**QUESTION 1**

Your network contains a single Active Directory domain. The domain contains a laptop named Computer1 that runs Windows 10.

A user named User1 uses Computer1. Computer1 connects to two shared printers named Printer1 and Printer2.

Printer1 is located at the office and Printer2 is located at the home of User1.

User1 frequently reports that when attempting to print, the default printer is set to Printer2.

You need to ensure that Printer1 is the default printer always.

What should you do?

- A. Add Printer 2 to a home group.
- B. Disable Let Windows manage my default printer.
- C. Change the priority of Printer1 to 1.
- D. Change the priority of Printer2 to 1.

Correct Answer: B

QUESTION 2

You are the administrator for a company. Devices run Windows 8.1 Pro or Windows 10 Pro. You have an on-premises Active Directory Domain Services (AD DS) domain and a Microsoft Azure Active Directory (Azure AD) environment.

You must deploy the Microsoft Store for Business.

You need to ensure that the environment meets the minimum requirements for the store.

Which two options should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Upgrade the Windows 8.1 Pro machines to Windows 10 Pro.
- B. Ensure all employees have an Azure AD account.
- C. Ensure all employees have an AD DS account.
- D. Run the Enable-AppV Windows PowerShell cmdlet on all computers.

Correct Answer: AB

**QUESTION 3**

Your network contains a single Active Directory domain. The domain contains a computer that runs Windows 10.

You plan to use the computer to test applications.

You need to install Windows Insider Preview builds on the computer.

What should you do?

- A. From Group Policy, configure the Add features to Windows 10 settings.
- B. From the Settings app, configure the Advanced options for Windows Update.
- C. From Group Policy, configure the Windows Update settings.
- D. From the Settings app, select Developer mode.

Correct Answer: B

QUESTION 4

You administer a Windows 10 Enterprise computer. The computer has File History turned on, and system protection turned on for drive C.

You accidentally delete a folder named Libraries\Customers by using the Shift+Delete keyboard shortcut.

You need to restore the most recent version of the folder to its original location.

Which approach should you use to restore the folder?

- A. Recycle Bin
- B. the latest restore point
- C. File History
- D. a manually selected restore point

Correct Answer: C

File History is similar to Previous Versions in previous versions of Windows. It takes regular backups of your data and saves them to a separate disk volume or external drive. When File History is enabled, it backs up all the system libraries

and your custom libraries by default.

To restore a deleted folder, you can browse to the parent folder or library and select Restore Previous Versions. The Previous Versions tab will list the previous versions that can be restored to its original location or restored to an alternative

location.

QUESTION 5

You have a computer named Computer1 that runs Windows 10.

Computer1 is infected by a virus.

You fail to access the Settings app on Computer1 due to the virus.

You need to restart the computer and ensure that Computer1 displays the advanced startup options when the computer restarts.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

- A. From Windows PowerShell, run `Restart-Computer Computer1 - Wait - For PowerShell`.
- B. From System Configuration select safe boot select minimal, and then click Restart from the Start menu.
- C. From system Configuration, select selective startup, and then click Restart from the start menu.
- D. From a command prompt, run `shutdown.exe /r/o`.
- E. From Power on the start menu, hold the SHIFT key while you click Restart.

Correct Answer: DE
