QUESTION 1

You want to remove SQL Server Integration Services from a server running the Windows Server 2008 R2 operating system that also has the Database Engine and SQL Server Analysis Services installed. Which of the following tools can you use to accomplish this goal?

A. SQL Server Management Studio

B. SQL Server Configuration Manager

C. Add/Remove Programs in Control Panel

D. SQL Server Installation Center

Correct Answer: C

In the control panel go to Microsoft SQL Server and double click. You are prompted to Add, Repair or Remove. Select remove and step through to the features selection. Choose SSIS and complete the uninstall. QUESTION 2

You use Microsoft SQL Server 2012 to develop a database application. You need to create an object that meets the following requirements: Takes an input variable Returns a table of values Cannot be referenced within a view

Which object should you use?

A. Scalar-valued function

B. Inline function

C. User-defined data type

D. Stored procedure

Correct Answer: D

QUESTION 3

You administer a Microsoft SQL Server environment. One of the SQL Server instances contains a database named Contoso.

You plan to migrate Contoso to Microsoft Azure SQL Database.

To do so, you need to implement a contained database.

Which two actions should you perform? Each correct answer presents part of the solution.

A. Set database containment to CONTAINED.

B. Enable database property contained database authentication.

C. Set database containment to PARTIAL.

D. Set database containment to CLOUD.

E. Enable server property contained database authentication.

F. Enable database property encryption enabled.

Correct Answer: BC

Contained database authentication is defined on the database, not on the server.

A database is converted to a contained database by changing the CONTAINMENT option to partial.
