QUESTION 1

Your company has offices in New York and London.

All client computers run Windows 10.

You have a deployment of System Center Configuration Manager (Current Branch) that you use to manage the computers.

The company has the applications shown in the following table.

Application name	Description
App1	Installed by using an Windows Installer (MSI) package
App2	Installed by using an Windows Installer (MSI) package and is dependent on App1
App3	Installed by using an executable file named Setup.exe

You need to deploy the applications to meet the following requirements:

Deploy App2 to all the computers in the New York office.

Deploy App3 to all the computers in the London office.

Minimize administrative effort.

What should you create in Configuration Manager for each deployment? To answer, drag the appropriate options to the correct applications. Each option may be used once, more than once, or not at all. You may need to drag the split bar

between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Options

an application

a deployment package

a package

a software update group

Answer Area

App2: [Option]

App3: [Option]

Correct Answer:

Options

a deployment package

a software update group

Answer Area

App2: an application

App3: a package

QUESTION 2

You have a deployment of System Center Configuration Manager (Current Branch) that contains a primary site named S01. S01 has the Software update point site system role installed on a server named Server01 and the Distribution point

site system role installed on a server named Server02.

You need to configure when Configuration Manager can install updates on the site system servers.

What should you configure?

A. the Properties of the S01 site

B. the Distribution point Properties of Server02

C. the Software update point Properties of Server01

D. the Software Update Point Component Properties of S01

Correct Answer: A

QUESTION 3

You have a deployment of System Center Configuration Manager (Current Branch).

Your company has a main office and a branch office. The branch office has five users. Some users use laptops and some use desktop computers.

All the servers for the company are located in the main office. The branch office connects to the main office by using a VPN over a DSL connection to the main office. You need to minimize the bandwidth used to deploy updates to branch office clients over the VPN connection. The solution must minimize costs.

A. a pull-distribution point

B. a cloud management gateway

C. BranchCache

D. a cloud-based distribution point

E. a software update point

Correct Answer: C

QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has client computers that run either the 32-bit version of Windows 8 or the 64-bit version of Windows 10.

You need to install a line-of-business application to the computers. The 64-bit version of the application must be installed on the Windows 10 computers.

Solution: Create one package that uses two programs. Configure a requirement for each program.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 5

You have a deployment of System Center Configuration Manager (Current Branch).

You need to deploy an application to the users in the sales department. The deployment must meet the following requirements:

Install the application on client computers that have at least 5 GB of RAM.

Validate that the deployment of the application was successful.

Which settings should you configure for the deployment?

A. Detection Method and Requirements

B. Requirements and Dependencies

C. Install Behavior and Dependencies

D. Dependencies and User Experience

E. User Experience and Detection Method

Correct Answer: A
