QUESTION 1

A customer has asked you to complete an assessment of their existing SAM program to identify deficiencies and recommend areas for improvement.

You need to perform a SAM assessment for the customer by using the Microsoft SAM Optimization Model (SOM) methodology.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Implement System Center Configuration Manager (ConfigMgr).	
Create a hardware and software inventory for the customer's organization.	
Meet with the customer stakeholders to discuss report recommendations.	
Create an assessment report with recommendations to address customer priorities.	
Deliver an assessment survey to the customer.	

Navigation icons: Right arrow, Left arrow, Up arrow, Down arrow.

Correct Answer:

Actions

Implement System Center Configuration Manager (ConfigMgr).

Create a hardware and software inventory for the customer's organization.

Answer Area

Deliver an assessment survey to the customer.

Create an assessment report with recommendations to address customer priorities.

Meet with the customer stakeholders to discuss report recommendations.

QUESTION 2

You represent a SAM partner that helps clients optimize software usage.

You need to create a software inventory for all on-premises servers on the client's network.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point

Hot Area:

Answer Area

Statement	Yes	No
Use Microsoft Intune.	<input type="radio"/>	<input type="radio"/>
Use System Center Configuration Manager (ConfigMgr).	<input type="radio"/>	<input type="radio"/>
Use Microsoft Assessment and Planning Toolkit (MAP).	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statement	Yes	No
Use Microsoft Intune.	<input type="radio"/>	<input checked="" type="radio"/>
Use System Center Configuration Manager (ConfigMgr).	<input checked="" type="radio"/>	<input type="radio"/>
Use Microsoft Assessment and Planning Toolkit (MAP).	<input checked="" type="radio"/>	<input type="radio"/>

QUESTION 3

Your customer has an Active Directory forest that contains a System Center Configuration Manager (ConfigMgr) server.

Users have mobile devices that are frequently disconnected from the network.

The customer does not have a change management system in place. The current hardware inventory is out-of-date.

You need to update the hardware inventory to meet the following requirements:

Ensure that all desktop and mobile devices are included in the inventory.

Minimize the amount of time it takes to update the inventory.

What should you do?

- A. Gather install, move, add, change (IMAC) activities.
- B. Perform a manual count of all desktop computers.
- C. Perform a network discovery scan.

D. Gather information from the Active Directory database, the ConfigMgr database, and the purchasing history.

Correct Answer: D

QUESTION 4

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

An organization plans to collect software and hardware inventory information for computers and mobile devices that access internal resources.

The solution must meet the following requirements:

Specify whether Apple iOS or Android devices are jailbroken or rooted.

Minimize administrative effort

You need to collect the device data. What should you use?

- A. Microsoft Assessment and Planning Toolkit (MAP)
- B. Microsoft Deployment Toolkit (MDT)
- C. Microsoft Intune
- D. Microsoft License Advisor (MLA)
- E. Microsoft Security Compliance Manager (SCM)
- F. System Center Configuration Manager (ConfigMgr)
- G. System Center Operations Manager (OpsMgr)
- H. Microsoft Virtual Machine Manager (VMM)

Correct Answer: C

With compliance policies an Intune administrator can require: The device isn't jail-broken or rooted End users use a password to access organizational data on mobile devices A minimum or maximum operating system version on the device The device to be at, or under a threat level

QUESTION 5

You are conducting a SAM assessment survey for a customer. The customer does not have documented SAM processes or a dedicated SAM team.

You need to capture the details of the customer's undocumented SAM processes.

What should you do?

- A. Review purchase orders from the last 12 months to identify software purchasing patterns.
- B. Request System Center Configuration Manager (ConfigMgr) software inventory reports from IT.
- C. Collect software inventory by using the Microsoft Assessment and Planning Toolkit (MAP).
- D. Conduct a meeting with managers from IT, finance, and purchasing.

Correct Answer: D
