QUESTION 1

You execute the SalesbyCategory report and receive the following error message:

"Members, tuples, or sets must use the same hierarchies in the function."

You need to ensure that the query executes successfully.

Which two actions should you perform? Each correct answer presents part of the solution.

- A. Move the Product clause from line 08 to line 10.
- B. Move the Date and Product clauses on line 11 to axis 0.
- C. Move the Date clause from line 10 to line 08.
- D. Move the Measures clause on line 02 to axis 1.

Correct Answer: C

QUESTION 2

DRAG DROP

You are developing packages in a SQL Server Integration Services (SSIS) project to load a data warehouse.

You are designing a method for configuring the packages' connections when deployed to a production SSIS catalog. All packages load data from two source databases.

Two packages also load data from a third source database. Another SSIS project will use the same connections.

You need to meet the requirements.

What should you do? To answer, drag the appropriate term or terms to the correct location or locations in the answer area. (Each term may be used once, more than once, or not at all.)

Select and Place:

1. Deploy the packages in the _____ model.

2. Create _____ for the project.

3. Add _____ for each connection string and configure the project's connection to use them.

Available options: a configuration entry, a configuration file, an environment, an environment variable, package, project

Correct Answer:

1. Deploy the packages in the project _____ model.

2. Create an environment _____ for the project.

3. Add an environment variable _____ for each connection string and configure the project's connection to use them.

Available options: a configuration entry, a configuration file, package

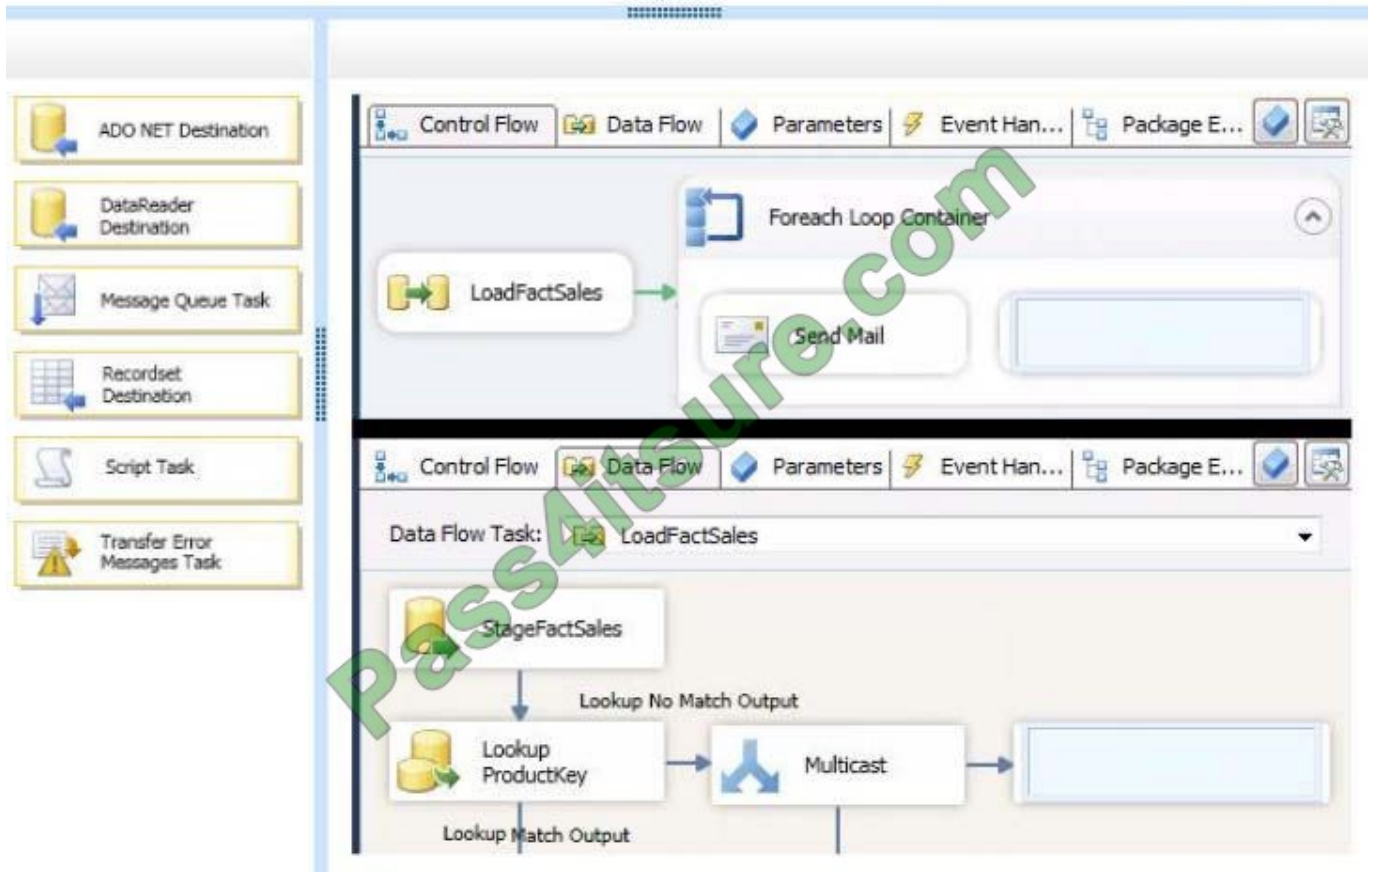

QUESTION 3

DRAG DROP

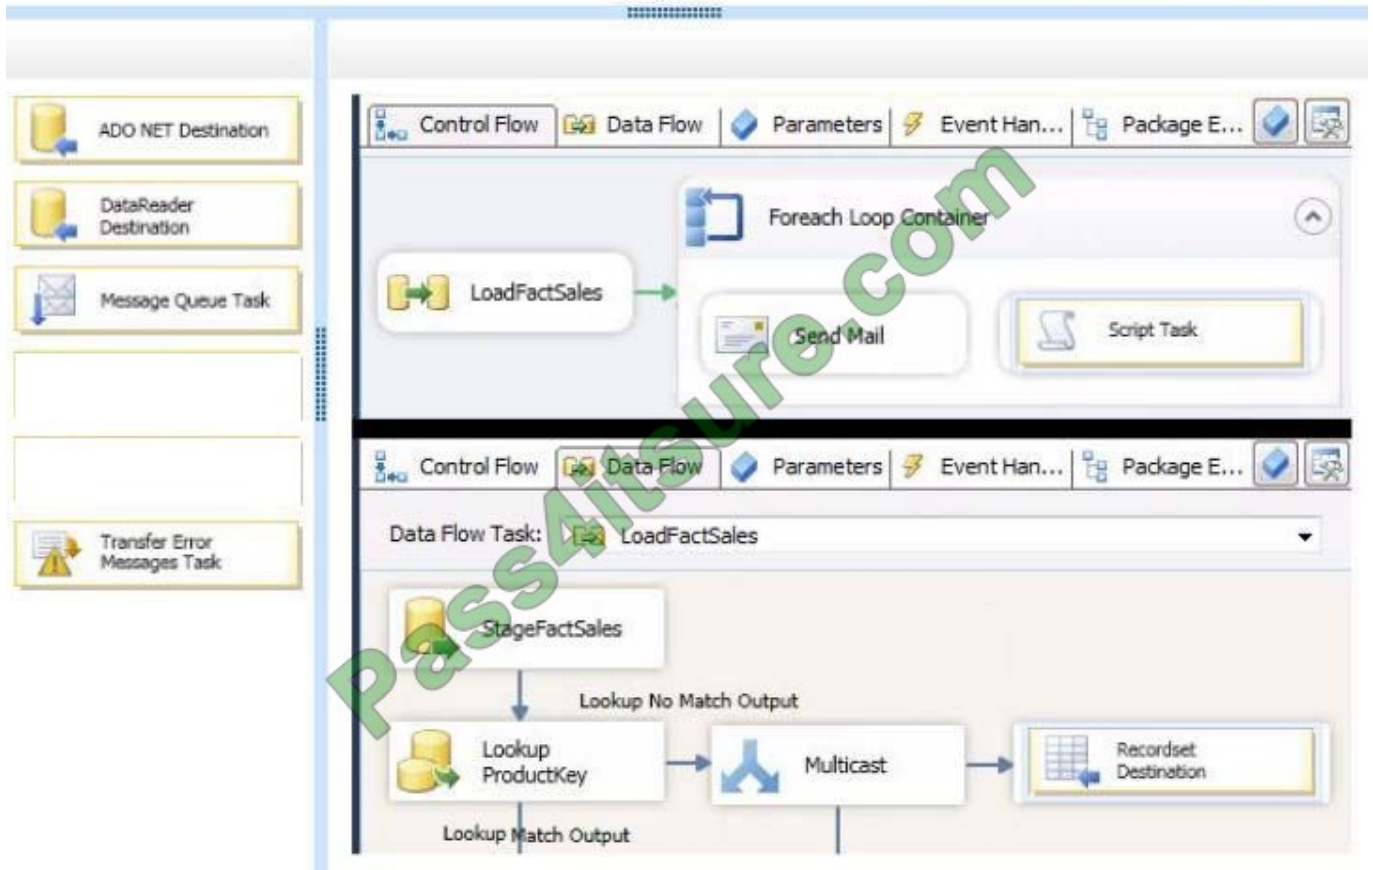

You need to develop the LoadFactSales package to write the error messages to the SSIS catalog log.

Which components should you use? To answer, drag the appropriate components to the correct location or locations in the answer area. (Use only components that apply.)

