**QUESTION 1**

You are designing a SharePoint 2010 application that contains a Web Part. The Web Part must connect to an RSS data stream provided by a Web service. The Web service is on another server in the domain. You need to recommend an authentication approach that meets the following requirements:

.SharePoint users must not be required to supply additional credentials for the Web service. .Standard authentication systems available to SharePoint 2010 must be used.

Which authentication approach should you recommend?

- A. NTLM
- B. forms-based authentication (FBA)
- C. Kerberos
- D. Lightweight Directory Access Protocol (LDAP)

Correct Answer: C

QUESTION 2

You are planning an upgrade from an existing Microsoft Office SharePoint Server (MOSS) 2007 farm to a SharePoint 2010 farm. The existing farm contains customized master pages. These master pages include modifications of the:

.Publishing Console .Site Actions Menu .Log-in Control

Your design must specify an upgrade to the existing master pages to function correctly in SharePoint 2010.

Which approach should you recommend?

- A. Create a new SharePoint 2010 master page and add the required controls into the Ribbon on the page.
- B. Update the cascading style sheet (CSS) styles in the core.css file of the existing SharePoint sites with the SharePoint 2010 CSS styles. Add SharePoint 2010 content placeholders to the existing master pages.
- C. Create SharePoint 2010 delegate controls for all of the custom controls in the existing MOSS 2007 master pages. Add these controls to the new SharePoint 2010 master pages.
- D. Use the Farm Configuration wizard to upgrade the existing MOSS 2007 master pages so that the pages are compatible with SharePoint 2010.

Correct Answer: A

QUESTION 3

You are creating a plan to add new functionality into a SharePoint 2010 farm. Several artifacts must be created to provide the new capabilities. The artifacts required include the following:

- .A custom site definition with company branding
- .A Web Part to provide a graph of business statistics
- .Custom code to calculate the business statistics

Your plan needs to include a process to create and deploy the new functionality.

Which approach should you recommend?

- A. Define the new site definition, including the company branding and all the required artifacts. Create a site using this new site definition.
- B. Define a site template built on a new site definition, which includes the company branding. Implement it on the site that includes the new artifacts. Reset IIS.
- C. Develop and test the required artifacts. Build the artifacts into a solution package. Deploy the solution package to the farm.
- D. Build the company branding and the new artifacts into a feature. Staple the new feature to an existing site definition in the farm. Reset IIS.

Correct Answer: C

QUESTION 4

You are designing a SharePoint 2010 solution. Site administrators do not have direct access to the file system on the Web servers. You need to design the solution according to following requirements:

- .It must contain a set of Web Parts that receive information from a common collection of configuration data.
- .Site administrators must be able to modify the configuration settings for individual sites using the standard SharePoint user interface.

Which approach should you recommend?

- A. Set the configuration data with the SPWebConfigModification object.
- B. Set the configuration data with SharePoint persisted objects.
- C. Set the configuration data in the property bag for each Web site.
- D. Set the configuration data in a list on each site where the Web Parts are placed.

Correct Answer: D

QUESTION 5

You are designing a SharePoint 2010 application that will deploy a Web Part assembly. You need to specify which element to add to the solution manifest (manifest.xml) to meet the following requirements:

.The Web Part must retrieve data from an external database but must not require a custom access policy. .The company's security policies specify that all SharePoint Web applications must run at minimal trust.

Which approach should you recommend?

- A. Add a DwpFile element and an Assembly element specifying a DeploymentTarget of GlobalAssemblyCache.
- B. Add a DwpFile element and an Assembly element specifying a DeploymentTarget of WebApplication.
- C. Add a SafeControl element within an Assembly element specifying a DeploymentTarget of GlobalAssemblyCache.
- D. Add a SafeControl element within an Assembly element specifying a DeploymentTarget of WebApplication.

Correct Answer: C
