QUESTION 1

You are designing a SharePoint 2010 feature. The feature includes a feature receiver that executes code on activation and deactivation.The feature receiver code interacts with a Web service, which could cause errors beyond your control.You need to ensure that the feature does not activate or deactivate if the Web service causes an error.

Which approach should you recommend?

A. Wrap your code in a try-catch block. Log the error and issue another request to the Web service in the catch block.

B. Wrap your code in a try-catch block. Log the error and throw an exception in the catch block.

C. Wrap your code in a try-catch block. Only catch exceptions of type SPException.

D. Wrap your code in a try-finally block. Log any issues your code encounters in the finally block.

Correct Answer: B

QUESTION 2

You are designing a SharePoint 2010 application.You need to specify that a custom button is defined and added to the SharePoint 2010 ribbon. Which two actions should be performed? (Each correct answer presents part of the solution. Choose two.)

A. Create a new Content Organizer content type that defines the button.

B. Create Feature Definition and Feature Element XML files that define the button.

C. Use the STSADM.EXE utility to deploy the button.

D. Use the Site Collection Features option in the Site Collection Administration group to deploy the button.

Correct Answer: BC

QUESTION 3

You are designing a solution that includes a custom list on a SharePoint 2010 site. You need to design the solution to meet the following requirements:

.The solution needs to add customized files to the site as part of the list provisioning.

.The list should only be provisioned in the sites of the site collection where it is specifically needed.

.The files must no longer remain provisioned in the site if the custom list is removed.

Which approach should you take?

A. Design a custom list. Implement list event receivers to add the custom files to the bin directory of the Web application.

B. Design a custom feature solution. Implement feature event receivers on the Activate action to add files to the site.

C. Design a custom feature solution. Implement feature event receivers on these two actions:

install action to add files

uninstall action to delete the files that were added during installation of the feature

D. Design a custom feature solution. Implement feature event receivers on these two actions:

activate action to add the files

deactivate action to delete the files that were added during activation of the feature

Correct Answer: D

QUESTION 4

Your company uses a third-party service to host its SharePoint 2010 site. The hosting service requires all sites to be sandboxed and uses forms-based authentication (FBA).You are asked to integrate the customer relationship management (CRM) data that is stored within your company\'s domain into the SharePoint site. The CRM data is trimmed based on the user token and is made accessible via Web services.You need to display the CRM data in the correct way for each user token.

Which approach should you recommend?

A. Connect to the CRM system using Business Connectivity Services (BCS) with WindowsCredentials set as the authentication mode. Use the Secure Store Service to map FBA credentials to domain credentials.

B. Connect to the CRM system using BCS with PassThrough set as the authentication mode. Use the Secure Store Service to map FBA credentials to domain credentials.

C. Connect to the CRM system using BCS with RevertToSelf set as the authentication mode. Use the Secure Store Service to map FBA credentials to domain credentials.

D. Prompt users for their domain credentials and make a call to the web services using these domain credentials.

Correct Answer: A

QUESTION 5

You are designing a maintenance plan for a SharePoint 2010 intranet site. You have the following requirements:

.The site has 25 custom content types and 5 document libraries. One of the document libraries has more than 1,000 documents.

.Every document in the site is associated with one of the custom content types.

.Each document library has a single view, showing the name of the document and the person who last modified it.

.Private views are not permitted in the site.

.The site is used for collaboration and does not have any of the SharePoint publishing features enabled.

You need to enable users to filter the documents in the large document library by content type.

Which approach should you recommend?

A. Activate the Metadata Navigation and Filtering feature. Modify the metadata navigation settings for the document library by adding Content Type to the list of selected hierarchy fields.

B. Create a new site scope for each content type. For each scope, add a rule of type Property Query. Set the Property Restriction to include any item with the name of the content type of the scope.

C. For each content type, create a new Web Part using the Content Query Web Part. Configure the Web Part to filter the documents in the document library by that content type.

D. Go to the site navigation page and enable the Tree View option. Use the Tree View option to filter the documents in the document library.

Correct Answer: A
