**QUESTION 1**

You have a deployment of Microsoft System Center 2012 R2 Configuration Manager. All client computers have the Configuration Manager client installed.

You deploy two applications named App1 and App2. App1 is a large application that is used infrequently.

Some users receive notifications indicating low disk space on their client computer.

You need to uninstall App1 from any client computer that has both App1 and App2 installed and that has less than 1GB of free disk space.

What should you do? To answer, select the appropriate options in the answer area.

Hot Area:

**Answer Area**

Identify computers by:

- Creating a configuration item.
- Creating a software category.
- Creating a software metering rule.
- Creating a device collection that uses a query rule.
- Creating a user data and profiles configuration item.

Remediation plan:

- Retire App1.
- Create a deployment for App1.
- Create an automatic deployment rule.
- Create and deploy an App-V package for App1.

Correct Answer:

**Answer Area**

Identify computers by:

- Creating a configuration item.
- Creating a software category.
- Creating a software metering rule.
- Creating a device collection that uses a query rule.
- Creating a user data and profiles configuration item.

Remediation plan:

- Retire App1.
- Create a deployment for App1.
- Create an automatic deployment rule.
- Create and deploy an App-V package for App1.

### QUESTION 2

You need to resolve the Windows update issue. What should you do?

- A. Modify the Group Policy objects (GPOs) in Active Directory.
- B. Synchronize software updates from Configuration Manager.
- C. Create an automatic deployment rule.
- D. Add distribution points to each branch office.

Correct Answer: D

### QUESTION 3

You need to recommend a procedure for collecting Configuration Manager hardware inventory in the Montreal and Toronto offices.

What should you recommend? In the table below, select the configurations to perform for each hardware inventory. Make only one selection in each row.

Hot Area:

#### Answer Area

Configuration	Montreal office hardware inventory	Toronto office hardware inventory
Add a class to the Default Client Settings.	<input type="radio"/>	<input type="radio"/>
Enable a class in a custom Client Settings object.	<input type="radio"/>	<input type="radio"/>
Create NOIDMIF files on the client computers.	<input type="radio"/>	<input type="radio"/>
Create IDMIF files on the client computers.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

**Answer Area**

Configuration	Montreal office hardware inventory	Toronto office hardware inventory
Add a class to the Default Client Settings.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Enable a class in a custom Client Settings object.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Create NOIDMIF files on the client computers.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Create IDMIF files on the client computers.	<input checked="" type="checkbox"/>	<input type="checkbox"/>

**QUESTION 4**

You need to configure Asset Intelligence. The solution must meet the Configuration Manager requirements. What should you do?

- A. From the Assets and Compliance workspace in the Configuration Manager Console, edit the inventory classes.
- B. From the Administration workspace in the Configuration Manager Console, enable the Check Application Title with Inventory Information Asset Intelligence maintenance task.
- C. From the Administration workspace in the Configuration Manager Console, enable the Summarize Installed Software Data Asset Intelligence maintenance task.
- D. On the client computers, enable the auditing of successful logon events.

Correct Answer: A

**QUESTION 5**

You need to deploy the updates from Vendor1. The solution must meet the Configuration Manager requirements.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

### Actions

From the Updates Publisher 2011 console, add a partner software updates catalog.

From the Updates Publisher 2011 console, enable Configuration Manager integration.

From the Updates Publisher 2011 console, run the Publish Software Updates Wizard.

From the Configuration Manager Console, synchronize the software updates.

From the Updates Publisher 2011 console, import a catalog.

### Answer Area

www.Pass4itSure.com

Correct Answer:

### Actions

From the Updates Publisher 2011 console, enable Configuration Manager integration.

From the Configuration Manager Console, synchronize the software updates.

### Answer Area

From the Updates Publisher 2011 console, import a catalog.

From the Updates Publisher 2011 console, add a partner software updates catalog.

From the Updates Publisher 2011 console, run the Publish Software Updates Wizard.
