**QUESTION 1**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You administer devices in your corporate environment. The company allows employees to bring their own devices (BYOD). All BYOD devices must run Windows 10. For employees who elect to not use BYOD, the company provides a corporate laptop.

The company has a Microsoft Intune subscription and all BYOD devices have the Intune client installed. None of the BYOD devices are joined to the domain. All the corporate standard devices are managed by System Center Configuration

Manager (SCCM).

You have an application that was developed in house that must be installed on all the BYOD devices.

The application must be installed automatically on the BYOD devices without any user intervention.

Solution: You download and install a sideloading product activation key on all of the BYOD devices. You upload the application to the Intune storage and configure the app deployment action as available install.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: B

---

**QUESTION 2**

At home, you use a Windows 10 desktop computer. At work, you use a Windows 10 laptop that is connected to a corporate network. You use the same Microsoft account to log on to both computers.

You have a folder with some personal documents on your desktop computer. The folder must be available and synced between both computers.

You need to ensure that the latest version of these files is available. What should you do?

- A. Create a folder by using OneDrive for Windows. Move all of the personal documents to the new folder.
- B. Move the folder to the Libraries folder. Go to PC Settings. Under Sync your settings, enable App settings.
- C. Right-click the folder and click Properties. Under Security, provide Full Control for the Microsoft account.
- D. Right-click the folder and select Share With, and then select Homegroup (view and edit).

Correct Answer: A

To save a doc you're working on to OneDrive, select a OneDrive folder from the list of save locations. To move files to OneDrive, open File Explorer and then drag them into a OneDrive folder.

Note: OneDrive (previously SkyDrive, Windows Live SkyDrive, and Windows Live Folders) is a file hosting service that allows users to sync files and later access them from a web browser or mobile device. Users can share files publicly or

with their contacts; publicly shared files do not require a Microsoft account to access them. OneDrive is included in the suite of online services formerly known as WindowsLive.

### QUESTION 3

You have a computer that runs Windows 10 and has BitLocker Drive Encryption (BitLocker) configured. You need to change the BitLocker PIN for the drive.

What should you run?

- A. the bitsadmin.exe command
- B. the Enable-BitLocker cmdlet
- C. the Add-BitLockerKeyProtector cmdlet
- D. the Set-PcsvDeviceUserPassword cmdlet

Correct Answer: C

---

### QUESTION 4

You administer 100 Windows 10 Enterprise laptops in your company network.

You have a wireless access point that requires 802.1x authentication. Authentication requests are forwarded to a RADIUS server.

You need to configure the laptops to connect to the wireless access point. Your solution must ensure that laptops authenticate to the RADIUS server by using stored credentials.

Which three actions should you perform in sequence? To answer, move the appropriate three actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Create a new Wi-Fi profile.	1
Set the Encryption Type to TKIP.	2
Set the authentication mode to <b>User and Computer authentication.</b>	3
Configure the authentication mode to <b>User authentication.</b>	
Create a new Connection Security Rule.	
Set the authentication type to <b>Microsoft-Protected EAP (PEAP).</b>	

Correct Answer:

Actions	Answer Area
	1
Set the Encryption Type to TKIP.	2
Set the authentication mode to <b>User and Computer authentication.</b>	3
Create a new Connection Security Rule.	

### QUESTION 5

You install Windows 10 Enterprise on a new laptop that will be shipped to a remote user.

You logon to the laptop with the user credentials, map network drives, and configure the network drivers to be always available offline.

