**QUESTION 1**

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You have a computer named Computer1 that runs Windows 10. Computer1 has the Windows Assessment and Deployment Kit (Windows ADK) installed.

You are building a new image of Windows 10.

You have a network share that contains the driver files. Each driver is comprised of an INF file and several DLL files.

You need to add the drivers to computers that are installed by using the Windows 10 image. You must achieve the goal without adding the drivers to the image.

What should you do?

- A. Mount the Install.wim file.
- B. Mount the Boot.wim file.
- C. Modify the Winpeshl.ini file.
- D. Create an answer file.
- E. Modify the Windows.ini file.
- F. Create a provisioning package.
- G. Load a catalog file (.clg).
- H. Create a cabinet file (.cab).

Correct Answer: D

---

**QUESTION 2**

You extract an image of Windows 10 in audit mode to a computer named Computer1.

You install an application named App1 on Computer1.

You need to create a siloed provisioning package of App1.

How should you create the package? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer Area**

Tool to use to create the siloed provisioning package:

dism.exe

Express Deployment Tool (EDT) for Windows 10

scanstate.exe

Windows Imaging and Configuration Designer (Windows ICD)

File extension to use for the siloed provisioning package:

.msi

.msu

.ppkg

.spp

Correct Answer:

**Answer Area**

Tool to use to create the siloed provisioning package:

dism.exe

Express Deployment Tool (EDT) for Windows 10

scanstate.exe

Windows Imaging and Configuration Designer (Windows ICD)

File extension to use for the siloed provisioning package:

.msi

.msu

.ppkg

.spp

**QUESTION 3**

Match the file formats to the corresponding deployment tools. To answer, drag the appropriate file format from the column on the left to its deployment tool on the right. Each file format may be used once, more than once, or not at all.  
NOTE: Each correct match is worth one point.

Select and Place:

**File Formats**

disc image (.iso)

provisioning package (.ppkg)

XML document (.xml)

**Answer Area**

File format

Express Deployment Tool for Windows 10

File format

Windows Imaging and Configuration Designer (Windows ICD)

File format

Windows System Image Manager (Windows SIM)

Correct Answer:

#### File Formats

#### Answer Area

disc image (.iso)	Express Deployment Tool for Windows 10
provisioning package (.ppkg)	Windows Imaging and Configuration Designer (Windows ICD)
XML document (.xml)	Windows System Image Manager (Windows SIM)

### QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a reference computer for a new UEFI-based deployment image of the 64-bit version of Windows 10. The reference computer has two physical hard disk drives.

You need to configure a partition on Disk 0 to support a recovery partition.

Solution: You create an EFI system partition of 150 MB that uses the NTFS file system.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

### QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are building a new image of Windows 10 that contains a push-button reset solution.

You need to test whether push-button reset works as expected.

Solution: From Windows 10, you press and hold the SHIFT key, and then you restart the computer. After the computer restarts, you click Troubleshoot, and then you click Reset this PC.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A
