QUESTION 1

You need to design the dimCustomers table. Which design approach should you use?

A. Reference dimension

B. Type 2 slowly changing dimension

C. Junk dimension

D. Conformed dimension

E. Type 1 slowly changing dimension

Correct Answer: B

QUESTION 2

You need to ensure that the Sales measure in the Power View field list meets the requirements. What should you do(Each correct answer presents a part of the solution. Choose all that apply.)

A. Format the column to display zero decimal places.

B. Hide the column from client tools.

C. Create a measure named Sales based on the column by using the Data Analysis Expressions (DAX) SUM() function.

D. Rename the column to Sales.

E. Format the measure to display zero decimal places.

Correct Answer: AC

QUESTION 3

You have a nightly process that loads millions of rows from an AS/400 system to a SQL Server Analysis Services (SSAS) cube. You need to design a partitioning strategy to ensure that new information can be added without reprocessing the entire cube. Which processing option should you use?

A. Process Add by using an incremental table

B. Process Index for the current partition

C. Process Structure for the current cube

D. Process Default for the current cube

Correct Answer: D

QUESTION 4

HOTSPOT

A school stores information about teachers, students, classes, and enrollments in a Windows Azure SQL Database database. The database includes a table that maps the user IDs of teachers to the subjects they teach.

Teachers access reports in a SQL Server Reporting Services (SSRS) instance by using their credentials.
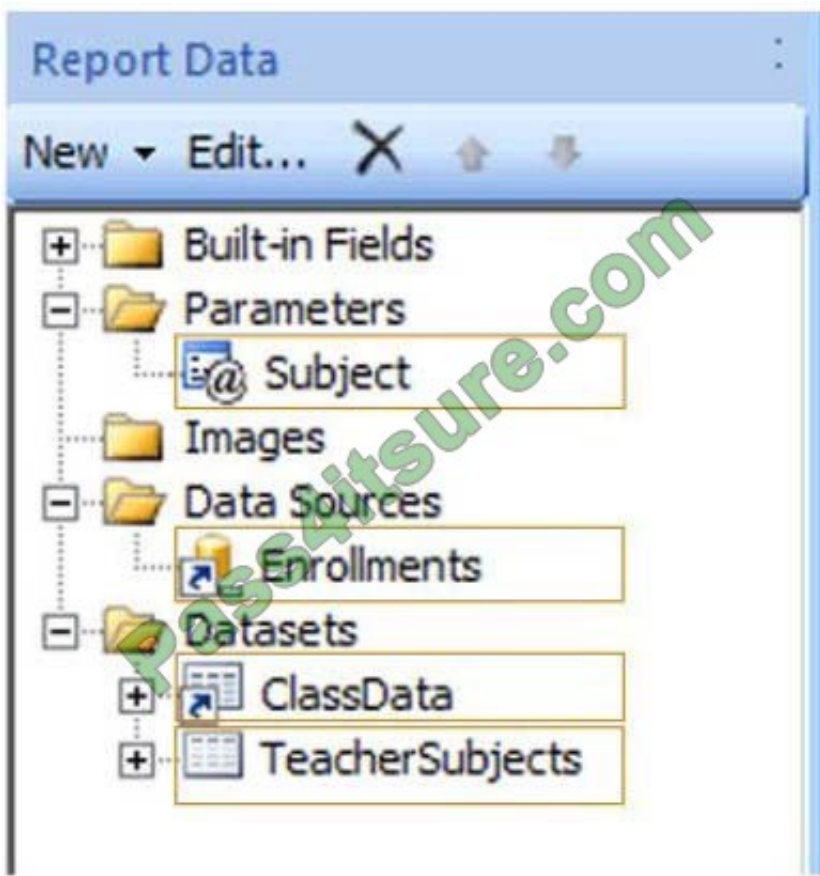

You are developing a report that displays a table of class enrollments for a specific subject. The report will prompt teachers to select from their mapped subjects. The table is based on a dataset named ClassData. To minimize report execution

time, the ClassData dataset has been configured to cache all class enrollment data.
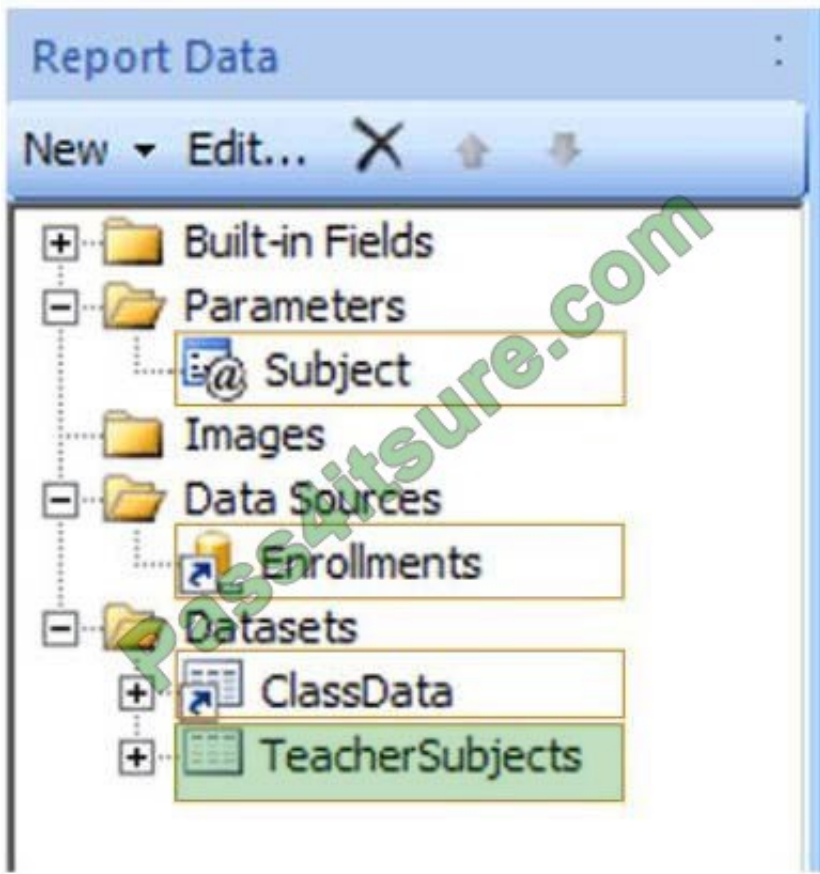

You need to ensure that the report parameter displays the correct subjects for each teacher.

Which item should you configureTo answer, select the appropriate item in the answer area.

Hot Area:

Correct Answer:

QUESTION 5

You are creating the Australian postal code query.

Which arguments should you use to complete the query?

To answer, drag the appropriate arguments to the correct location or locations in the answer area. (Use only arguments that apply.)

Select and Place:

Arguments