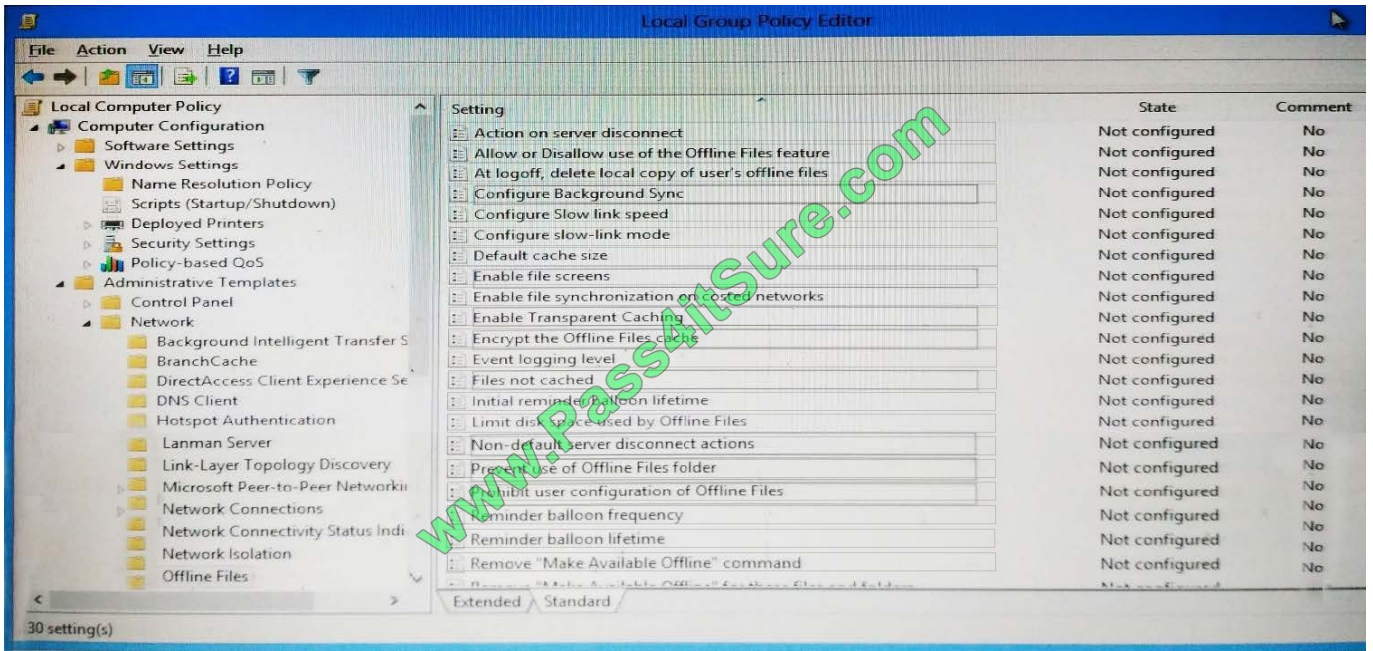

Company policy requires that files with a .db1 extension should be excluded from offline file synchronization.

You need to prevent the user from creating files with a .db1 extension on the mapped drives.

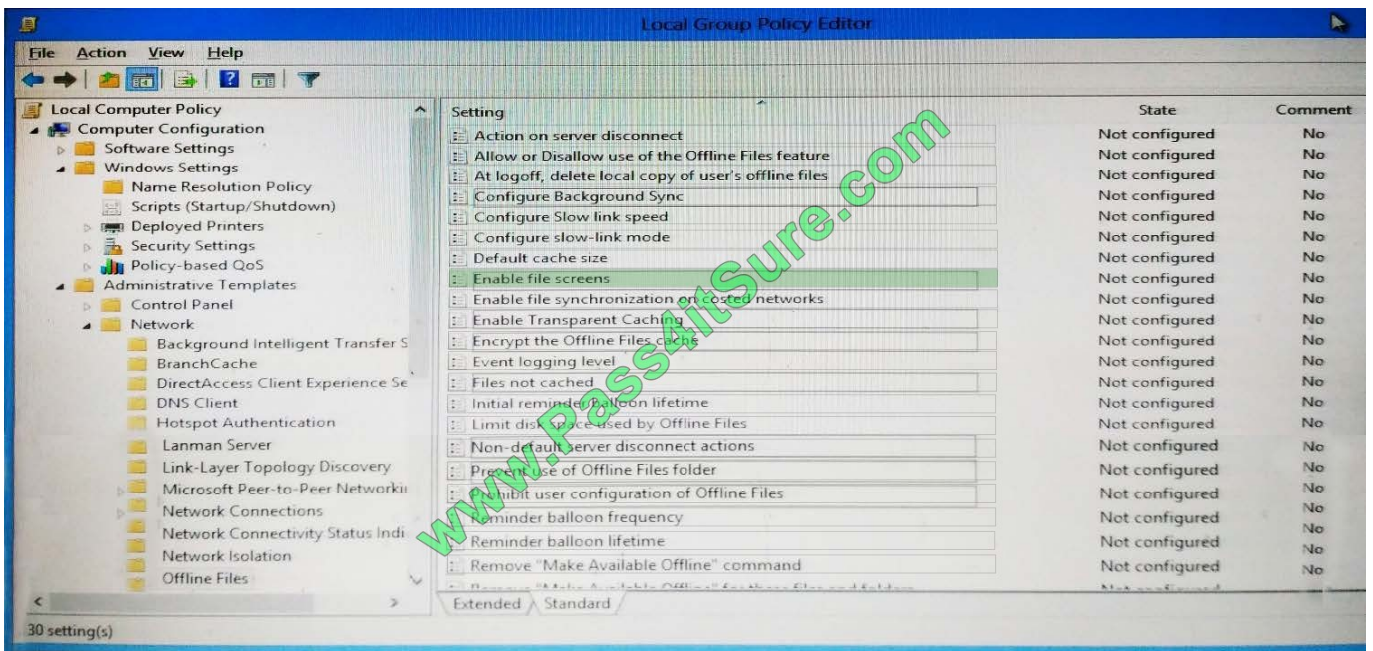

In the Local Group Policy Editor, which setting should you configure?

To answer, select the appropriate setting in the answer area.
