON
- C. DBCC CHECKDB (Contracts, REPAIR_ALLOW_DATA_LOSS) WITH TABLOCK
- D. ALTER DATABASE Contracts SET TRUSTWORTHY ON

Correct Answer: C

QUESTION 2

You are a database administrator for Company.com. You review the error log for a SQL Server 2005 Enterprise Edition computer. You notice torn page errors for one database. You need to resolve the torn page problem as quickly as possible.

What should you do?

- A. Use the latest database backup to restore only the torn page. Then restore any transaction logs that have been made since the full backup.
- B. Run DB CC CHECK DB.
- C. Restore the latest full database backup and then restore any transaction logs that have been made since the full backup.
- D. Restore the database from the most recent database snapshot.

Correct Answer: A

QUESTION 3

You plan to create a unique nonclustered index on the CustomerID, LastName, and FirstName columns of the CustomerData.Customers table in the CRM database. To aid in estimating the space requirements for the index, you identify the following variables: Estimated number of rows Clustered index key Number of columns in the index Fixed data size Number of variable-length columns Average variable-length data size You need to identify the most significant

additional variable that will increase the estimated index size.

Which additional variable should you identify?

- A. current number of rows
- B. null bitmap
- C. fill factor
- D. automatically generated uniqueifier value

Correct Answer: C

QUESTION 4

You are a database administrator for your company. You create a SQL Server Integration Services (SSIS) package that contains confidential information. The package will be used by only two company employees. The package is stored in the msdb database. You need to ensure that only the appropriate employees can execute the package. You must accomplish this goal by using the least amount of administrative effort.

What should you do?

- A. Configure the package to use the Encrypt all with user key package protection level.
- B. Configure the package to use the Encrypt all with password package protection level.
- C. Save the package to a file. Encrypt the file by using the Encrypting File System (EFS).
- D. Save the package to a SQL Server 2005 computer that has an IPsec Secure Server policy applied.

Correct Answer: B

QUESTION 5

You are a database administrator for your company. You have a Data Transformation Services (DTS) package stored in SQL Server 2000 that you want to migrate into SQL Server 2005. The DTS package uses complex Microsoft Visual Basic Scripting Edition (VBScript) to dynamically configure precedence constraints. You run the SQL Server 2005 Package Migration Wizard, which fails to convert the package from SQL Server 2000 to SQL Server 2005. You need to ensure that the DTS package runs in SQL Server 2005. You must get the package running as quickly as possible.

What should you do?

- A. Manually recreate the SQL Server 2000 Data Transformation Services (DTS) package as a SQL Server Integration Services (SSIS) package.
- B. Configure the SQL Server 2000 Data Transformation Services (DTS) task to not use precedence constraints. Then, run the SQL Server 2005 Package Migration Wizard again.

C. Ensure that the SQL Server 2000 Data Transformation Services (DTS) package is wrapped in an Execute DTS 2000 Package task.

D. Run the SQL Server 2005 Package Migration Wizard. If the upgrade is not successful, run a Transfer SQL Server Objects task.

Correct Answer: C
