**QUESTION 1**

You have an Active Directory domain. All client computers run Windows 7 and are joined to the domain.

The help desk reports that several users recently downloaded and installed malware. You discover that the users modified the Windows Defender settings on their computers. You need to recommend a solution to prevent users from modifying their Windows Defender settings.

What should you recommend?

- A. Modify the User Account Control (UAC) settings.
- B. Modify the membership of the local Administrators group.
- C. From Program and Features, modify the Windows Features.
- D. From a Group Policy object (GPO), modify the Windows Defender settings.

Correct Answer: D

changed answer from B.to D. Chapter 5 Lesson 1 p 209 - 211 <http://sourcedaddy.com/windows-7/configuring-windows-defender-group-policy.html>

---

**QUESTION 2**

Members of the Sales Support team must contact the help desk to have their AD DS user accounts unlocked.

You need to recommend a solution to ensure that user accounts for members of the Sales Support team are automatically unlocked 10 minutes after becoming locked.

What should you recommend?

- A. Create a new Group Policy object with a different account lockout policy and link it to the domain.
- B. Modify the Unlock Account options for the members of the Sales security group.
- C. Create a fine-grained password policy with a different account lockout policy and apply it to the Sales security group.
- D. Modify the Account Properties Options properties for the members of the Sales security group.

Correct Answer: C
