QUESTION 1

You plan to conduct a test for a multi-tier ASP.NET website using Microsoft Test Manager (MTM). You have created a test plan named QA Release 1.0. You also have created a test setting for the QA Release 1.0 test plan with the Database, Web Client, and Web Server roles.

The QA Release 1.0 test plan must specify that test runs:

Collect specific diagnostic trace information to help analyze bugs that are difficult to reproduce, and

Collect information about which methods of your applications code were used when a test case was run.

You need to configure the QA Release 1.0 test plan to meet these requirements.

What should you do?

A. Enable and configure the IntelliTrace, ASP.NET Client Proxy for IntelliTrace and Test Impact diagnostic data adapter settings.

B. Enable and configure the IntelliTrace, ASP.NET profiler, and Event log diagnostic data adapter settings.

C. Enable and configure the IntelliTrace, ASP.NET Client Proxy for IntelliTrace and Test Impact, and ASP.NET profiler diagnostic data adapter settings.

D. Enable and configure the ASP.NET profiler, Code coverage, and IntelliTrace diagnostic data adapter settings.

Correct Answer: A

Test Settings: Data and Diagnostics

*

(needed) IntelliTrace : You can configure the diagnostic data adapter for IntelliTrace to collect specific diagnostic trace information to help isolate bugs that are difficult to reproduce

*

(needed for Web Client Web Server traffic) ASP.NET Client Proxy for IntelliTrace and Test Impact: This proxy allows you to collect information about the http calls from a client to a Web server for the IntelliTrace and Test Impact diagnostic data adapters.

*

(needed) Test impact : You can collect information about which methods of your applications code were used when a test case was running. This information can be used together with changes to the application code made by developers to determine which tests were impacted by those development changes.

Reference: Specifying Test Settings for Visual Studio Tests

QUESTION 2

You are using Microsoft Test Manager (MTM).

You plan to reduce the maintenance of test suites.

You need to create test suites for which the test cases are automatically added.

What are two possible types of test suites that achieve this goal? (Each correct answer presents a complete solution. Choose two.)

A. Exploratory-based

B. Static

C. Query-based

D. Requirements-based

Correct Answer: CD

C: Query-based suites show the results of a query that you define. For example, you could select all the test cases that have Priority = 1.

D: Requirements-based suites are derived from Product Backlog Items, User Stories, or other requirements. The suite contains all the test cases that are linked to its requirement. This type helps you track how well each requirement has been tested.

QUESTION 3

You are using Microsoft Test Manager (MTM) to manage your testing efforts.

You want to see how manual testing is going for the current plan.

You need to see a list of manual test runs grouped first by Test Status and then by State.

What should you do? (To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Correct Answer:

	Answer Area
	Navigate to the Analyze Test Runs view and select **Manual runs.**
	Drag the **Test Status** column header into the group by region.
Click the **State** column header.	Drag the **State** column header into the group by region.
Click the **Test Status** column header.	

Note:

Test suite: Sprint 1 (ID: 1)
Default configurations (1): Vista and IE 8   State: ▶ In progress ▼

Open   Add   New   ✕   Assign   Configurations

Drag a column header here to group by that column.

Order	ID	Title	▲	Priority
1	12781	Add to	Activated By	

QUESTION 4

You are using Microsoft Test Manager (MTM). You are using the Microsoft Visual Studio Scrum 1.0 process template.

You need to generate a list of product backlog items (PBI) in MTM that have zero test cases.

What should you do?

A. Open each PBI and visually inspect the work item links.

B. Create a requirements-based test suite.

C. Click Requirements coverage in the Results view.

D. Create a Direct Links query.

Correct Answer: D

Direct links query: Returns work items and any work items that are linked to these items

---

QUESTION 5

Your development team is working through their bug backlog and tracking their progress on the Bugs dashboard.

You look at the active bugs by assignment report and notice that the average size of your team members\' bands for active bugs is increasing over time.

You need to identify the issues blocking the team\\'s progress toward resolving and closing bugs.

Which issue should you investigate?

A. The bug backlog is divided evenly across the development team for resolution.

B. The test cases are outdated and are testing the wrong code.

C. The reactivated bugs that the development team is working through are resolving faster than expected.

D. The team has reallocated members to other non-priority tasks.

Correct Answer: D

Bug progress indicators include:

* The band for active Bugs is becoming wider.
