Users in Group1 must be able to view pages and documents, but must be prevented from viewing the historical versions of pages and documents and the permissions of users.

Users in Group2 must be able to view, to add, to update, to delete, to approve, and to add columns in lists.

You need to identify the permission level required for each group. The solution must minimize the number of permissions assigned to each group.

Which permission levels should you identify? To answer, drag the appropriate permission level to the correct group in the answer area.

Select and Place:

The screenshot shows a 'Permission Levels' list on the left and an 'Answer Area' on the right. The 'Permission Levels' list includes: Contribute, Design, Full Control, Restricted Read, Read, and View Only. The 'Answer Area' has two slots: 'Group1 Permission level' and 'Group2 Permission level'. Both slots are currently empty.