Select and Place:

Correct Answer:

QUESTION 4

A company has a relational data warehouse, a SQL Server Analysis Services (SSAS) database, and a SQL Server Reporting Services (SSRS) instance. The SSAS database contains a cube named Sales. Shared data sources exist in SSRS

for the relational and SSAS databases. Each company department has its own report writers. Report writers in the Marketing department want to create new reports by using Report Builder. Many reports will include data generated by a

custom formula that references data stored either in a data warehouse table or in the Sales cube. The custom formula will compare time periods across multiple products, categories, and regions.

You have the following requirements:

Ensure that only Marketing department report writers can access the custom formula.

Implement only one dataset.

Ensure that the dataset references the data source that will provide the fastest data retrieval.

You need to meet the requirements to support the Marketing department report writers.

What should you do?(More than one answer choice may achieve the goal. Select the BEST answer.)

A. Create, deploy, and secure a shared dataset that references the SSAS database shared data source and includes a

calculated member for the custom formula.

B. Create a calculated member in the Sales cube. Create, deploy, and secure a shared dataset that references the SSAS database shared data source and includes the calculated member from the cube.

C. Create and secure in the data warehouse a stored procedure that implements the custom formula. Create and deploy a shared dataset that references the data warehouse shared data source.

D. Create, deploy, and secure a shared dataset that references the data warehouse shared data source and includes custom Transact-SQL (T-SQL) code for the custom formula.

Correct Answer: B

QUESTION 5

You need to define the trend calculation for the sales performance KPI. Which KPI trend MDX expression should you use?

A. CASE WHEN [Sales Variance %]

B. IIF([Sales Variance %]

C. IIF([Sales Variance %]

D. CASE WHEN [Sales Variance %]

Correct Answer: A
