- ⚙️ **800,000+** Satisfied Customers

### QUESTION 1

You are designing a Windows Presentation Foundation (WPF) application that displays thumbnail images of photographs. The thumbnails are arranged in rows and columns.

The number of columns must automatically update based on the size of the application window.

You need to recommend a container for displaying all the thumbnail images at the same size.

Which container should you recommend?

- A. a WrapPanel control
- B. a StackPanel control
- C. a Canvas control
- D. a DockPanel control

Correct Answer: A

---

### QUESTION 2

You design a Windows Presentation Foundation (WPF) application that connects to a Microsoft SQL Server 2008 database.

The WPF application becomes unresponsive at times. When the WPF application is running, physical memory usage is between 90 percent and 95 percent.

You need to recommend a tool that will identify the memory usage characteristics of the WPF application.

Which tool should you recommend?

- A. SQL Profiler
- B. CLR Profiler
- C. Event Tracing for Windows (ETW)
- D. Application Center Test (ACT)

Correct Answer: D

---

### QUESTION 3

You are creating a Windows Presentation Foundation (WPF) application by using Microsoft .NET Framework 4 and Microsoft Visual Studio 2010. The application will consist of several data entry forms. Each data entry form requires a user to enter phone numbers and addresses.

You need to design a solution that promotes code reusability.

What should you do?

- A. Add multiple text boxes for each data entry form.
- B. Use the same style resource for each data entry form.
- C. Create a new user control and reference it on each data entry form.
- D. Create a new merged resource dictionary and reference it from each data entry form.

Correct Answer: C

---

#### QUESTION 4

You are designing a Windows Presentation Foundation (WPF) application. The WPF application displays indicators to compare your company's past performance to the current day's operations data. The WPF application accesses historic

data from your company's data warehouse through a Web service, and accesses current data directly from a Microsoft SQL Server 2008 database.

The WPF application must meet the following requirements:

Retrieve historic data from the data warehouse at application startup and then once per day.

Retrieve current data from the database every five minutes, and then update the indicators.

Cache all retrieved data.

Target the .NET Framework 4 Client Profile.

You need to recommend an approach to data caching.

What should you recommend?

- A. Use System.Web.Caching with a sliding expiration.
- B. Use System.Runtime.Caching with an absolute expiration.
- C. Use System.Runtime.Caching with a sliding expiration.
- D. Use System.Web.Caching with are absolute expiration.

Correct Answer: C

---

#### QUESTION 5

You are designing an application by using Microsoft .NET Framework 4 and Microsoft Visual Studio 2010.

The application is used mostly in a disconnected scenario. The application requires offline data from a Microsoft SQL Server 2008 database. When the application connects to the network, data will be modified and synchronized.

You need to ensure that the application does not access the database server directly to synchronize data when online.

Which technology should you use?

- A. WCF Data Service
- B. Remote Data Access
- C. ADO.NET Sync Services
- D. SQL Server Merge Replication

Correct Answer: C
