QUESTION 1

A hospital has a relational data warehouse, a SQL Server Analysis Services (SSAS) database, and a SQL Server Reporting Services (SSRS) instance. The SSAS database contains a cube named Pharmacy. Shared data sources exist in

SSRS for the relational and SSAS databases. Each hospital department has its own report writers.

Report writers in the Human Resources (HR) department want to create new reports by using Report Builder. Many reports will include data generated by a custom formula that references data stored either in a data warehouse table or in the

Pharmacy cube. The custom formula will compare time periods across multiple products, categories, and employees.

You have the following requirements:

Ensure that only the HR department report writers can access the custom formula.

Implement only one dataset.

Ensure that the dataset references the data source that will provide the fastest data retrieval.

You need to meet the requirements to support the HR department report writers.

What should you do? (More than one answer choice may achieve the goal. Select the BEST answer.)

A. Create, deploy, and secure a shared dataset that references the data warehouse shared data source and includes custom Transact-SQL (T-SQL) code for the custom formula.

B. Create a calculated member in the Pharmacy cube. Create, deploy, and secure a shared dataset that references the SSAS database shared data source and includes the calculated member from the cube.

C. Create and secure in the data warehouse a stored procedure that implements the custom formula. Create and deploy a shared dataset that references the data warehouse shared data source.

D. Create, deploy, and secure a shared dataset that references the SSAS database shared data source and includes a calculated member for the custom formula.

Correct Answer: B

QUESTION 2

You manage an environment that has SharePoint Server 2010 and a SQL Server Reporting Services (SSRS) instance in SharePoint integrated mode. Several report subscriptions are configured to deliver reports through email by using a

shared schedule.

The email server will be going offline.

You need to temporarily suspend the shared schedule until the email server is brought back online.

What should you do?

A. In SharePoint Central Administration, delete the shared schedule.

B. In Report Manager, pause the shared schedule.

C. In Report Manager, delete the shared schedule.

D. In SharePoint Central Administration, pause the shared schedule.

Correct Answer: D

QUESTION 3

You have an OLAP cube named Cube1. Cube1 has two partitions named partition1 and partition2.

You need to configure the storage mode for each cube partition.

The solution must meet the following requirements:

Users must be able to retrieve aggregate data from partition1 as quickly as possible.
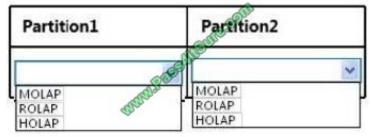

The processing time for partition1 and partition2 must be minimized.

The least possible amount of storage must be used for partition2.

What should you do? To answer, select the appropriate storage mode for each partition in the answer area.
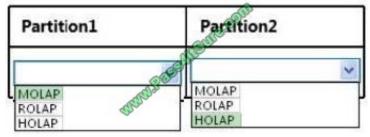

Hot Area:

Answer Area

Partition1	Partition2
MOLAP ROLAP HOLAP	MOLAP ROLAP HOLAP

Correct Answer:

Answer Area

Partition1	Partition2
MOLAP ROLAP HOLAP	MOLAP ROLAP **HOLAP**

QUESTION 4

You need to select the appropriate storage settings for the cube. Which settings should you choose?

A. Relational OLAP (ROLAP) with proactive caching enabled

B. Multidimensional OLAP (MOLAP) with proactive caching enabled and a rebuild interval of 24 hours

C. Hybrid OLAP (HOLAP) with proactive caching disabled

D. Hybrid OLAP (HOLAP) with proactive caching enabled

Correct Answer: C

QUESTION 5

You need to slice data by the CouponUsed, OnSale, and Closeout columns. What should you do?

A. Create one linked dimension for each column.

B. Create one degenerate dimension.

C. Create one role-playing dimension.

D. Create one junk dimension.

Correct Answer: D
