**QUESTION 1**

The question requires that you evaluate the underlined text to determine if it is correct.

You are assessing the maturity of your customer's SAM program based on Microsoft SAM Optimization Model (SOM).

The following program elements are in place:

SAM processes have been defined and approved by the program manager.

SAM roles and responsibilities are defined across the organization.

Ninety-eight percent of the organization's assets are in inventory and reconciled annually.

A SAM report is produced annually and approved by the program owner.

You determine the current maturity level of the customer's SAM program is Rationalized.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. Basic
- C. Standardized
- D. Dynamic

Correct Answer: C

The Optimization model assigns organizations to four levels of maturity:

1.

Basic SAM Management of software is ad-hoc and inconsistent

2.

Standardised SAM We track assets but probably don't make best use of the data we collect

3.

Rationalized SAM We are actively managing assets throughout their lifecycle

4.

Dynamic SAM We are leveraging SAM for competitive advantage.

Or in more simple terms you might summarize the levels as: We're not doing SAM We've started doing SAM We're doing it properly We're reaping the full benefits

QUESTION 2

The question requires that you evaluate the underlined text to determine if it is correct.

An organization has several business units.

The organization reports software update issues related to maintaining different versions and editions of software.

An International Association of Information Technology Asset Managers (IAITAM) certified SAM partner reviews the existing environment and proposes ways to mitigate the issues.

The SAM partner should propose creating an IT purchasing group for each business unit.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. decentralized the asset purchasing
- C. centralizing the asset purchasing
- D. creating a hardware support group for each business unit

Correct Answer: C

SAM benefits include:

Gain centralized control and implement/enforce procurement procedures by increasing your understanding of the software licenses that your business needs to succeed.

QUESTION 3

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

An organization plans to collect software and hardware inventory information for computers and mobile devices that access internal resources.

The solution must meet the following requirements:

Specify whether Apple iOS or Android devices are jailbroken or rooted.

Minimize administrative effort

You need to collect the device data. What should you use?

- A. Microsoft Assessment and Planning Toolkit (MAP)

- B. Microsoft Deployment Toolkit (MDT)
- C. Microsoft Intune
- D. Microsoft License Advisor (MLA)
- E. Microsoft Security Compliance Manager (SCM)
- F. System Center Configuration Manager (ConfigMgr)
- G. System Center Operations Manager (OpsMgr)
- H. Microsoft Virtual Machine Manager (VMM)

Correct Answer: C

With compliance policies an Intune administrator can require: The device isn't jail-broken or rooted End users use a password to access organizational data on mobile devices A minimum or maximum operating system version on the device The device to be at, or under a threat level

QUESTION 4

You plan to inventory software assets for an organization by using Windows Management Instrumentation (WMI). You must not install third-party add-ons.

You need to list the physical computers that are running virtual machines.

On the Inventory Selection page of the Inventory and Assessment Wizard, which scenario should you select? To answer, select the appropriate scenario in the answer area.

Hot Area:

Inventory and Assessment Wizard

Inventory Scenarios

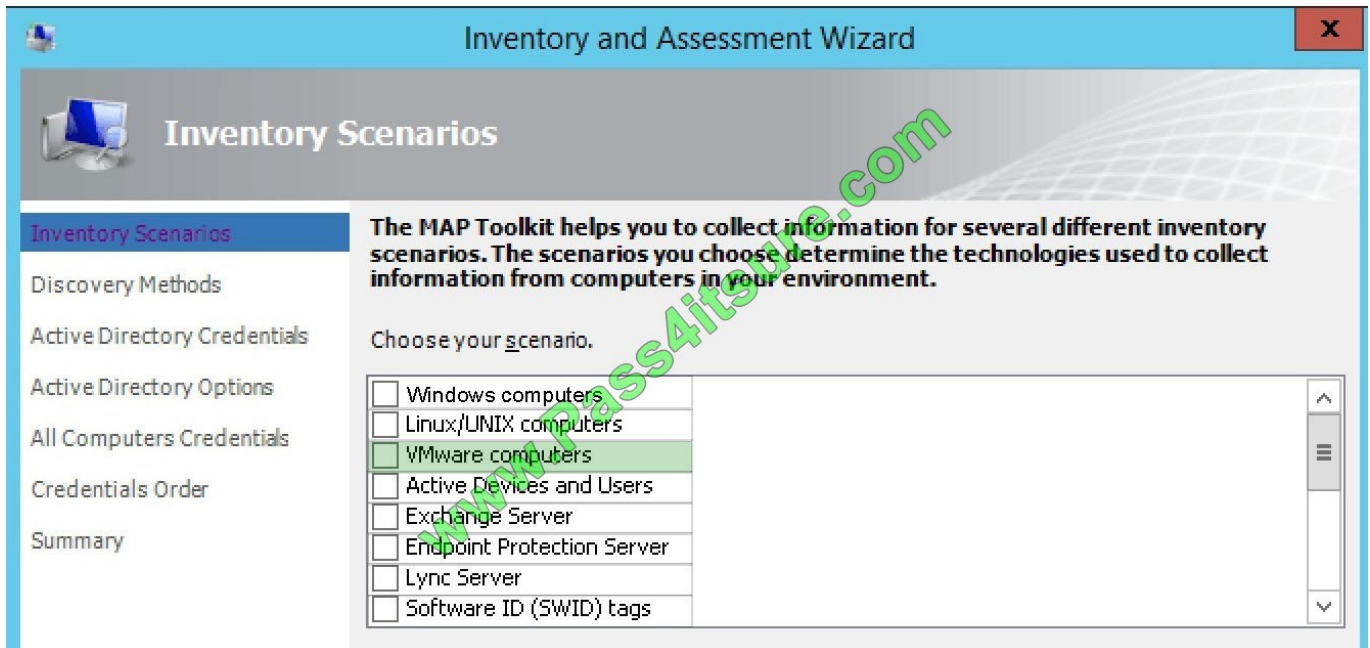

The MAP Toolkit helps you to collect information for several different inventory scenarios. The scenarios you choose determine the technologies used to collect information from computers in your environment.

Choose your scenario.

- Windows computers
- Linux/UNIX computers
- VMware computers
- Active Devices and Users
- Exchange Server
- Endpoint Protection Server
- Lync Server
- Software ID (SWID) tags

Correct Answer:

QUESTION 5

You perform a SAM engagement.

You need to implement an on-premises management solution for your hardware and software component. The solution must meet the following requirements:

Perform basic inventory discovery.

Track application versions over time.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
Implement System Center Configuration Manager (ConfigMgr).	<input type="radio"/>	<input type="radio"/>
Implement Microsoft Intune	<input type="radio"/>	<input type="radio"/>
Implement Microsoft SQL Server Reporting Services (SSRS).	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statement	Yes	No
Implement System Center Configuration Manager (ConfigMgr).	<input checked="" type="radio"/>	<input type="radio"/>
Implement Microsoft Intune	<input type="radio"/>	<input checked="" type="radio"/>
Implement Microsoft SQL Server Reporting Services (SSRS).	<input checked="" type="radio"/>	<input type="radio"/>
