**QUESTION 1**

You are developing a Web page. The user types a credit card number into an input control named cc and clicks a button named submit. The submit button sends the credit card number to the server. A JavaScript library includes a

CheckCreditCard function that returns a value of true if the credit card appears to be valid, based on its checksum.

You need to ensure that the form cannot be used to submit invalid credit card numbers to the server.

What should you do?

- A. Configure the input control to run on the server. On the submit button, add a server-side OnClick handler that calls CheckCreditCard and rejects the form submission if the input is invalid.
- B. On the input control, add an onChange handler that calls CheckCreditCard and cancels the form submission when the input is invalid.
- C. Configure the input control and the submit button to run on the server. Add a submit\_OnClick handler that calls CheckCreditCard and rejects the form submission if the input is invalid.
- D. On the form, add an onSubmit handler that calls CheckCreditCard and cancels the form submission if the input is invalid.

Correct Answer: D

---

**QUESTION 2**

State management

You have to store user data of 200 KB in an object.

Which state management technique to use:

- A. Server session
- B. Cookie
- C. ViewState
- D. Hidden Field

Correct Answer: A

---

**QUESTION 3**

You are developing an ASP.NET Web application. Application data is stored in a Microsoft SQL Server 2008 database. You configure a connection string named cnnContoso. The application must cache the data that is returned from the database by using this connection string. You need to ensure that the application checks the database every 10 seconds. What should you do?

- A. Add the following configuration to the section of the web.config file.

B. Add the following configuration to the section of the web.config file.

C. Add the following @ Page directive to pages that query the database.

D. Add the following @ Page directive to pages that query the database.

Correct Answer: B

---

#### QUESTION 4

You create a Web page that contains the following code. (Line numbers are included for reference only.)

```
01 <script>
02     function changeColor(c) {
03         message.style.color = c;
04     }
05 </script>
07 <p id="message">Welcome!</p>
08 <ul id="color">
09     <li>Black</li>
10     <li>Red</li>
11 </ul>
```

You need to ensure that when the user clicks an item in the list, the text color of the "Welcome!" message will change.

Which declaration should you use?

A.

- Black
- Red

B.

- Black
- Red

C.

- Red
- Black

D.

- Black
- Red

E.

- Red
- Black

F.

Correct Answer: A

---

### QUESTION 5

You create a Web page that contains the following div.

You have a JavaScript array named `imageurls` that contains a list of image URLs. You need to write a JavaScript function that will insert images from the URLs into target.

Which code segment should you use?

- A. `$(imageurls).each(function(i,url){$(" ", url).append("#target");});`
- B. `$(imageurls).each(function(i,url){$("#target") += $("").attr("src", url);});`
- C. `$.each(imageurls, function(i,url){$("").attr("src", url).appendTo("#target");});`
- D. `$.each(imageurls, function(i,url){$("#target").append("").src = url;});`

Correct Answer: C
