QUESTION 1

You need to complete the code at line LV19 to implement the validation of the app license. Which code segment should you use?

- A.

```
if (result.EntitlementType.ToLower() == "trial")
{
    return true;
}
```
- B.

```
if (result.EntitlementType.ToLower() == "valid")
{
    return true;
}
```
- C.

```
if (result.EntitlementType.ToLower() == "paid")
{
    return true;
}
```
- D.

```
if (result.EntitlementType.ToLower() == "free")
{
    return true;
}
```

A. B. C. D.

Correct Answer: C

Scenario: Only users with a paid license can use the app.

QUESTION 2

DRAG DROP

You work on a SharePoint Enterprise Content Management (ECM) project.

You develop the Litware Document Approval workflow that enables a group of people to review, approve, or reject documents and document changes.

You need to assign the Litware Document Approval workflow to the Document content type.

How should you complete the relevant code? (To answer, drag the appropriate code segments to the correct location or locations in the answer area. Each code segment may be used once, more than once, or not at all. You may need to

drag the split bar between panes or scroll to view content.)

Select and Place:

"Tasks"

"WF History"

Lists["Documents"]

spWeb.Lists["Tasks"]

CreateListAssociation

ContentTypes["Document"]

spWeb.Lists["WF History"]

CreateWebContentTypeAssociation

Answer Area

```

public override void FeatureActivated
(SPFeatureReceiverProperties properties)
{
    SPWeb spWeb = (SPWeb)properties.Feature.Parent;
    var document =
        spWeb.  ;

    SPWorkflowTemplate wfTemplate =
        spWeb.WorkflowTemplates.GetTemplateByName
            ("Litware Document Approval", spWeb.Locale);
    var wfTaskList =  ;
    var wfHistoryList =  ;
    SPWorkflowAssociation wfAssociation =
        SPWorkflowAssociation. 

    (wfTemplate, "Document Approval", wfTaskList, wfHistoryList);
    document.WorkflowAssociations.Add(wfAssociation);
    document.Update();
}
                
```

Correct Answer:

Lists["Documents"]

spWeb.Lists["Tasks"]

CreateListAssociation

spWeb.Lists["WF History"]

Answer Area

```

public override void FeatureActivated
(SPFeatureReceiverProperties properties)
{
    SPWeb spWeb = (SPWeb)properties.Feature.Parent;
    var document =
        spWeb.  ;

    SPWorkflowTemplate wfTemplate =
        spWeb.WorkflowTemplates.GetTemplateByName
            ("Litware Document Approval", spWeb.Locale);
    var wfTaskList =  ;
    var wfHistoryList =  ;
    SPWorkflowAssociation wfAssociation =
        SPWorkflowAssociation. 

    (wfTemplate, "Document Approval", wfTaskList, wfHistoryList);
    document.WorkflowAssociations.Add(wfAssociation);
    document.Update();
}
                
```

Box 2: "Tasks"

Box 3: "WF History"

Box 4: CreateWebContentTypeAssociation

* SPWorkflowAssociation.CreateWebContentTypeAssociation method

Syntax: public static SPWorkflowAssociation CreateWebContentTypeAssociation (
SPWorkflowTemplate baseTemplate,
string name,
string taskListName,
string historyListName)

QUESTION 3

You need to meet the requirements for data storage for the CourierMobile app and the CloudMananger app.

Which technologies should you use? (Each correct answer presents part of the solution. Choose all that apply.)

- A. Windows Azure SQL Database
- B. SharePoint content database
- C. Secure Store
- D. SQL Server Express LocalDB
- E. SharePoint list

Correct Answer: AD

A: SQL Azure in the cloud.

D: LocalDB is a lightweight version of Express that has the same programmability features, but it runs in user mode and has a fast, zero-configuration installation and a short list of prerequisites.

From scenario:

*

CourierMobile App

The CourierMobile app must be able to capture more than 30 million data points of location data daily as they occur and upload the location data to the cloud when connected to the Internet.

*

Cloudmanager App

/ The CloudManager app must elastically scale to capture courier location data as the number of bicycle couriers increases or decreases.

/ The CloudManager app must process bicycle courier location data from a data store capable of storing more than 30 million items.

QUESTION 4

HOTSPOT

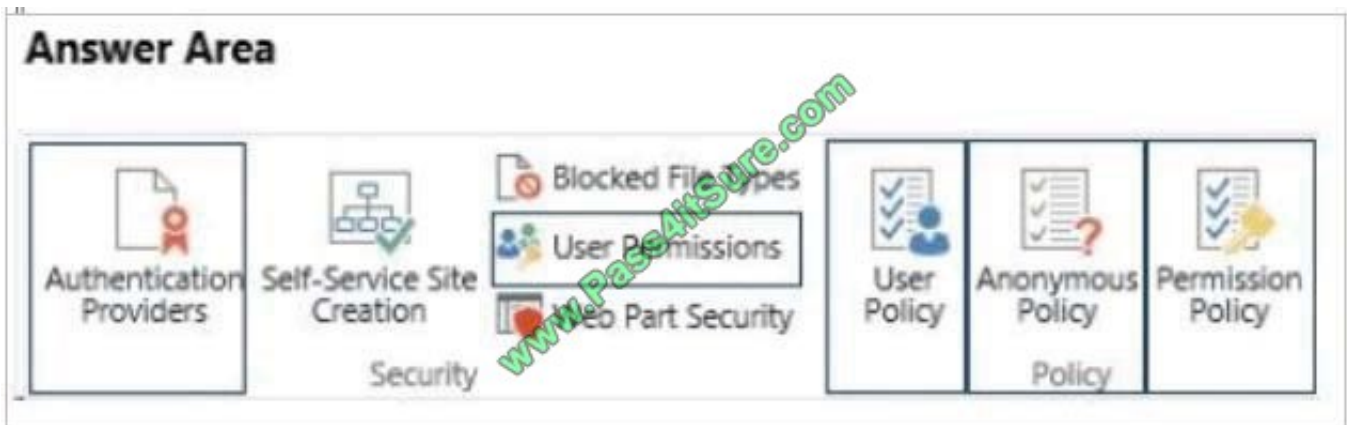

A web application that listens on port 80 has been created for Internet users to access your company's SharePoint site. The web application uses claims-based authentication.

