QUESTION 1

You are developing a SQL Server PowerPivot workbook that sources data from a SQL Azure database. The PowerPivot model includes a single table named FactSales that consists of four columns named Year, Country, Product, and Revenue. The model includes the following two measures.

Sales:=SUM(FactSales[Revenue;])

Sales %:=;Sales] / CALCULATE([Sales], ALL(FactSales))

In Microsoft Excel 2010 you create the following PivotTable report.

	A	B	C	D	E
1			Year	2011	
2					
3		Country	Row Labels	Sales	Sales %
4		Canada	Bread	234,533	0.54 %
5		Mexico	Dairy	112,045	0.26 %
6		USA	Meat	534,009	1.22 %
7			Grand Total	880,587	2.1

Users report that the Sales % measure computes an incorrect ratio. The measure should meet a requirement to compute a ratio over all visible sales values defined by the query filters. The Grand Total value for the Sales % measure should

equal 100%.

You need to fix the Sales % measure to meet the requirement.

Which Data Analysis Expressions (DAX) expression should you use?

- A. = [Sales] / CALCULATE([Sales])
- B. = [sales] / [Sales](ALLSELECTED(FactSales))
- C. = [sales] / CALCULATE([Sales], VALUES(FactSales[Year]), VALUES(FactSales[Country]))
- D. = [sales] / [Sales](ALLEXCEPT(FactSales, FactSales[Year]))

Correct Answer: B

QUESTION 2

You need to configure per-user security authentication for reporting against the Sales cube.

What should you do? (Each correct answer presents part of the complete solution. Choose all that apply.)

- A. Create Service Principal Names (SPNs).
- B. Configure account delegation.
- C. Enable forms-based authentication.
- D. Enable mixed-mode authentication.

Correct Answer: AD

QUESTION 3

You maintain a multidimensional Business Intelligence Semantic Model (BISM) that was developed with default settings.

The model has one cube and the cube has one measure group. The measure group is based on a very large fact table and is partitioned by month. The fact table is incrementally loaded each day with approximately 800,000 new rows. You

need to ensure that all rows are available in the cube while minimizing the processing time.

Which processing option should you use?

- A. Process Add
- B. Process Clear
- C. Process Default
- D. Process Index
- E. Process Data
- F. Process Full

Correct Answer: A

QUESTION 4

You need to create the hierarchy in the AdhocReports project in time for the next production release cycle. What should you do?

- A. Multi-select all of the columns, right-click the columns, and then click the Create Hierarchy command. Check in the changes before the next release cycle.
- B. Use the RELATED() function to consolidate the columns in the DimSalesTerritory table, multi-select the columns, right-click the columns, and then click the Create Hierarchy command. Check in the changes before the next release cycle.
- C. Use the RELATEDTABLEQ function to consolidate the tables, multi-select the columns in the hierarchy, right-click the columns, and then click the Create Hierarchy command. Check in the changes before the next release cycle.

D. Use the RELATED() function to consolidate the columns in the DimEmployee table, multi-select the columns, right-click the columns, and then click the Create Hierarchy command. Check in the changes before the next release cycle.

Correct Answer: D

QUESTION 5

You are developing a SQL Server Analysis Services (SSAS) cube for the accounts department.

You create a measure group named Exchange Rate that consists of measures pertaining to currency exchange rates. One of the measures in this group is named Average Rate and it will be used to report the average currency exchange rate

over time.

Currently the AggregationFunction property for the Average Rate measure is set to Sum.

You need to ensure that Average Rate measure reports the average of the currency exchange rate over time.

Which value should you select for the AggregationFunction property for the Average Rate measure? To answer, select the appropriate setting in the answer area.

Property	Value
AggregateFunction	Sum
DataType	Inherited
Description	
DisplayFolder	
FormatString	###,##.00
ID	Average Rate
MeasureExpression	
Name	Average Rate
Source	Currency Rate Facts.AverageRate (Double)
Visible	True

AggregateFunction
Specifies the function used to aggregate measure values.

A. AverageOfChildren

B. ByAccount

C. Count

D. DistinctCount E. FirstChild

F. FirstNonEmpty

G. LastChild

H. LastNonEmpty

I. Max

J. Min

K. None

L. Sum

Correct Answer: A

Explanation: AverageOfChildren

Specifies average of leaf descendants in time. Average does not count an empty value as 0.
