**QUESTION 1**

You have a server named SQL1 that has SQL Server Integration Services (SSIS) installed. SQL1 has eight CPUs, 8 GB of RAM, RAID-10 storage, and a 10-gigabit Ethernet connection.

A package named Package1 runs on SQL1. Package1 contains 10 data tasks. Package1 queries 3 GB of data from the source system.

You review the performance statistics on SQL1 and discover that Package1 executes slower than expected.

You need to identify the problem that is causing Package1 to execute slowly.

Which performance monitor counter data should you review?

- A. Processor\% Idle Time
- B. Processor\% User Time
- C. Memory\Pages/sec
- D. SQLServer:SSIS Pipeline 10.0:Buffers in use

Correct Answer: B

The Processor: % User Time value "Corresponds to the percentage of time that the processor spends on executing user processes such as SQL Server."

In other words, this is the percentage of processor non-idle time spent on user processes

If the Processor:% User Time high values are caused by SQL Server, the reason can be non-optimal SQL Server configuration, excessive querying, schema issues, etc. Further troubleshooting requires finding the process or batch that uses

so much processor time

QUESTION 2

You work as a database developer at ABC.com. The ABC.com network consists of a single domain named ABC.com. ABC.com makes use of Microsoft SQL Server 2012 in their environment. You are in the process of designing a SQL Server Integration Services (SSIS) package that is saved in the file system. You want make use of the command prompt to load the package. Which of the following actions should you take?

- A. You should consider making use of dtutil /Fi from the command prompt.
- B. You should consider making use of dtexec /ISServer from the command prompt.
- C. You should consider making use of dtexec /f from the command prompt.
- D. You should consider making use of dtutil /Si from the command prompt.

Correct Answer: C

QUESTION 3

You work as a senior database administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. ABC.com makes use of Microsoft SQL Server 2012 in their environment.

It is reported that a SQL Server Integration Services (SSIS) package regularly stops working in production. The package is often started manually by an SSIS developer.

You want to know who the authenticated user is.

Which of the following actions should you take?

- A. You should consider making use of the catalog.packages SSISDB Database Transact-SQL statement.
- B. You should consider making use of the catalog.executions SSISDB Database Transact-SQL statement.
- C. You should consider making use of the catalog.environments SSISDB Database Transact-SQL statement.
- D. You should consider making use of the catalog.executables SSISDB Database Transact-SQL statement.

Correct Answer: B

QUESTION 4

You are creating a SQL Server Master Data Services (MDS) model. This model is used to store a master list of products.

An attribute must be added to the Product entity to define the sales manager responsible for each product.

You need to create an attribute in the Product entity that prevents users from entering invalid sales manager values.

Which type of attribute should you create?

- A. Recursive
- B. Explicit
- C. Domain-based
- D. User-defined
- E. Derived
- F. Parent

Correct Answer: C

QUESTION 5

You work as a senior database administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. ABC.com makes use of Microsoft SQL Server 2012 in their environment.

You are hosting a training exercise for Microsoft SQL Server 2012 administrators. You are currently discussing Multicast transformation.

Which of the following is TRUE with regards to Multicast transformation? (Choose two.)

- A. It prevents a package from creating logical copies of data.
- B. It allows a package to create logical copies of data.
- C. It distributes its input to one or more outputs.
- D. It distributes its input to a single output.

Correct Answer: BC