Users report that they are prompted for credentials when they access the site in their browser.

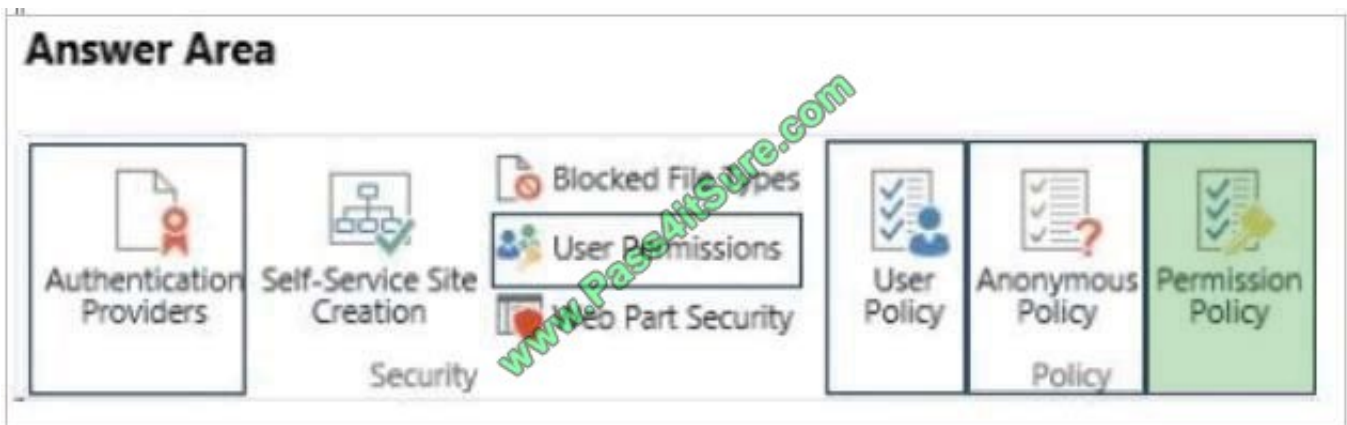

You need to enable anonymous access.

On the Manage web applications page in Central Administration, which option should you select? (To answer, select the appropriate menu item in the answer area.)

Hot Area:

Correct Answer:

* Permission Policy

On the SharePoint Central Administration website, in the Application Management section, click Manage web applications.

Click to highlight the web application whose permission policy that you want to manage.

In the Policy group of the ribbon, click Anonymous Policy.

In the Anonymous Access Restrictions dialog box, in the Zone list, click the zone for which you want the policy to apply.

In the Permissions section, select the permission policy that you want anonymous users to have, and then click Save.

QUESTION 5

DRAG DROP

A company develops a workflow by using SharePoint Workflow Manager. The Auditing department has a SQL Server database that contains a list of all available software. The list contains the names of the users who have permission to use

the software. The data is available through a Windows Communication Foundation (WCF) service that uses OData and is deployed internally.

The IT department plans to implement a help desk solution on the IT site collection that involves the creation of workflows.

A user must request approval to use software that is not available internally from three different managers. The workflow should be approved if two of the three managers approve the request.

The workflow has an Evaluation and an Approval stage.

You need to develop the workflow by using SharePoint Designer.

Which five actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Actions	Answer Area
Create a stage for every phase of the workflow.	
In the Transition to Stage section of the Approval stage, insert the Go to a Stage action and then set the Go to value to End of Workflow .	
In the Evaluation stage, insert the Call Http Web Service condition and the Get an Item from a Dictionary condition.	
In the Transition to Stage section of the Evaluation stage, insert Go to a stage action and set a stage value to End of Workflow in the else clause.	
In the Approval stage, insert the Start a Task Process and add the names of the participating managers. Set the Completion Criteria property to Wait of percentage of a response .	

Correct Answer:

Actions	Answer Area
	Create a stage for every phase of the workflow.
	In the Evaluation stage, insert the Call Http Web Service condition and the Get an Item from a Dictionary condition.
	In the Transition to Stage section of the Evaluation stage, insert Go to a stage action and set a stage value to End of Workflow in the else clause.
	In the Approval stage, insert the Start a Task Process and add the names of the participating managers. Set the Completion Criteria property to Wait of percentage of a response .
	In the Transition to Stage section of the Approval stage, insert the Go to a Stage action and then set the Go to value to End of Workflow .

- * Create the stages Evaluation and approval
- * But the Evaluation stage before the Approval stage.
- * End each stage with a Transition to Stage.

Note: Microsoft has introduced the concept of stages. These are containers in the workflow that allow you to structure the workflow to flow from one stage to another. The use of stages mean that you can create a workflow very similar to a state machine workflow.

A stage can hold one or more workflow actions, and will also have only one Transition to stage area. The Transition to stage area defines how the workflow exits the stage after its actions have been processed. The stage can be configured to transition to another stage, or to end the workflow Example:

Stage: My First Stage

(Start typing or use the Insert group on the Ribbon.)

Transition to stage

(Insert go-to actions with conditions for transitioning to the stage)
