**QUESTION 1**

Your computer runs Windows 8 and is connected to an Active Directory Domain Services (AD DS) domain.

You create a folder and share the folder with everyone in your organization.

You need to modify the NTFS permissions of the folder to meet the following criteria:

Users from the Marketing security group must be able to open files, but not modify them.

Users from the Supervisors security group must be able to create, modify, and delete files.

Users from both groups must not be able to delete the folder.

Which permissions should you set?

- A. Assign the Marketing group the Read permission. Assign the Supervisors group the Read and Write permissions and the Delete Subfolders and Files special permission.
- B. Assign the Marketing group the Read and Write permissions. Assign the Supervisors group the Full Control permission.
- C. Assign the Marketing group the Read and Write permissions. Assign the Supervisors group the Modify permission and the Delete Subfolders and Files special permission.
- D. Assign the Marketing group the Read permission. Assign the Supervisors group the Read and Write permissions and the Delete special permission.

Correct Answer: A

---

**QUESTION 2**

You have a computer that runs Windows 8, and three unused external disk drives. You are creating a volume to store picture files. You have the following requirements:

Use all three external disk drives.

Ensure that the volume is accessible from a single drive letter.

Maximize the available space.

You need to create the volume.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Set the resiliency type to **Parity**.

Run the Disk Management tool.

Set the resiliency type to **None**.

Select the external hard drives.

Create a new storage pool.

Correct Answer:

Set the resiliency type to **Parity**.

Run the Disk Management tool.

Create a new storage pool.

Select the external hard drives.

Set the resiliency type to **None**.

### QUESTION 3

A company has Windows 8.1 client computers. A client computer named COMPUTER1 has a shared folder named Computer1 located in the user's Downloads folder. Computer1 is shared only with employees in the Marketing department.

All Marketing employees can connect to Computer1 from their client computers.

A Marketing employee is unable to connect to Computer1 from a legacy device that is not compatible with the Windows 8.1 default sharing settings. The device is able to connect to resources on other client computers.

You need to configure COMPUTER1 to allow the device to connect to Computer1.

Which setting should you enable?

- A. Turn off network discovery
- B. Use 128-bit encryption to help protect file sharing connections
- C. Turn on sharing so anyone with network access can read and write files in the Public folders
- D. Enable file sharing for devices that use 40- or 56-bit encryption
- E. Turn off password protected sharing

Correct Answer: D

---

#### QUESTION 4

A computer that runs Windows 8 is configured with a 2 TB storage pool. The storage pool currently shows 1 TB of available space.

You try to save 100 MB of files to the storage drive. An error message states that the drive is full.

You need to make an additional 1 TB of space available in the storage pool.

What should you do?

- A. Connect a 1 TB drive to the computer and add the new drive to the storage pool.
- B. Connect a 1 TB drive to the computer and assign a drive letter to the new drive.
- C. Set the resiliency type of the storage pool to Parity.
- D. Set the logical size of the storage pool to 2 TB.

Correct Answer: A

---

#### QUESTION 5

A company has 100 client computers that run Windows 8.

You plan to install a custom app that requires a license key.

You need to ensure that the installation process does not prompt for the manual entry of a license key.

What should you do?

- A. Install and run the Microsoft Deployment Toolkit.
- B. Install and run the Microsoft Assessment and Planning Toolkit.
- C. Install and run the Windows App Certification Kit.
- D. Install and run the Windows Application Compatibility Toolkit.

Correct Answer: A
