QUESTION 1

You are the Azure architect for an organization. You are working with C-level management to assign Azure role-based access control roles to a team within the organization. A single director oversees two teams, a development team and a test team. The director is wholly responsible for the organization\\'s Azure account, including billing, infrastructure, and access control. The director is the only member of the team with the ability to alter access controls.

You have the following requirements:

*

 Members of the development team must be able to view or alter Azure infrastructure to support application development.

*

 Members of the test team must be able to view Azure infrastructure to support test cases.

You need to assign built-in Azure role-based access control roles to team members within the organization.

Which role should you assign to each team member? To answer, drag the appropriate role to the correct team member. Each role may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

Select and Place:

Roles		Answer Area	
Owner		**Team Member**	**Role**
Contributor		The director	Role
Reader		Members of the development team	Role
Editor		Members of the test team	Role
Publisher			

Correct Answer:

Roles	Answer Area	
	Team Member	**Role**
	The director	Owner
Editor	Members of the development team	Contributor
Publisher	Members of the test team	Reader

QUESTION 2

You are designing a solution that will aggregate and analyze data from Internet of Things (IoT) devices.

The solution must meet the following requirements:

Store petabytes of data

Use shared access policies to provide service connections to the IoT event source.

Conduct analysis of data in near real-time.

Provide ultra-low latency and highly scalable transaction processing.

You need to recommend a technology.

What should you recommend?

A. Azure Data Lake Store

B. Azure Redis Cache

C. Azure Time Series Insights

D. Azure Table storage

Correct Answer: A

QUESTION 3

You manage an Azure Web Site for a consumer-product company. The website runs in Standard mode on a single medium instance. You expect increased traffic to the website due to an upcoming sale during a holiday weekend.

You need to ensure that the website performs optimally when user activity is at its highest.

Which option should you select? To answer, select the appropriate option in the answer area.

Hot Area:

Correct Answer:

QUESTION 4

You administer of a set of virtual machine (VM) guests hosted in Hyper-V on Windows Server 2012 R2. The virtual machines run the following operating systems:

*

 Windows Server 2008

*

 Windows Server 2008 R2

*

 Linux (openSUSE 13.1)

All guests currently are provisioned with one or more network interfaces with static bindings and VHDX disks. You need to move the VMs to Azure Virtual Machines hosted in an Azure subscription. Which three actions should you perform?

Each correct answer presents part of the solution.

A.

Install the WALinuxAgent on Linux servers.

B.

Ensure that all servers can acquire an IP by means of Dynamic Host Configuration Protocol (DHCP).

C.

Upgrade all Windows VMs to Windows Server 2008 R2 or higher.

D.

Sysprep all Windows servers

E.

Convert the existing virtual disks to the virtual hard disk (VHD) format.

Correct Answer: ABE

The Azure Linux Agent is installed on the Linux VM and is responsible to communicate with the Azure Frabric Controller.

It is a prerequisite that the Virtual Machines can receive ip addresses from DHCP.

Azure does not use VHDX, only VHD. We are required to convert VHDX to VHD.

QUESTION 5

You are managing the automation of your company's Azure resources.

You need to choose the appropriate tool to automate specific use cases.

Which tool should you choose for each use case? To answer, select the appropriate tool from each list in the answer area.

Hot Area:

Correct Answer:

Answer Area

Use case	Tool
Automate a portfolio of scripts.	▼
	Azure Automation
	Desired State Configuration
Create an ad hoc script to add a virtual machine.	▼
	Azure PowerShell
	Desired State Configur
