**QUESTION 1**

A company has an Active Directory Domain Services (AD DS) domain. All company employees work on their personally owned computers, which are not members of the domain. The computers are running Windows XP Home, Windows

Vista Business, Windows 7 Home Premium, or Windows 8.1. The company is a volume license subscriber.

The company plans to deploy Group Policies to all computers. You need to ensure that every employee's computer is subject to the Group Policies.

What should you do first?

- A. Start each computer from a USB flash drive on which you have installed BitLocker To Go.
- B. Start each computer from a USB flash drive on which you have installed Windows To Go.
- C. Join all the computers to the domain.
- D. Join all the computers to the same homegroup.

Correct Answer: B

QUESTION 2

A company has 100 client computers that run various editions of Windows 7. The company plans to upgrade or replace computers so that all client computers run an edition of Windows 8.1.

The company plans to use the following programs and features on the Windows 8 computers:

32-bit and 64-bit software

Desktop apps Windows Media Player Storage Spaces

You need to identify the installation or upgrade paths that support the programs and features.

Which three paths meet the requirements? (Each correct answer presents a complete solution. Choose three.)

- A. Purchase hardware with Windows RT pre-installed.
- B. Perform a clean installation of Windows RT.
- C. Perform a clean installation of Windows 8.1 Pro.
- D. Perform a clean installation of Windows 8.1.
- E. Upgrade from Windows 7 Enterprise to Windows 8.1 Enterprise.

Correct Answer: CDE

Explanation: <http://www.microsoft.com/en-us/windows/enterprise/products-and-technologies/windows-8-1/compare/default.aspx> Compare Windows 8.1 Editions

QUESTION 3

A Windows 8.1 Pro computer has a single hard disk drive.

You add a second, unformatted, hard disk drive to the computer. You plan to provision Windows BitLocker Drive Encryption on the second hard drive in preparation for installing an operating system on the hard drive for use in another

computer.

You need to configure encryption for the new hard drive without fully completing BitLocker activation.

Which four actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Actions	Answer Area
Use the Disk Management tool to create a volume on the drive.	
Run the manage-bde command.	
Run the BdeHdCfg command.	
Use the Disk Management tool to enable BitLocker on the drive.	
Use the Disk Management tool to initialize the disk.	
Enable BitLocker on the new hard drive from Control Panel.	
Run the bcdboot command.	

Correct Answer:

Actions	Answer Area
	Use the Disk Management tool to create a volume on the drive.
	Run the bcdboot command.
Use the Disk Management tool to enable BitLocker on the drive.	Run the BdeHdCfg command.
Use the Disk Management tool to initialize the disk.	Run the manage-bde command.
Enable BitLocker on the new hard drive from Control Panel.	

QUESTION 4

Your company recently purchased 25 new laptops. All 25 laptops have the same hardware configuration and do not have any operating system installed.

You have been asked to deploy Windows 8 on these laptops. You have installed and configured Windows 8 on a reference laptop.

You need to create an image and deploy it to the 25 new laptops.

Which four actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
Start the destination laptop from the Windows PE media. Use the Diskpart tool to create the desired partition structure.	
Start the destination laptop from the Windows PE media, and then use the Fdisk tool to create the desired partition structure.	
Remove computer-specific information from the reference laptop.	
Start the reference laptop from the Windows PE media. Use the DISM tool to capture the image, and then upload the image file to a network share.	
Use Windows Easy Transfer (WET) to transfer the image from network share, and then use the DISM tool to apply the image to your windows partition.	
Connect to the network share, and then use the DISM tool to apply the image to your windows partition.	

Correct Answer:

Answer Area	
Start the destination laptop from the Windows PE media. Use the Diskpart tool to create the desired partition structure.	Remove computer-specific information from the reference laptop.
	Start the reference laptop from the Windows PE media. Use the DISM tool to capture the image, and then upload the image file to a network share.
	Start the destination laptop from the Windows PE media, and then use the Fdisk tool to create the desired partition structure.
	Connect to the network share, and then use the DISM tool to apply the image to your windows partition.
Use Windows Easy Transfer (WET) to transfer the image from network share, and then use the DISM tool to apply the image to your windows partition.	

QUESTION 5

You have a client computer that runs Windows 8 Pro. The computer contains a storage pool. You need to remove a disk named Disk 2 from the storage pool.

What should you configure first? (To answer, select the appropriate option in the answer area.)

Hot Area:

Control Panel > System and Security > Storage Spaces

Manage Storage Spaces

Home

Use Storage Spaces to save files to two or more drives to help protect you from a drive failure. Storage Spaces also lets you easily add more drives if you run low on capacity. If you don't see task links, click Change settings.

Change settings

The screenshot shows the Windows Storage Spaces management console. At the top, it says "Storage pool" and "Using 3.50 GB of 505 GB pool capacity". Below this, there are three main sections:

- Storage spaces:** Shows one storage space named "Storage space (E:)" with a "Two-way mirror" configuration, a capacity of "126 GB", and "Using 2.00 GB pool capacity". It has a status of "Okay" and buttons for "View files", "Change", and "Delete".
- Physical drives:** Shows four drives, each with a status of "Okay":
 - Disk 1:** Attached via ATA, 1.18% used, Providing 126 GB pool capacity. Button: "Rename".
 - Disk 2:** Attached via SCSI, 1.18% used, Providing 126 GB pool capacity. Button: "Rename".
 - Virtual HD ATA Device:** Attached via ATA, 0.19% used, Providing 126 GB pool capacity. Buttons: "Rename", "Remove".
 - Microsoft Virtual Disk:** Attached via SCSI, 0.19% used, Providing 126 GB pool capacity. Buttons: "Rename", "Remove".

Correct Answer:

Control Panel > System and Security > Storage Spaces

Manage Storage Spaces

Home

Use Storage Spaces to save files to two or more drives to help protect you from a drive failure. Storage Spaces also lets you easily add more drives if you run low on capacity. If you don't see task links, click Change settings.

Change settings
