QUESTION 1

You use the Microsoft Deployment Toolkit (MDT) 2010 to create a Windows 7 test image. You deploy the image by using a USB flash drive. The Windows 7 deployment includes a custom task sequence to install a new finance application from the deployment share.

You need to deploy the image in the Munich office by using Zero Touch Installation.

What should you do?

A. Install System Center Configuration Manager (ConfigMgr) 2007 in the Munich office. Configure a deployment point and configure the network for PXE. Recapture the MDT image and create a task sequence for the finance application.

B. Install System Center Configuration Manager (ConfigMgr) 2007 in the Carlsbad office. Configure a deployment point and configure the network for PXE. Recapture the MDT image with the finance application installed.

C. Install a new deployment share in the Munich office. Create a Windows PE boot disk with network drivers. Recapture the MDT image and create a task sequence for the finance application. Create a custom script that can map a drive to the deployment share and start Setup.

D. Install a new deployment share in the Munich office. Configure a deployment point and configure the network for PXE. Recapture the MDT image and create a task sequence for the finance application.

Correct Answer: A

QUESTION 2

You have an image that is used to deploy Windows 7 on client computers.

You need to add drivers to the Windows 7 image.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

A. Use the Deployment Image Servicing and Management (DISM) tool offline.

B. Use INF files for driver packages.

C. Use executable files for driver packages.

D. Use Windows Installer files for driver packages.

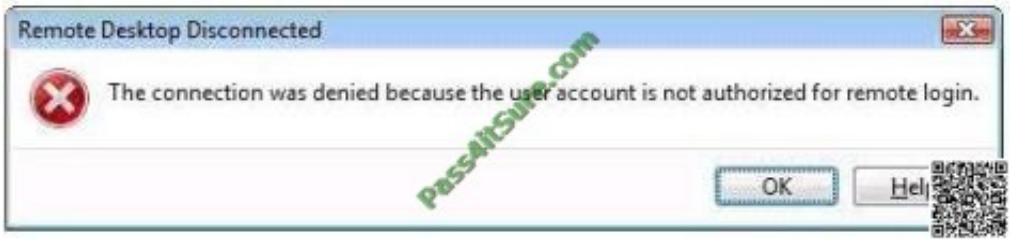
E. Use the Deployment Image Servicing and Management (DISM) tool online.

Correct Answer: AB

Deployment Image Servicing and Management able to attach INF driver file to image at offline mode

QUESTION 3

When a user attempts to connect to a server named Server1 by using Remote Desktop Connection (RDC), he receives the following error message.



You need to assign the least amount of privilege to the user to ensure that he can connect to Server1 by using RDC. To which group should you add the user?

A. Add the user to the Power Users group on Server1.

B. Add the user to the Remote Desktop Users group on Server1.

C. Add the user to the domain Windows Authorization Access group.

D. Add the user to the domain Remote Desktop Users group

Correct Answer: B

QUESTION 4

Your company has an Active Directory domain.

You are planning the deployment of Windows 7 to client computers that are located in a main office and in satellite offices. All client computers use the same hardware.

Your company\\'s security policy has the following requirements:

The template must not apply to client computers in the satellite offices.

You need to recommend an image-creation strategy that meets the requirements of the security policy. The solution must minimize administrative effort.

What should you include in your recommendations?

A. One image for all client computers A Group Policy object

B. One image for the main office computers One image for the satellite office computers A Data Recovery Agent A Security database (secedit.sdb)

C. One image for the main office computers One image for the satellite office computers A Group Policy object

D. One image for all client computers A Data Recovery Agent A Security database (secedit.sdb)

Correct Answer: A

QUESTION 5

You are installing a new third-party application to all the Windows 7 client workstations that your company has deployed.

You need to monitor all of the actions taken by the application installer.

Which application should you use?

A. Update Compatibility Evaluator

B. Setup Analysis Tool

C. Windows Compatibility Evaluator

D. Compatibility Administrator

Correct Answer: D
