**QUESTION 1**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. While performing maintenance on a computer,

you open Indexing Options, and then you click Pause.

You complete the computer maintenance.

You need to resume indexing.

Solution: You sign out of Windows, and then you sign back in.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

QUESTION 2

You have a computer named Computer1 that is configured to install updates from Windows Server Update Services (WSUS).

Microsoft releases a new Windows update that is not approved in WSUS.

You need to install the update on Computer1.

What should you do?

A. From a command prompt, run `gpupdate /force /sync`.

B. Click Check online for updates from Microsoft Updates, and then check for updates.

C. Clear the defer upgrades check box, and then check for updates.

D. From Windows PowerShell, run the `Get-WindowsUpdateLog` cmdlet, and then run the `Update-Module` cmdlet.

Correct Answer: C

QUESTION 3

You are the administrator for a company. All devices run Windows 10 Enterprise.

Client Hyper-V is enabled on some devices. You need to verify how the Hyper-V settings are configured for a specific virtual machine (VM) on one of the devices.

Use the drop-down menus to select the answer choice that answers each question. NOTE: Each correct selection is worth one point.

Hot Area:

How are checkpoints for the VM created?

	▼
Guest backup technologies in the VM to create the checkpoint	
Save State captures state, data, and configuration of the running VM	

Which generation is this VM?

	▼
Generation 1	
Generation 2	

Correct Answer:

How are checkpoints for the VM created?

	▼
Guest backup technologies in the VM to create the checkpoint	
Save State captures state, data, and configuration of the running VM	

Which generation is this VM?

	▼
Generation 1	
Generation 2

QUESTION 4

You are the administrator for a company. All devices run Windows 10 Enterprise.

The Multiple Activation Key (MAK) that you use is compromised. You have been issued a new MAK.

You need to implement a script that updates the key for devices and forces the devices to perform online activation.

Which three actions should you include in sequence in the script? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Open an elevated command prompt	
Slmgr /upk	
Slmgr /dli	
Slmgr /ato	
Slmgr /ipk	
Slmgr /xpr	

Correct Answer:

	Open an elevated command prompt
Slmgr /upk	Slmgr /ipk
Slmgr /dli	Slmgr /ato
Slmgr /xpr

QUESTION 5

You are the administrator for a company. All devices run Windows 10 Enterprise and are joined to an Active Directory Domain Services domain.

Administrators are unable to test network connectivity to Windows 10 devices because ping is being blocked.

You need to be able to ping the devices.

Solution: Turn on File and Printer Sharing in the Advanced Sharing settings.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B
